.....acres...	99,644	78,520	45,791	25,261	3,999	3,469

2 Reported in small fractions.

1 Includes milk equivalent of cream and butterfat sold.

2 Does not include acreage for farms with less than 10 hundredweight harvested.

3 Does not include data for farms with less than 20 trees and grapevines.

State Table 23.—SAMPLING RELIABILITY OF ESTIMATED TOTALS FOR COUNTY AND STATE BY NUMBER OF
FARMS REPORTING, BY LEVELS

If the estimated number of farms reporting is—	Then the chances are about 2 in 3 that the estimated total would differ from the results of a complete tabulation of the items for all farms by less than—				If the estimated number of farms reporting is—	Then the chances are about 2 in 3 that the estimated total would differ from the results of a complete tabulation of the items for all farms by less than—			
	Level 1 ¹	Level 2	Level 3	Level 4		Level 1 ¹	Level 2	Level 3	Level 4
25.....	Percent	Percent	Percent	Percent	5,000.....	Percent	Percent	Percent	Percent
50.....	40	53	71	96	10,000.....	2.8	3.7	5.0	6.8

500.....	14	17	22	30	100,000.....	0.9	1.2	1.6	2.1
1,000.....	8.9	12	16	21	250,000.....	0.6	0.8	1.1	1.5
2,500.....	6.3	8.4	11	16		0.4	0.5	0.7	1.0
	4.0	5.3	7.1	9.6					

¹Level 1 should be used in determining the sampling reliability of estimated number of farms and farms reporting. The level for all other items should be obtained from State Table 25. If the estimated number of farms or farms reporting constitutes more than 75 percent of all farms in the universe, a better approximation to the sampling reliability may be obtained by multiplying the percent given in the table as follows:

1. When the number of farms or farms reporting is 75 percent of all farms, multiply the percent error by 0.50.
2. When the number of farms or farms reporting is 90 percent of all farms, multiply the percent error by 0.30.
3. When the number of farms or farms reporting is 95 percent of all farms, multiply the percent error by 0.20.

State Table 24.—INDICATED LEVEL OF SAMPLING RELIABILITY OF ESTIMATED COUNTY AND STATE TOTALS
FOR SPECIFIED ITEMS

[To determine the sampling reliability for an item, use this table to determine which of the 4 levels of sampling reliability to use in State Table 23. To use State Table 23, it is necessary to refer also to county or State table to obtain the number of farms reporting for the item.]

Item (For definitions and explanations, see text)	Total	Size-of-farm group					Tenured-farm operator group		Economic-class-of-farm group					Type-of-farm group					Livestock farms other than the poultry and general farm	
		Under 50 acres	50-99 acres	100-249 acres	250-499 acres	500-999 acres	Full owners and managers	Part owners	All tenants	Class I and II	Class III	Class IV and V	Class VI, VII, and VIII	Cash grain	Cotton	Tobacco and other field-crop	Vegetable and fruit-crop	Dairy		Poultry
Farms and farm characteristics

County Table 4.—CHARACTERISTICS OF COMMERCIAL

[Data are based on reports for only]

Item (For definitions and explanations, see text)		The State	Baker	Benton	Clackamas	Clatsop	Columbia	Coos	Crook
Farms, acreage, and value									
1 All commercial farms	number	22,802	563	453	1,640	162	362	520	221
2 Land in farms	acres	19,348,735	875,145	183,253	207,322	26,235	73,599	204,662	1,123,685
3 Average size of farm	acres	848.6	1,554.4	404.5	126.5	161.9	203.3	393.6	5,064.5
4 Value of land and buildings	average per farm, dollars	62,651	67,945	71,500	35,314	37,436	40,020	39,917	99,049
5	average per acre, dollars	80.63	77.41	339.76	174.13	139.76	234.24	101.43	29.14
6 Cropland harvested	acres	20,534	423	413	152	122	1,463	423	210
7	acres	2,949,032	91,501	63,160	61,461	4,660	14,420	10,465	48,367
Farm operators									
8 Working off their farms, total	number	9,343	165	228	798	56	168	178	87
9 100 or more days	number	4,858	83	104	413	25	131	111	42
10 With other income of family exceeding value of agricultural products sold	number	4,642	67	135	452	35	136	83	19
By tenure									
11 Full owners	number	13,430	325	258	1,158	115	253	377	133
12 Part owners	number	7,083	186	155	381	32	93	89	72
13 Managers	number	190	9	6	1	...	5	11	4
14 All tenants	number	2,999	43	34	100	15	11	43	12
Specified equipment and facilities									
15 Grain combines	farms reporting	7,811	195	269	385	11	57	1	96
16	number	9,275	208	314	420	17	68	...	104
17 Corn pickers	farms reporting	9,393	...	11	40
18	number	405	...	13	40
19 Pick-up balers	farms reporting	5,489	135	151	204	47	87	72	108
20	number	5,644	136	152	210	48	90	73	117
21 Motortrucks	farms reporting	19,652	510	382	1,218	122	281	429	197
22	number	36,705	861	741	1,726	166	424	662	480
23 Tractors other than garden	farms reporting	20,401	521	388	1,338	122	287	443	218
24	number	43,162	1,265	812	2,137	242	658	658	622
25 Automobiles	farms reporting	20,423	420	409	1,532	142	234	477	205
26	number	26,653	662	518	1,772	173	413	554	312
27 Telephone	farms reporting	19,773	416	416	1,428	142	311	429	172
28 Bone freezer	farms reporting	15,732	384	292	928	97	223	413	178
29 Milking machine	farms reporting	6,179	121	136	291	131	301	44	44
30 Electric milk cooler	farms reporting	2,680	16	87	21	...	21	68	20
Farms by kind of road on which located									
31 Hard surface	farms reporting	11,218	167	216	1,192	137	159	201	85
32 Gravel, shell, or shale	farms reporting	206	20	416	23	152	383	67	67
33 Dirt or unimproved	farms reporting	1,943	89	35	50	5	46	61	68
Farm labor, week preceding enumeration									
34 Family and or hired workers	farms reporting	20,243	508	403	1,390	152	246	505	206
35 Family workers, including operator	persons	19,771	496	397	1,369	152	279	493	197
36 Operators working 1 or more hours	persons	19,330	489	397	1,354	152	274	481	198
37 Unpaid members of operator's family working 15 or more hours	farms reporting	8,274	186	143	632	75	129	217	99
38	number	11,342	247	90	825	90	146	361	141
39 Regular hired workers (employed 150 or more days)	farms reporting	3,597	88	39	229	22	40	66	66
40	persons	7,219	163	104	462	57	84	75	161
Livestock and poultry on farms									
41 Cattle and calves	farms reporting	16,629	487	357	963	147	316	441	199
42	number	1,245,419	87,074	8,569	23,126	8,340	13,442	22,986	53,242
43 Milk cows	farms reporting	11,734	316	256	624	105	211	355	156
44	number	139,091	1,237	2,217	6,129	1,890	2,571	9,489	605
45 Horses and or mules	farms reporting	7,450	387	27	1,271	34	303	339	81
46	number	34,522	1,864	191	1,271	34	303	339	81
47 Hogs and pigs	farms reporting	5,648	184	106	389	11	95	379	989
48	number	173,999	5,029	2,210	14,766	430	4,949	737	3,561
49 Chickens, 4 months old and over	farms reporting	420,055	339	624	1,459	75	124	241	124
50	number	2,735,019	29,173	40,114	426,015	78,820	57,031	8,080	6,554
Livestock and poultry sold									
51 Cattle, not counting calves, sold alive	farms reporting	11,355	393	205	553	102	235	331	152
52	number	380,341	30,446	1,635	4,465	1,535	4,444	3,326	20,912
53 Calves sold alive	farms reporting	9,393	270	171	546	102	125	323	122
54	number	269,385	19,974	1,554	5,684	2,310	2,141	5,924	9,743
55 Hogs and pigs sold alive	farms reporting	4,057	144	83	583	40	49	21	40
56	number	245,723	5,832	4,439	29,036	605	5,029	568	6,344

(219)

Form No. 1
(10-1-59)

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 142, 221-4, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. The census report cannot be used for purposes of taxation, investigation, or regulation.

OREGON

U.S. DEPARTMENT OF COMMERCE—BUREAU OF THE CENSUS
PARSONS, KANSAS
A1 CENSUS OF AGRICULTURE QUESTIONNAIRE: 1959

A1 No. _____

Section I—PERSON NOW IN CHARGE

(If a member of the family or anyone else fills this questionnaire for the person in charge, be sure that all the information is given for the person in charge.)

1. What is your name (person in charge)?

(First name) _____ (Middle initial) _____ (Last name) _____

2. What is your mail address?

(Route or street number) _____ (Post office) _____ (State) _____

Section II—OWNERSHIP

OWNED LAND Include all land and tracts of land owned, regardless of where located even though these are considered separate units; also cropland, pastureland, woodland, and wasteland.

3. How many acres do you own? _____ None ☐

(If no land is owned, mark X in the square for "None")

LAND RENTED OR LEASED FROM OTHERS Include all land and tracts of land rented or leased by you regardless of where located. Include any separate fields, meadows, pastureland, woodland, and wasteland. Also include leased Federal, State, and railroad land. Do not include land used under a Government permit.

4. How many acres do you rent from others? _____ None ☐

(If "None," mark X and skip to question [5])

(a) What is the name and address of each landlord and the number of acres rented or worked on shares for each?

Name of landlord	Acres
Mail address (Post office and State)	
Name of landlord	Acres
Mail address (Post office and State)	
Name of landlord	Acres
Mail address (Post office and State)	

LAND MANAGED FOR OTHERS

[5] How many acres do you operate for others as a hired manager? _____ None ☐

(Enter the name and address of employer under question 4 (a))

LAND RENTED OR LEASED TO OTHERS Include any separate fields and hay land rented to others. Include land worked on shares by others. Do not include land leased to the Government under the Soil Bank.

6. How many acres do you rent to others? _____ None ☐

(If "None," mark X and skip to question [7])

(a) Of the acres rented to others, how many are owned by you? _____ None ☐ Acres _____

ACRES IN THIS PLACE:

[7] Adding acres owned and acres rented from others, then subtracting acres rented to others, we get _____ Acres in this place

(Question 3 plus question 4 minus question 6; if managed, question 5 minus question 6.)

This is all the land operated by you even though part of it may be located elsewhere or in other counties. The remaining questions of this report refer to the total acres of land reported for this question.

LOCATION OF LAND

8. Is any of this land located in another county? _____ No ☐ Yes ☐

(If "No," mark X and skip to question [9])

(a) How many acres are in your county? _____ Acres

(b) Give names of other counties and acres located in each.

Name of county	Acres	Name of county	Acres

Section III—CROPS HARVESTED THIS YEAR, 1959

Report all crops harvested or to be harvested this year from these (read answer for question 7) acres. If you rent or work land for others on shares include landlord's share.

CORN (Include the landlord's share as sold if taken from this place.)

[9] Was any corn harvested for any purpose this year? _____ No ☐ Yes ☐

(If "No," mark X and skip to question [22])

(Answer these questions, if "Yes")

	(1) How many acres were harvested?	(2) How much was or will be harvested?	(3) How much of this year's crop was or will be sold?
10. Corn for all purposes? (Do not include sweet corn or popcorn)	Acres	Bu.	Bu.
(a) Corn for grain? (20 lb. ear corn or 56 lb. shelled corn = 1 bu.)	Acres	Tons (green weight)	
(b) Corn for silage?	Acres		
(c) Corn hogged or grazed, or cut for green or dry fodder (ears not husked or snapped)?	Acres		

(The total of the acres for questions (a), (b), and (c) must equal the acres for question 10.)

SMALL GRAINS. (Include the landlord's share as sold if taken from this place.)

(Answer these questions, if "Yes")

	(1) How many acres were combined?	(2) How much was harvested?	(3) How much of this year's crop was or will be sold?
[22] Winter wheat?	Acres	Bu.	Bu.
23. Spring wheat?	Acres	Bu.	Bu.
27. Oats grown alone?	Acres	Bu.	Bu.
28. Oats cleaned out of vetch and peas?	Acres	Bu.	Bu.
29. Barley?	Acres	Bu.	Bu.
30. Rye?	Acres	Bu.	Bu.
38. Other grains? (Flaxseed, Mixed grains? (underline kind))	Acres	Bu.	Bu.

HAY AND GRASS SILAGE CROPS. (If two or more cuttings, count the acres only once but give total production of all cuttings. Include the landlord's share as sold if taken from this place.)

(Answer these questions, if "Yes")

	(1) How many acres were harvested this year?	(2) How many tons were harvested?	(3) How much of this year's crop was or will be sold?
39. Alfalfa and alfalfa mixtures for hay and for dehydrating?	Acres	Tons	Tons
42. Clover, timothy, and mixtures of clover and grasses for hay?	Acres	Tons	Tons
44. Vetch or peas, alone or mixed with oats or other grains, cut for hay?	Acres	Tons	Tons
46. Oats, wheat, barley, rye, or other small grains cut for hay? (Include oats cut when ripe or nearly ripe for feeding unthreshed.)	Acres	Tons	Tons
47. Wild hay (prairie, range, or marsh grass) cut for hay?	Acres	Tons	Tons
48. Any other hay? (Include bromegrass, Jungrass, millet, old meadows, orchardgrass, Sudangrass, whartgrass.)	Acres	Tons	Tons
49. Grass silage made from grasses, alfalfa, clover, or small grains?	Acres	Tons	Tons

ALFALFA SEED, CLOVER SEED, AND OTHER FIELD SEEDS

49. Were any alfalfa seed, clover seed, or other field seeds harvested this year? _____ No ☐ Yes ☐

(If "No," mark X and skip to question [79])

(Answer these questions, if "Yes")

	(1) Acres harvested or to be harvested?	(2) Pounds of "clean" seed harvested or to be harvested?
50. Alfalfa seed?	Acres	Pounds
51. Red clover seed?	Acres	Pounds
55. Crimson clover seed?	Acres	Pounds
56. Alsike clover seed?	Acres	Pounds
58. Red fescue seed?	Acres	Pounds
59. Tall fescue seed?	Acres	Pounds
60. Chewings fescue seed?	Acres	Pounds
64. Perennial ryegrass seed?	Acres	Pounds
65. Common ryegrass seed?	Acres	Pounds
66. Merion bluegrass seed?	Acres	Pounds
71. Bentgrass seed?	Acres	Pounds
72. Hair vetch seed?	Acres	Pounds
74. Common vetch seed?	Acres	Pounds
76. Austrian winter peas?	Acres	Pounds
78. Other field seeds? (Birdfoot trefoil, Bromegrass, Ladino clover, White clover, Meadow fescue, Sudangrass, Whartgrass, Other vetch?)	Acres	Pounds

POTATOES, DRY PEAS, SUGAR BEETS, MINT FOR OIL, AND HOPS

(Answer these questions, if "Yes")

	(1) How many acres were or will be harvested? (Report tenths of an acre for potatoes)	(2) How much was or will be harvested?
[79] Fresh potatoes for home use or for sale? (If less than 10 hundredweight or 1,000 pounds were harvested, do not report acres.)	Acres	Tons
93. Dry peas and seed peas?	Acres	Tons
94. Sugar beets for sugar?	Acres	Tons
100. Mint for oil?	Acres	Tons
101. Hops?	Acres	Tons

Section VI.—RACE, AGE, RESIDENCE, OFF-FARM WORK, AND OTHER INCOME						
		(1)	(2)	(3)	What race?	
[218] What is your race? (Mark one)		White	Negro	Other		
[219] How old were you on your last birthday? _____ Years						
[220] Do you live on this place? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
[221] When did you begin to operate this place? Report month if you began to operate this place since January 1, 1959. _____ Month _____ Year						
OFF-FARM WORK AND OTHER INCOME						
[222] How many days this year did you work off your farm? Include work at a nonfarm job, business, profession, or on someone else's farm. Include days you expect to work off your farm between now and December 31, 1959. (Do not include exchange work)						
(Mark one)		(1)	(2)	(3)	(4)	(5)
		None	1 to 49 days	50 to 99 days	100 to 199 days	200 or more days
[223] Did any other member of your family living with you have a nonfarm job, business, profession, or on someone else's farm this year? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
[224] Have you any income this year from any of the following sources: Sale of products from land rented out? Cash rent? Boarders? Social Security? Old-age assistance? Pensions? Veterans' allowances? Unemployment compensation? Interest? Dividends? Profits from nonfarm business? Financial help from members of your family? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
(If "Yes," mark X for question 222 and "No" for both questions 223 and 224, skip to question [225].)						
[225] Will the income which you and your family receive from work off the farm and from other sources (listed in questions 223 and 224) be greater than the total value of all agricultural products sold or to be sold from your place this year? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
Section VII.—FOREST PRODUCTS THIS YEAR, 1959						
[226] How much was or will be received this year from the sale of standing timber or trees? _____ None sold <input type="checkbox"/> \$ _____/00						
(Include standing timber sold for pulpwood)						
[227] How much was or will be received this year from the sale of poles and pilings, bark, bolts, and mine timbers? _____ None sold <input type="checkbox"/> \$ _____/00						
(Do not include sale of standing timber, firewood, pulpwood, fence posts, sawlogs, and Christmas trees)						
(Answer these questions, if "Yes")						
(Do not report below any products sold on the stump. Products sold on the stump should be included in question 226.)		(1)	(2)	(3)	(4)	
		How much was or will be sold in 1959?	How much was or will be sold in 1959?	Grade	Grade	
[228] Firewood and fuelwood?		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
[229] Pulpwood?		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
[230] Fence posts?		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
[231] Sawlogs and veneer logs?		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
[232] Christmas trees?		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
Section VIII.—POULTRY AND LIVESTOCK NOW ON THIS PLACE AND LIVESTOCK PRODUCTION THIS YEAR, 1959						
Include all poultry and animals on this place owned by you, by your landlord, by your employees, and by others. Include hares grazing on land used under a Government grazing permit.						
POULTRY						
[235] Are there any chickens, turkeys, or other poultry on this place? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
[237] If "No," were there any on this place any time this year? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
(If "No," mark X and skip to question [246].)						
[238] How many chickens (hens, pullets, roosters, etc.) 4 months old and over are now on this place? _____ None <input type="checkbox"/> Number _____						
[239] How many broilers were or will be sold this year? _____ None <input type="checkbox"/> Number _____						
(Report all broilers sold and those grown for others under contract.)						
[240] How many hens, roosters, pullets, cockerels, and other chickens were or will be sold this year? _____ None <input type="checkbox"/> Number _____						
[241] How many dozens of chicken eggs were or will be sold this year? _____ None <input type="checkbox"/> Dozens _____						
[242] How many turkeys and turkey fryers were raised this year? _____ None <input type="checkbox"/> Number _____						
(Include those raised from poult hatched, poult bought, and those raised for other contract.)						
[243] How many turkey hens now on hand are you keeping for breeding next year? _____ None <input type="checkbox"/> Number _____						
[244] How many ducks, geese, and other poultry (not counting chickens and turkeys) were sold this year? _____ None <input type="checkbox"/> Give _____ Name _____ Number _____						
[245] How much was or will be received this year from the sale of turkeys, ducks, geese, and miscellaneous poultry, and their eggs? _____ None sold <input type="checkbox"/> Value of sales \$ _____/00						
SHEEP AND LAMBS						
[246] How many ewes, rams, wethers, and lambs of all ages are on this place? _____ None <input type="checkbox"/> Number _____						
(If "No," mark X and skip to question [247].)						
Of this total, how many are—						
(a) Lambs under 1 year old? _____ Number _____						
(b) Ewes 1 year old and over? _____ Number _____						
(c) Rams and wethers 1 year old and over? _____ Number _____						
(The total for questions (a), (b), and (c) must equal the number for question 246.)						
HORSES AND MULES						
[247] How many horses, mules, colts, and ponies are on this place? _____ None <input type="checkbox"/> Number _____						
GOATS AND KIDS AND MOHAIR CLIPPED:						
[248] How many goats and kids of all ages are on this place? _____ None <input type="checkbox"/> Number _____						
(If "None," mark X and skip to question [249].)						
Of this total, how many are—						
(a) Angora goats and kids? _____ Number _____						
(b) Other goats and kids? _____ Number _____						
(The total for questions (a) and (b) must equal the number for question 248.)						
[249] How many goats and kids were clipped this year? _____ None <input type="checkbox"/> Number _____						
(If "None," mark X and skip to question [251].)						
[250] How many pounds of mohair and kid hair were clipped this year? _____ Pounds _____						
(Include both spring and fall clips.)						
SHEEP AND LAMBS SHORN THIS YEAR, 1959						
[251] Were any sheep or lambs shorn this year? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
(If "No," mark X and skip to question [254].)						
(Answer these questions, if "Yes")						
		(1)	(2)	(3)	(4)	
		How many were shorn?	How much wool was shorn?	Grade	Grade	
[252] Were any lambs shorn in 1959?		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
[253] Were any sheep shorn in 1959?		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
HOGS AND PIGS						
[254] How many hogs and pigs of all ages, including sows and boars, are on this place? _____ None <input type="checkbox"/> Number _____						
(If "None," mark X and skip to question [255].)						
Of this total, how many were born—						
(a) Since June 1, this year? _____ Number _____						
(b) Before June 1, this year? _____ Number _____						
(The total for questions (a) and (b) must equal the number for question 254.)						
SOWS AND GILTS Farrowing:						
[255] How many litters were farrowed since June 1, this year or will farrow before December 31, 1959? _____ None <input type="checkbox"/> Number of litters _____						
[256] How many litters were farrowed between December 1, last year, and June 1, this year? _____ None <input type="checkbox"/> Number of litters _____						
CATTLE AND CALVES (Include all cows and all other cattle and calves, both dairy and beef, on this place.)						
[257] How many cattle and calves of all ages are on this place? _____ None <input type="checkbox"/> Number _____						
(If "None," mark X and skip to question [262].)						
Of this total, how many are—						
(a) Cows? _____ Number _____						
(b) Heifers and beef calves? _____ Number _____						
(c) Bulls, bull calves, steers, and steer calves? _____ Number _____						
(The total for questions (a), (b), and (c) must equal the number for question 257.)						
COWS MILKED YESTERDAY						
[258] How many cows and heifers were milked yesterday? _____ None <input type="checkbox"/> Number _____						
[259] How many milk cows were on the place yesterday? _____ None <input type="checkbox"/> Number _____						
(Include dry milk cows and milk heifers that have calved.)						
[260] How many pounds of milk were produced yesterday? _____ None <input type="checkbox"/> Pounds _____						
These questions are to be answered by CENSUS ENUMERATOR						
(a) Does A1 number end in 3 or 7? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
(b) Are acres in question 7, 1,000 or more? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
Section IX.—DAIRY PRODUCTS SOLD AND TO BE SOLD THIS YEAR, 1959						
[262] Was any milk or cream sold this year, 1959? _____ No <input type="checkbox"/> Yes <input type="checkbox"/>						
(If "No," mark X and skip to question [265].)						
Report all sales from this place whether made by you or by others. Report dairy products sold for your landlord. Be sure to include dairy products which you will sell by December 31, this year.						
(For each item, answer these questions)						
		(1)	(2)	(3)	(4)	
		Quantity sold or to be sold in 1959?	How much was or will be the value of sales in 1959?	Grade	Grade	
[263] How much whole milk was or will be sold in 1959? _____ None <input type="checkbox"/>		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
(Report in pounds of milk gallons of milk, or pounds of butterfat.)		(a) Gallons of milk	(b) Pounds of butterfat	(c) Grade	(d) Grade	
[264] How much cream was or will be sold in 1959? _____ None <input type="checkbox"/>		<input type="checkbox"/>	<input type="checkbox"/>	_____	_____	
(If cream was sold by the gallon, multiply the number of gallons by 2½ to get pounds of butterfat.)		(a) Gallons of milk	(b) Pounds of butterfat	(c) Grade	(d) Grade	
Section X.—ANIMALS SOLD AND TO BE SOLD ALIVE THIS YEAR, 1959						
Report all sales from this place whether made by you or by others. Report all animals turned over to or sold for your landlord, and animals fed under contract for others. Be sure to report animals which you will sell by December 31, this year.						
(Answer these questions, if "Yes")						
		(1)	(2)	(3)	(4)	
		How many have been sold this year?	How many more will be sold between now and Dec. 31?	How much was or will be the value of sales in 1959?	Grade	
[265] Calves:		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
[266] Cattle not counting calves:		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
[267] Horses, mules, colts, and ponies:		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
[268] Hogs and pigs:		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
[269] Sheep and lambs:		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
[270] Goats and kids:		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

ENUMERATOR'S RECORD BOOK

A2 LISTING

A2 line number	PART I - LIST OF PLACES IN ED		PART II - AGRICULTURAL OPERATIONS								PART III - FILLING: A1		
	Name of road, etc.	A. List the head of every household living in this ED. AND ALSO B. List every person, not living in this ED, who has agricultural operations in this ED.	Does this person or any member of his household operate a farm (or ranch)?	Did this person or any member of his household have at any time this year—								Does this person live in your ED?	Does this person have agricultural operations where he lives?
				Any live stock? (hogs? cattle? horses? sheep? goats? etc.)	20 or more chickens? turkeys? ducks?	Any crops? (corn? oats? hay? tobacco? other field crops?)	20 or more fruit trees? grape-vines? nut trees?	Any vegetable gardens? berries? nursery or green-house products?

PREFACE

Volume I, Counties, is one of the five principal reports presenting the results of the 1959 Census of Agriculture. This volume, in 54 parts, presents the compilation of the information given by farm operators to census enumerators in 1959.

The 1959 Census of Agriculture was taken in conformity with the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

The collection of the data was carried out by census enumerators directed by supervisors appointed by the Director of the Bureau of the Census and working under the direction of Robert B. Voight, then Chief, Field Division. Paul R. Squires, then Special Assistant to the Director, was responsible for the recruitment of the field staff. The planning of the census and the compilation of the statistics were supervised by Ray Hurley, Chief, Agriculture Division, Warder B. Jenkins, Assistant Chief, and Orvin L. Wilhite, Assistant Chief. They were assisted by M. Vincent Lindquist, Thomas Jabine, Robert S. McCauley, John C. Maekey, Robert Standley, Hilton E. Robison, Helen E. Teir, Carl R. Nyman, Kenneth R. Norell, Gladys L. Eagle, Henry L. DeGraff, Charles H. Boehne, Joseph A. Correll, Margaret G. Wood, Evelyn K. Jett, Simon Yablon, Emma B. Gass, Charlotte J. Messinese, Bennie L. Sharp, Isaac E. Lemon, James M. Lindsey, Samuel S. Murray, William F. Kauffman, Hector Vila, Harry P. Owings, Charles A. Nicholls, Henry A. Tucker, Robert S. Boyle, Helen M. Davenport, Albert W. Graybill, Lois G. Miller, Thomas D. Monroe, Gerald P. Owens, Bernard L. Ross, Marvin M. Thompson, Helen D. Turner, Kurt W. Luethy, Arnold L. Bollenbacher, George W. Coffman, Joseph A. Horak, Samuel J. Hundley, Donald K. Larson, Chester G. Lykins, Wilmer R. Maxham, Virgil L. McClain, Jr., Darrell D. Prochaska, Robert J. Rades, Hubert E. Sites, Duane E. Traylor, Donald H. von Steen, Elmer O. Rea, Frances G. Compton, Lillian W. Bentel, and Neil V. Perkins.

Acknowledgment is made of the technical assistance and the loan of personnel by the United States Department of Agriculture in the planning, the enumeration, and the compilation of the 1959 Census of Agriculture.

November 1961

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
1	New England States:	19	West North Central—Continued	38	Mountain:
2	Maine.	20	South Dakota.	39	Montana.
3	New Hampshire.	21	Nebraska.	40	Idaho.
4	Vermont.		Kansas.	41	Wyoming.
5	Massachusetts.	22	South Atlantic:	42	Colorado.
6	Rhode Island.	23	Delaware.	43	New Mexico.
7	Connecticut.	24	Maryland.	44	Arizona.
8	Middle Atlantic States:	25	Virginia.	45	Utah.
9	New York.	26	West Virginia.		Nevada.
10	New Jersey.	27	North Carolina.		Pacific:
11	Pennsylvania.	28	South Carolina.	46	Washington.
12	East North Central:	29	Georgia.	47	Oregon.
13	Ohio.	30	Florida.	48	California.
14	Indiana.	31	East South Central:	49	Alaska.
15	Illinois.	32	Kentucky.	50	Hawaii.
16	Michigan.	33	Tennessee.		Other Areas:
17	Wisconsin.		Alabama.	51	American Samoa.
18	West North Central:		Mississippi.	52	Guam.
	Minnesota.		West South Central:	53	Puerto Rico.
	Iowa.	34	Arkansas.	54	Virgin Islands.
	Missouri.	35	Louisiana.		
	North Dakota.	36	Oklahoma.		
		37	Texas.		

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part 1.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

INTRODUCTION

THE 1959 CENSUS OF AGRICULTURE

History of the Census.—The 1959 Census is the 17th nationwide agricultural census. The first agricultural census was taken in 1840, at the same time as the Sixth Decennial Census of Population. From 1850 to 1920, an agricultural census was taken every 10 years. With increased application of scientific findings and the growing use of mechanization in agriculture, farming practices were changing so rapidly that facts collected at 10-year intervals were no longer adequate. Aware of the need for more accurate and timely information, the Congress in 1909 (36 stat. 10, sec. 31, provided for a census to be taken in 1915 and every 10 years thereafter which was to be in addition to the census of agriculture to be taken at the time of the decennial census of population. The 1915 census was not taken, however, because of the abnormal conditions created by World War I. Beginning with 1920, a national agricultural census has been taken every 5 years.

Legal Basis for the Census.—The 1959 Census of Agriculture was authorized by an Act of Congress, as were all prior censuses of agriculture. "Title 13, United States Code-Census," codified in August 1954, and amended in August 1957 and September 1960, is now the legal basis for censuses of agriculture and other censuses, and surveys conducted by the Bureau of the Census. Section 142, paragraph (a), of Title 13 makes provision for the Census of Agriculture. It reads as follows:

"The Secretary shall, beginning in the month of October 1959, and in the same month of every fifth year thereafter, take a census of agriculture, provided that the censuses directed to be taken in October 1959 and each tenth year thereafter, may, when and where deemed advisable by the Secretary, be taken instead in conjunction with the censuses provided in section 141 of this title." (Section 141 relates to the decennial censuses of population, unemployment, and housing to be taken as of the first day of April of each decennial year.) Under authority granted by Section 4 of Title 13, the Secretary of Commerce delegated "the functions and duties imposed upon him by this title" to the Director of the Bureau of the Census.

Pretest of the 1959 Census.—A "pretest" of the field procedures of the 1959 Census of Agriculture was conducted in 17 counties of the United States during the fall of 1958. The purpose of the pretest was to provide the Bureau with a measure of the effectiveness of the questions and procedures planned for the 1959 nationwide census. Three versions of the agriculture questionnaire—the first one for Northern States, the second for Southern States, and the third for Western States—were used in the pretest. Each version contained questions appropriate to the type of agriculture in the part of the country where it was used. All major aspects of field forms and procedures, from the hiring and training of crew leaders and enumerators to actual interviews with farm operators, were given a "trial run" in each of the 17 counties. Preliminary versions of reporting forms, maps, payroll records, training guides, and instruction manuals were subjected to actual use under conditions simulating those expected in the nationwide enumeration conducted in the fall of 1959.

In making final preparations for the 1959 census, the staff of the Bureau drew heavily on the results of the pretest, as well as on experience gained from previous censuses.

Training Program for Personnel for Enumeration.—Every person hired to do work in connection with the 1959 Census of Agriculture received specialized training for his job. Staff mem-

bers of the Washington and Regional Offices of the Bureau and of the U.S. Department of Agriculture trained approximately 110 agriculture field assistants and 2,100 crew leaders. The crew leaders, in turn, trained and supervised approximately 30,000 enumerators. All training was presented according to procedures contained in various guides and manuals prepared by the Bureau. The training program included filmstrips, map-reading, practice interviewing, and practice filling of questionnaires and other census forms. In most instances, training sessions were held near the areas in which employees worked and immediately prior to the beginning of their assignments.

Enumeration Period.—The actual enumeration in the continental United States (see page XIV) started at dates varying from October 7 to November 18, 1959. In general, starting dates were based upon regional variations in harvesting seasons and on weather conditions. The primary aim was to have the enumeration late enough to follow the harvesting of the bulk of important crops and early enough to precede the advent of winter weather with the attending unfavorable travel conditions. The bulk of the enumeration work was completed within three to four weeks after the starting date. In Hawaii, the enumeration was made during the months of December 1959 and January 1960; and in Alaska, during April 1960.

Enumeration starting dates for the censuses of 1959 and 1954 are given in State table 11, together with figures showing the percentage of farms enumerated in the State during weekly periods. The average enumeration date for the 1959 census for each county is given in county table 6.

Data for inventory items—land in farms, machinery and equipment, livestock, and poultry—relate to the situation at the actual time of enumeration of each individual farm. Data for acres, production, and sales of crops relate generally to the crops harvested during the crop year 1959, regardless of whether and when they were sold while data for sales of livestock and livestock products relate to the calendar year 1959. Since the enumeration was made before the end of 1959, special emphasis was placed upon the inclusion of estimates for crops yet to be sold and for livestock and livestock products expected to be sold in the period from the time of enumeration to the end of the calendar year. Instructions on the questionnaire and the wording of questions were designed to assure that full crop-year or calendar-year data would be reported. For example, "How much of this year's crop was or will be sold?"

ENUMERATION FORMS AND PROCEDURES

Authorization.—Section 5 of Title 13 of the United States Code authorizes the preparation of forms and questionnaires used in the census. It reads as follows:

"The Secretary shall prepare schedules, and shall determine the inquiries, and the number, form, and subdivisions thereof, for the statistics, surveys, and censuses provided for in this title."

The Agriculture Questionnaire.—The questionnaire for the 1959 Census of Agriculture was prepared by the staff of the Bureau. Selection of the inquiries was based on the results of the 1958 pretest and experience gained in earlier censuses. Careful consideration was given to such factors as the current availability

of data from other sources, the possibility of obtaining data by methods other than a census, the adequacy of the data that might be obtained, and the need for and usefulness of the data. Two committees gave advice and counsel to the Bureau. One of these, a Special Advisory Committee, was composed of members designated by the organizations they represented, following an invitation from the Director of the Bureau of the Census to name a representative to serve in an advisory capacity. The Special Advisory Committee for the 1959 Census of Agriculture was made up of one representative from each of the following: Agricultural Publishers Association, American Association of Land-Grant Colleges and State Universities, American Farm Bureau Federation, American Farm Economic Association, American Statistical Association, Farm Equipment Institute, National Association of Commissioners, Secretaries, and Directors of Agriculture, National Council of Farmer Cooperatives, National Farmers' Union, National Grange, Rural Sociological Society, and the U.S. Department of Agriculture. A representative of the Bureau of the Budget was in attendance at all meetings of the Advisory Committee.

Because of the special interest of the U.S. Department of Agriculture in censuses of agriculture, the Director of the Bureau of the Census sought the continuous cooperation of that organization in developing plans, questionnaires, and procedures for the 1959 Census of Agriculture. Working Groups were established in the U.S. Department of Agriculture to make recommendations for the following general subjects:

Tenure, Land Values, and Mortgage Debt
Land Use and Conservation and Production Practices
Field Crops
Fruits and Vegetables
Forest Products
Livestock, Poultry, and Dairy
Income and Expenditure (including Contractual Operations)
Farm Labor
Equipment and Facilities (including Structures)

Each Working Group had the responsibility for ascertaining the U.S. Department of Agriculture's need for data in the field covered by its "terms of reference" and for presenting recommendations to a small Joint Committee comprising representatives of both the Bureau of the Census and the U.S. Department of Agriculture. The Joint Committee received written recommendations from each Working Group. The Chairman of each Group appeared before the Joint Committee as did any member of the Working Group who was needed to present supplemental information of a specialized nature.

Prior to the formulation of the questionnaire, State Agricultural Colleges and other major users of census data were invited to suggest inquiries for the enumeration. Each member of the Special Advisory Committee had the opportunity and the responsibility for channeling in suggestions from the organization he represented. The number of inquiries submitted from all sources greatly exceeded the number that could be included in the census, from the point of view of cost, of the respondent's time and patience, and of practical value to the majority of users of data.

The final selection included 316 questions, some of which consisted of several parts, for the 48 States comprising the conterminous United States. Although each of the 316 questions was asked in one or more of the 48 States, considerably less than this total was asked in any one State because of the use of "State" questionnaires. Moreover, about 50 questions out of the total were asked of approximately one-fifth of all farm operators in the State. The number of questions ranged from 159 on the questionnaire for Maine to 194 on the questionnaire for California. In all, 38 versions of the questionnaire—one for each State or combination of adjoining States and two for Texas—

were used for the 1959 census in the conterminous United States as compared with 21 versions in 1954 and 41 in 1950. A separate version was used in Alaska and another in Hawaii.

Differences in the questionnaires were designed to account for regional and local differences in agriculture. Most, but not all, of the differences related to crops. The use of State questionnaires made possible the inclusion of separate inquiries for all important crops grown within a State and, at the same time, a reduction in the total number of inquiries for a State. Questions that did not apply, to any considerable degree, to a particular State were omitted from the questionnaire used in that State. For example, separate questions about citrus fruits were omitted from all questionnaires except for the few States where citrus fruits are grown. An added advantage of State questionnaires was that production and sales data could be asked in the unit of measure most commonly used by the farmers in each State. Regional variation in the number and type of questions is an important provision of the census for obtaining complete coverage of agricultural operations.

About 2 weeks before the start of the enumeration, agriculture questionnaires were mailed to most households in rural areas. A letter was attached to each questionnaire asking the farm operator to fill the questionnaire and to give it to the enumerator when he called. The purpose of this procedure was to save time and money in taking the census and to improve the quality of the information given by farm operators. By having the questionnaire ahead of time, the farmer could determine what information would be required and could check his records in advance of the enumerator's visit. It was, however, the responsibility of the enumerator to obtain an agriculture questionnaire for each place which qualified. If the questionnaire had been filled out by the farm operator, the enumerator was instructed to examine the questionnaire for completeness and accuracy and, if need be, to give the farmer such help as might be necessary.

Agricultural Operations.—The training of enumerators stressed the concept that a census of agriculture is a census of agricultural operations rather than a census of farms. This concept was intended to assure a complete agricultural census free of any personal judgment by enumerators as to what constitutes a farm. In accordance with clearly defined procedures, an enumerator was required to obtain an agriculture questionnaire for each person who had charge of one or more agricultural operations, whether or not he considered himself to be a farm operator. For enumeration purposes, it was considered that there were agricultural operations on a place if, at any time in 1959—

- a. Any livestock (hogs, cattle, sheep, goats, horses, or mules) were kept on the place.
- b. A combined total of 20 or more chickens, turkeys, and ducks were kept on the place.
- c. Any grain, hay, tobacco, or other field crops were grown on the place.
- d. A combined total of 20 or more fruit trees, grapevines, and nut trees were on the place.
- e. Any vegetables, berries, or nursery or greenhouse products were grown on the place for sale.

As a result of the requirement that all places having agricultural operations be enumerated, more questionnaires were obtained than are included in the tabulations for farms. During the office processing operations that followed the completion of enumeration, criteria were applied to the questionnaires to sort out for tabulation those that represented farms according to the census definition of a farm (see page XIV).

Enumeration Assignments and Enumeration Districts.—To assure a complete enumeration within the time allotted, the United States (excluding Alaska and Hawaii) was divided into 29,374 Enumeration Assignments, or EA's. Each EA comprised an

area that one enumerator could reasonably be expected to canvass within a 3- to 4-week period, as indicated by performance records from the 1954 census.

Each EA was made up of one or more Enumeration Districts, or "ED's," as the geographic unit for enumeration. Prior to the enumeration, the ED's were classified into three groups on the basis of the density of dwellings in relation to the number of farms, as indicated by the 1954 Census of Agriculture, the 1950 Census of Population and Housing, current population estimates, and highway maps showing culture which were basic to establishing the boundaries of each assignment. Through the use of different canvassing procedures for each group of ED's, the Bureau was able to reduce the cost of enumeration without running any material risk of missing any farms or other places with agricultural operations. The ED groupings and canvassing procedures are described below.

Group I Enumeration Districts.—In general, ED's with no well-defined cluster of dwellings were considered to be open-country areas and comprise Group I. For each ED of Group I, in his Enumeration Assignment, the enumerator was required to list in his Record Book the name of every head of household living in the ED and also the name of every person not living in the ED who had agricultural operations there. There were approximately 20,751 ED's in Group I for the 1959 Census.

Group II Enumeration Districts.—Rural ED's in which the number of dwellings was large in relation to the number of farms were considered to be in Group II. For each ED, in Group II, the enumerator was required to list the head of the household for all dwellings in the ED except for those on less than one acre of ground in built-up residential areas of 50 or more dwellings. He was also required to determine, by observation or local inquiry, whether there were any farms or other places with agricultural operations in the built-up areas and, if so, to obtain an agriculture questionnaire. There were approximately 7,979 ED's in Group II.

Group III Enumeration Districts.—Most incorporated places and unincorporated villages having approximately 150 or more dwellings were designated as separate ED's and are classified as Group III. Also, most ED's in counties around large metropolitan areas were designated as Group III ED's. Prior to the 1959 Census of Agriculture, places enumerated in these areas during the 1954 Census of Agriculture were listed in the Enumerator's Record Book. The enumerator was required to visit and enumerate or otherwise account for each place listed in his Record Book. In addition, he was instructed to ask at each of these places if there were any farms or other places with agricultural operations in the Enumeration District, and, if so, to add them to his list and enumerate them. There were approximately 15,836 Group III ED's in 1959. According to the 1954 Census, these ED's contained 380,575 farms.

A few enumeration districts that comprised incorporated places or that were within an incorporated city were classified as Group I or Group II because they had a large number of farms. A few others, comprising extensive rural districts requiring considerable travel, were classified as Group III because they had only a small number of farms.

Enumerator's Record Book.—Each enumerator received one or more Record Books containing a listing form for use during canvassing. (See appendix for facsimile of one page of listing form included in Enumerator's Record Book.) The lines on the listing form were numbered in consecutive order. Except as otherwise prescribed for Group II and Group III ED's, the enumerator listed in his Record Book the name of each head of household living in his assigned area and also the name of each person not living in his area who had agricultural operations there. As he made his listing, he also asked the questions about agricultural operations that were printed on the listing form. Answers to these questions determined, for the enumerator, whether or not an agriculture questionnaire was required for the person listed and, if so, whether he or some other enumerator was responsible for getting it. Thus, the Record Book served as an important aid to the enumerator in securing complete coverage of all agricultural operations within his area. At the same

time, it helped to prevent enumeration of the same place by two or more enumerators.

Enumeration Maps.—As a second aid to getting complete coverage, each enumerator received a map or, in a few exceptional cases, a brief written description of the area assigned to him for enumeration. He was required to plan and follow an orderly route of enumeration within the boundaries of his assigned area in accordance with established canvassing procedures. As the enumerator listed a place in his Record Book, he indicated its location by copying onto his map the number of the line on which he listed it. This numbering system indicated the enumerator's route of travel, and helped both the enumerator and his crew leader to determine the extent of coverage of the enumerator's assignment at any given time.

Lists of Special and Large Farms.—Prior to the enumeration, a card list of "special and large farms" was prepared on the basis of records obtained from the 1954 census and from Federal and State agricultural agencies. In general, "special and large farms" fell into one of three categories: (1) farms having unusually large acreages, livestock inventories, or annual sales as indicated by available records; (2) farms known to be specializing in such operations as broiler production, turkey growing, feed lots, nursery or greenhouse production, cranberry bogs, citrus groves, etc.; (3) farms that might easily be overlooked because they had absentee operators or were not locally thought of as farms, such as institutions, Indian reservations, grazing associations, etc.

Enumerators were given the cards for the special and large farms within their assignment areas to use as aids to obtaining complete coverage. Generally, the cards provided insurance against the omission of farming units that could have a significant effect on the totals for a given county or State. The enumerator was instructed to obtain an agriculture questionnaire for each special or large farm in his area or to write an explanation on the card as to why an agriculture questionnaire was not required on the basis of 1959 operations. The crew leader had a duplicate set of cards for use in checking enumeration coverage.

Landlord-Tenant Questionnaire.—As in several previous censuses, a special landlord-tenant questionnaire was used in some parts of the South as a supplement to the agriculture questionnaire. Its purpose was to help the enumerator get complete and accurate coverage of individually operated tracts of land that were actually part of one operating unit under the control of one landlord. To accomplish this purpose, the enumerator was required to fill a landlord-tenant questionnaire for each landlord who had any land worked on shares. The entries made in this questionnaire included the name of each sharecropper, tenant, or renter; the amount of land assigned to each; and the acreage and quantity of crops harvested on shares. By checking these entries against the agriculture questionnaires obtained for the individual operators, the enumerator and the Central Office could verify that each part of the operating unit controlled by the landlord was enumerated and that it was enumerated only once. The landlord-tenant questionnaire was used in 336 counties in the 1959 census as compared with approximately 900 counties in 1954.

Township Sketch Map.—In some areas of the Great Plains, a considerable portion of land is farmed by nonresident operators—that is, by persons who do not live on the land they operate or who live on it only during part of the year. Enumerators in these areas used a special mapping form, the Township Sketch, in addition to their enumeration maps as an aid to obtaining complete coverage. Each township included on the sketch was identified by township and range number and was divided into 144 small squares. In a standard section of 640 acres, each square represented a quarter section of land, or 160 acres. As the enumerator canvassed his assignment area, he indicated the acreage and location of each farm, ranch, and tract of nonfarm

land by drawing its boundaries on the sketch. He also used a simple numbering system as a cross reference between the agricultural land identified on the sketch and the questionnaire on which it was reported. The Township Sketch was used in all counties of North Dakota and South Dakota and in selected counties of Colorado, Kansas, Minnesota, Montana, Nebraska, New Mexico, Oklahoma, and Wyoming.

Field Review of Enumerator's Work.—In the 1959 census, greater emphasis was placed on a detailed review of enumerators' work during enumeration than had been the case in previous censuses. The objective was to detect and correct enumeration errors as early as possible in order to achieve and maintain a high quality of individual performance. Starting on the first day of enumeration and continuing throughout the enumeration period, each crew leader was instructed to make regular and frequent visits to his enumerators. At each visit, he was to follow a clearly defined procedure for observing the enumerator's conduct of interviews and for checking his listings, maps, questionnaires, and other forms for accuracy and completeness.

As an aid to checking coverage and enumerator efficiency, the crew leader was given a list containing estimates, based on the 1954 census, of the number of questionnaires required in each enumeration assignment area within his district, and of the mileage and time required to obtain those questionnaires.

SAMPLING

Use of Sampling.—In the 1959 census, as in several previous censuses, sampling was used in two ways: for enumeration and for tabulation. Sampling in enumeration consisted of the collection of information about the items included in sections IX through XV of the questionnaire for only a sample of farms. The "sample" items relate to sales of dairy products and sales of livestock, use of fertilizer and lime, farm expenditures, land-use practices, farm labor, equipment and facilities, rental agreements, farm values, and farm mortgage debt. The same sample of farms was used for tabulations by type of farm and by economic class of farm and for many of those by size of farm and by color and tenure of operator.

Description of the Sample.—The sample used for the 1959 Census of Agriculture consisted of all farms with a total area of 1,000 or more acres or with estimated sales of \$100,000 or more in 1959, and approximately 20 percent of all other farms. Farms with 1,000 or more acres were universally included in the sample during enumeration. As the enumerator filled the questionnaire, he determined the number of "acres in this place" (see question 7 of the agriculture questionnaire). If the acreage amounted to 1,000 or more he was required to fill sections IX through XV of the questionnaire. Farms with less than 1,000 acres, with estimated sales of \$100,000 or more, were included in the sample during the office processing. For these farms the information for sections IX through XV was obtained by mail.

The selection of farms of less than 1,000 acres for inclusion in the sample was made during enumeration, according to the following procedure: As the enumerator determined that he was required to obtain a questionnaire, he assigned a number to it, whether or not he was able to obtain the questionnaire on his first visit. He assigned numbers in consecutive order, beginning with "1" for the first questionnaire required in each enumeration district within his area. He was instructed to fill sections IX through XV on all questionnaires for which the assigned number ended in "2" or "7" (i.e. 2, 7, 12, 17, 22, etc.).

Adjustment of the Sample.—An adjustment in the part of the sample that was comprised of farms of less than 1,000 acres and with estimated sales of less than \$100,000 was made by a process essentially equivalent to stratifying the farms in the sample by

size of farm. The purpose of this adjustment was to improve the reliability of the estimates based on the sample and to reduce the effects of possible biases introduced by enumerators who deviated from the prescribed procedure for selecting the sample farms. The adjustment procedure was carried out for "blocks" of counties, each consisting of from one to ten counties in a State. To adjust the sample, separate counts were made for each county, and for the block of counties of all farms and of farms in the sample for each of 10 size-of-farm groups based on the "acres in this place" (question 7). The 10 size-of-farm groups were as follows: under 10 acres, 10 to 49 acres, 50 to 99 acres, 70 to 99 acres, 100 to 139 acres, 140 to 179 acres, 180 to 219 acres, 220 to 259 acres, 260 to 499 acres, and 500 to 999 acres. Farms of less than 1,000 acres, but with value of sales of \$100,000 or more, were excluded from these counts. For each size-of-farm group, the number of farms in the sample for the block of counties was adjusted to make it equal or approximately equal to the total number of farms divided by five. This was accomplished for each group by the elimination or duplication on a random basis, of farms in those counties where the difference between the actual proportion in the sample and the expected 20 percent was in the same direction as the difference for the block of counties.

Estimation of Totals for the Sample.—For the items included in the sample part of the questionnaire (sections IX through XV), estimated totals for all farms were derived from the tabulated totals for the farms in the adjusted sample. First, item-by-item totals, as tabulated for that part of the sample comprising farms of less than 1,000 acres and with estimated sales of less than \$100,000, were multiplied by 5. These estimated item-by-item totals were then added to the corresponding item totals, as tabulated, for all farms of 1,000 acres and over and farms with estimated sales of \$100,000 and over. The resulting values represent the estimated totals for all farms.

Presentation of Sample Data.—In tables where a small amount of data based on the sample farms is presented together with data for all farms, the data based on the sample are printed in italics. Other tables contain headnotes explaining that most of the data are estimates based on reports for only a sample of farms.

Reliability of Estimates.—The estimated totals for all farms of the items enumerated for only the sample farms are subject to sampling errors. The estimated totals obtained by making tabulations for only the farms included in the sample are also subject to sampling errors. State tables 23 and 24 contain approximate measures of the sampling reliability of the estimates for numbers of farms reporting and for item totals. While these measures indicate the general level of sampling reliability of the estimates, they do not completely reflect errors arising from sources other than sampling; for example, errors in the original data reported by farmers. Errors arising from sources other than sampling may, in some instances, be relatively more important than sampling variation, especially for county totals.

The general level of sampling reliability of estimated totals may be determined from the data in State tables 23 and 24. State table 24 contains a list of items, together with a figure for each item indicating one of the four levels of sampling reliability that are presented in State table 23. For each item the sampling error according to the number of farms reporting may be determined from State table 23, in the column for the level of sampling reliability designated in State table 24. To determine the sampling reliability for any item, reference must be made to State table 24 to find out which of the four levels of sampling reliability given in State table 23 should be used, and also the appropriate county or State table to obtain the number of farms reporting the item.

As explained in State table 23, the level of sampling reliability designated as level 1 should always be used to determine the sampling reliability of estimated numbers of farms or of farms reporting.

State table 23 shows percentage limits such that chances are about 68 out of 100 that the difference between an estimate based on the sample and the figure that would have been obtained from a tabulation of all farms would be no more than the percentage specified for the estimated number of farms reporting that item. The chances are about 99 out of 100 that the difference would be less than $2\frac{1}{2}$ times the percentage specified.

As indicated by the percentages in State table 23, the smaller the number of farms reporting a given item, the larger the relative sampling error in the estimated total for that item. Even so, considerable detail is presented for each item, by several classifications of farms, in order to permit the appraisal of estimates for various combinations of items not shown in this report. Percentages and averages that may be derived from the tables will generally have greater relative reliability than the corresponding estimated totals. However, significant patterns of relationships may be observed in the estimated totals even though the individual data are subject to relatively large sampling errors.

The data representing estimates based on a sample of farms for the 1954 census were obtained in essentially the same way as in 1959. Therefore, State tables 23 and 24 may also be used to determine the sampling errors for the 1954 data.

Differences in Data Resulting From Differences in Tabulating Procedures.—Many of the figures in the detailed State tables represent estimates obtained by tabulating only the sample farms. The totals for these detailed distributions will generally differ somewhat from totals presented in other tables obtained from different distributions which were tabulated on a 100 percent basis. Moreover, although most of the figures presented by counties were obtained from tabulations of all farms, the data in county table 4 for commercial farms, and all of the data in the county tables on dairy products and livestock sold, fertilizer and lime, farm expenditures, land-use practices, farm labor, facilities and equipment, and value of land and buildings were estimated for each county on the basis of data tabulated for the farms in the sample. The State totals in the county tables for these items, though based also on the sample, were obtained in a different series of tabulating runs, and so may differ slightly from totals presented in some State tables. For reasons of economy the sample distributions were not adjusted to the 100 percent totals even when such totals were available, nor were slight discrepancies resulting from different runs of the sample data always reconciled unless the differences were large enough to affect the usefulness or reliability of the data.

PROCESSING OPERATIONS

Completion of Enumeration.—As an enumerator completed his assignment, he turned the portfolio containing questionnaires and other census materials over to his crew leader. After making a final review of the enumerator's work, the crew leader mailed the portfolio to the Agriculture Processing Office at Parsons, Kansas. There, each enumerator portfolio was thoroughly checked for completeness of all required forms and for correct application of the sampling procedure.

Editing of Questionnaires.—Each agriculture questionnaire was individually edited and coded before the information was transferred to punch cards and tabulated. As the first major step in the editing process, questionnaires that did not represent farms according to the census definition were withdrawn from fur-

ther processing. (See p. XIV.) As the second major step, the remaining questionnaires were examined for errors, omissions, and inconsistencies. Among the specific items subjected to consistency checks were the following:

- a. Total acreage compared with its distribution by use.
- b. Acreage of individual crops harvested compared with total cropland harvested.
- c. Irrigated acreage compared with total acres in the farm.
- d. Total acreage of individual crops for all purposes compared with the acreage harvested for specific purposes.
- e. Quantity of crops harvested in relation to acreage harvested.
- f. Sales in relation to production and, for livestock, to inventories.
- g. Total livestock compared with the inventory by age and sex.
- h. Expenditures compared with production and inventories.

Obvious errors in calculations or in units of measure, and misplaced entries were corrected as they were found. Entries not clearly legible were rewritten. Many omissions or inconsistencies were disregarded during editing. Those of significant magnitude could be and were handled more efficiently and economically during mechanical processing operations. Questionnaires containing major inconsistencies and omissions were referred to members of the technical staff for review. Depending on the magnitude of the data involved, the technical staff corrected (or supervised the correction of) the questionnaires either on the basis of information reported for other farms of similar type in the area or on the basis of additional information received in response to letters directed to the farm operators.

Coding of Questionnaires.—Most of the numerical information on a questionnaire was self-coding in that the inquiry number was utilized for the item identification on punch cards or on tabulations runs. However, some manual coding was also necessary for such items as irrigated crops for selected States, crops infrequently reported, miscellaneous poultry, etc. Code numbers were entered on questionnaires to classify farms and, in some cases, to identify data for individual items. All farms were coded by size of farm in terms of total acreage, by race, and by tenure of operator. Farms in the 17 Western States, Louisiana, and Hawaii were also coded on the basis of irrigated cropland and irrigated pasture. Additional codes were applied to all farms included in the sample to classify them by type of farm and by total value of agricultural products sold. Individual items were coded only where reports were received for crops or poultry not covered by separate inquiries on the questionnaire. This coding was necessary to assure inclusion of the data in the appropriate farm product totals.

Tabulation of Data.—After the questionnaires were edited and coded, the information on them was punched on cards. The cards were then mechanically sorted and fed into machines which transferred the data to tabulation sheets. One of the initial and primary steps in the machine handling of the punch cards was to separate and list those cards which lacked necessary information, those which contained inconsistent or impossible data, and those on which the data were possible but of such magnitude that a further review of the individual questionnaires was warranted. The listing sheets were examined and, as necessary, the cards were corrected. When the cards for a particular county were considered satisfactory, the data were tabulated.

Subject-matter specialists of the Bureau and the U.S. Department of Agriculture examined all tabulations for reasonableness and consistency. As necessary, they made corrections on the basis of a further review and reappraisal of the original reports and verification of the editing, coding, and punching.

PRESENTATION OF STATISTICS

Statistical Content of This Report.—This report is part of Volume I of the 1959 Census of Agriculture. Volume I consists of 54 parts, each part containing information about agriculture for a single State, Commonwealth, or Possession. Each part contains county data for that particular State or area. The term "county," as used in this report embraces election districts in Alaska, parishes in Louisiana, municipalities (municipalities) in Puerto Rico, etc. The statistics for 1959 were obtained from the Census of Agriculture taken in the "conterminous United States" (see following paragraph), Hawaii, and Puerto Rico during the period October 1959 to January 1960 and in Alaska, American Samoa, Guam, and Virgin Islands as of April 1, 1960. Comparative data for years prior to 1959 were obtained from earlier censuses.

In the planning of the publications for the 1960 Censuses of Population and Housing and the 1959 Census of Agriculture, the term "conterminous United States," recommended by the Board of Geographic Names to designate the 48-State area as it existed before Alaska and Hawaii became States, was adopted by the Bureau of the Census.

The definitions and explanations in this introduction for volume I generally have application broad enough to include the States of Alaska and Hawaii, and the Commonwealth of Puerto Rico and the Island possessions. However, specific application in many instances may be limited to the conterminous United States; for example, references to earlier censuses, to the sampling methods and procedures, to specific sections or questions on the questionnaires, and to specific table numbers.

For each part of volume I (one part for each State or area), a facsimile of the appropriate questionnaire is reproduced in the appendix.

The statistics for States and counties are presented according to the same general plan as was followed in the volume I reports for the 1954 and the 1950 censuses. State and county totals are given for nearly all items for which information was obtained in the 1959 census. However, most of the data by economic class of farm, type of farm, and color and tenure of farm operator are given only for States.

Comparative data for the States are given for each census year beginning with 1920. Comparative data for counties are given for the years 1959 and 1954. For some items, the data obtained from the 1959 census are the only ones available. For comparative purposes 1950 data are carried in county table 6 for the kind of road on which farms were located.

Comparability of Data.—The data obtained from the various censuses of agriculture are not strictly comparable for all items. For example, differences from one census to another in the time of enumeration, the wording of the questions, and the definition of a farm cause some lack of comparability. Differences considered to have a significant effect on the comparability of data are described in the text and/or mentioned in footnotes to the tables.

Minor Civil Divisions.—As in prior censuses, data for most of the items included in the 1959 Census of Agriculture were tabulated for minor civil divisions. The term "minor civil division" applies to the primary subdivision of a county into smaller geographic areas such as townships, precincts, districts, wards, beats, municipalities, etc. Figures for these smaller geographic areas are not included in any of the published reports, but they may be supplied upon request and payment of the costs of compiling and checking the data.

Prior to the 1954 Census, an enumeration assignment did not include more than one minor civil division, even in cases where the township, precinct, etc., did not have enough farms to provide a full workload for an enumerator. In 1954, and again in 1959,

the aim was to make enumeration assignments large enough to keep each enumerator fully occupied in his area for a 3- to 4-week period. Hence, in some areas, two or more adjoining minor civil divisions were combined into one enumeration assignment. An enumeration assignment never comprised the whole of one minor civil division and a part of another, nor a part of two or more minor civil divisions. A minor civil division that included too many farms for one enumerator to cover during the enumeration period was divided into two or more enumeration assignments.

In some cases, the minor civil division tabulations provide totals for a single minor civil division, even when such totals required a grouping of enumeration assignments. In other cases, the minor civil division tabulations provide totals for a combination of two or more adjoining minor civil divisions. The data for each individual minor civil division included in such totals can be tabulated separately, however, since each questionnaire obtained in the census contains the designation of the minor civil division in which the farm headquarters was located. An additional charge must be made for a separate tabulation of any small area included in a total for two or more combined minor civil divisions.

Requests for census information for minor civil divisions should be directed to the Agriculture Division, Bureau of the Census, Washington 25, D.C.

DEFINITIONS AND EXPLANATIONS

Descriptive Summary and References.—The definitions and explanations that follow relate only to those items that are considered to be inadequately described in the tables where they appear. Although the descriptive terms and explanations refer specifically to the 1959 Census of Agriculture, many of them also apply to earlier censuses. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and of the instructions included on the questionnaire, see the facsimile of the 1959 Agriculture Questionnaire in the appendix of this report.

An analysis of the questions asked in the 1959 census, and of the data obtained, is given in Volume II, General Report, Statistics by Subjects, United States Census of Agriculture, 1959. The general report presents statistics for States by subject matter.

GENERAL FARM INFORMATION

Census Definition of a Farm.—For the 1959 Census of Agriculture, the definition of a farm was based primarily on a combination of "acres in the place" and the estimated value of agricultural products sold.

The word "place" was defined to include all land on which agricultural operations were conducted at any time in 1959 under the control or supervision of one person or partnership. (For definition of "agricultural operations," see p. X.) Control may have been exercised through ownership or management, or through a lease, rental, or cropping arrangement.

Places of less than 10 acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least \$250. Places of 10 or more acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least \$50. Places having less than the \$50 or \$250 minimum estimated sales in 1959 were also counted as farms if they could normally be expected to produce agricultural products in sufficient quantity to meet the requirements of the definition. This additional qualification resulted in the inclusion as farms of some places engaged in farming operations for the first time in 1959 and places affected by crop failure or other unusual conditions.

To avoid biases arising from an enumerator's personal judgment and opinion, the Bureau did not give enumerators the defini-

tion of a farm. Instead, enumerators were instructed to obtain questionnaires for all places considered farms by their operators and for all other places that had one or more agricultural operations. (See "Agricultural Operations", p. X.) In 1954, enumerators were instructed to fill questionnaires on the same basis as in 1950. In 1950, agricultural operations were defined to include every place of 3 or more acres, whether or not the operator considered it a farm, and every place having "specialized operations", regardless of the acreage. "Specialized operations" referred to nurseries and greenhouses and to places having 100 or more poultry, production of 300 or more dozen eggs in 1949, or 3 or more hives of bees. In all of the three last censuses, as a result, questionnaires were filled for a considerable number of places that did not qualify as farms. The determination as to which questionnaires represented farms was made during office processing operations and only those questionnaires meeting the criteria for a farm were included in the tabulations.

For both the 1950 and 1954 Censuses of Agriculture, places of 3 or more acres were counted as farms if the annual value of agricultural products, whether for home use or for sale but exclusive of home-garden products, amounted to \$150 or more. Places of less than 3 acres were counted as farms only if the annual sales of agricultural products amounted to \$150 or more. A few places with very low agricultural production because of unusual circumstances, such as crop failure, were also counted as farms if they normally could have been expected to meet the minimum value or sales criteria.

In the censuses from 1925 to 1945, enumerators were given a definition of "farm" and were instructed to obtain reports only for those places which met the criteria. According to this definition, farms included all places of 3 or more acres, regardless of the quantity or value of agricultural production, and places of less than 3 acres if the value of agricultural products, whether for home use or for sale, amounted to \$250 or more. Because of changes in price level, the \$250 minimum resulted in the inclusion of varying numbers of farms of less than 3 acres in the several censuses taken during this period. Generally, the only reports excluded from tabulation were those taken in error and those showing very limited agricultural production, such as only a small home garden, a few fruit trees, a small flock of chickens, etc. In 1945, reports for places of 3 acres or more were tabulated only if at least 3 acres were in cropland and/or pasture or if the value of products in 1944 amounted to at least \$150.

The decrease in the number of farms in 1950 and 1954, as compared with earlier censuses, was partly due to the change in farm definition, especially with respect to farms of 3 or more acres in size. Some of the places of 3 or more acres that were not counted as farms in 1950 and 1954 because the value of their agricultural production was less than \$150 would have qualified as farms if the criteria had been the same as in earlier censuses.

For 1959, the decrease in the number of farms as compared with all prior censuses resulted partly from the change in farm definition. The fact that sales of agricultural products in 1959 was used resulted in the exclusion of some places that would have qualified as farms had the value of agricultural products alone been considered. The increase in the acreage minimum also had an effect. The reduction in the number of farms due to change in definition, 1954 to 1959, is shown for each county in county table 1. Some characteristics of the places not counted as farms in 1959, but which would have been included in 1954, are shown in State table 10.

The change in farm definition made in 1950 and again in 1959 had no appreciable effect on the totals for livestock or crops because the places affected by the change ordinarily accounted for less than 1 percent of the totals for a given county or State.

For the States that comprise the conterminous United States, two figures are published for each county on the number of farms

in 1959. One is an actual count of all farms and the other is an estimate based on the number of farms included in the sample. For almost every county there is a difference between the actual number of farms and the estimated number of farms. Because of sampling procedure and sampling variability, the number of farms in the sample seldom agrees exactly with the actual number of farms. For most counties, the actual number of farms in the sample was either more or less than precisely 20 percent of all farms. Similarly, totals estimated on the basis of data for the sample farms may be slightly more or slightly less than the actual totals that would have been obtained had the data been tabulated for all farms. Therefore, the estimated number of farms reporting certain items may, in some instances, be greater than the total number of farms shown in county table 1. However, the estimated number of farms is given in county tables 5 and 6 so that estimates based on the sample farms may be related to the estimated rather than the actual number of farms.

Farm Operator.—The term "farm operator" is used to designate a person who operates a farm, either doing the work himself or directly supervising the work. He may be the owner, a member of the owner's household, a hired manager, or a tenant, renter, or sharecropper. If he rents land to others or has land worked on shares by others, he is considered as operator only of the land which he retains for his own operation. In the case of a partnership, only one partner is counted as an operator. The number of farm operators is considered to be the same as the number of farms.

Farms Reporting or Operators Reporting.—Figures for farms reporting or operators reporting, based on a tabulation of all farms, represent the number of farms, or operators, for which the specified item was reported. For example, if there were 1,922 farms in a county and only 1,465 had chickens 4 months old and over on hand at the time of enumeration, the number of farms reporting chickens would be shown as 1,465. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for all farms.

Where applicable, figures may be given for the number of farms or operators not reporting items that were intended to be obtained for all farms; for example, residence of farm operator, State table 4. The number not reporting, as compared with the total number of farms or operators, indicates the extent of incompleteness of the reporting of the data for the item.

Land Area.—The approximate total land area of States and counties as reported for 1959 is, in general, the same as that reported for all censuses beginning with 1940. Such differences as are shown reflect political changes in boundaries or actual changes in land area caused by changes in the number or size of reservoirs, lakes, streams, etc. For Alaska, the areas for election districts represent the gross area of land and water.

Land in Farms.—Except for managed farms, the land to be included in each farm was determined from the answers to questions about the number of acres owned, the number of acres rented from others or worked on shares for others, and the number of acres rented to others or worked on shares by others. The acres owned and the acres rented from others or worked on shares for others were first added together and then the acres rented to others or worked on shares by others were subtracted. The result represented the number of acres in the farm. The number of acres in a managed farm was the difference between the total land managed and that part of the managed land that was rented to others or worked on shares by others.

In the 1959, 1954, and 1950 censuses, enumerators were instructed to record total figures for land owned, land rented from others, and land managed for others, including any part of the land that was rented to others. In censuses prior to 1950, enu-

merators were instructed to exclude all land rented to others and to record only that portion of the acreage owned, rented from others, or managed for others that was retained by the farm operator. Thus, the figures for the individual tenures of land are not entirely comparable for all censuses. However, the land included in each farm was determined on essentially the same basis for all censuses.

The acreage designated in the tables as "land in farms" consists primarily of "agricultural" land—that is, land used for crops and pasture or grazing. It also includes considerable areas of land not actually under cultivation nor used for pasture or grazing. For example, the entire acreage of woodland and wasteland owned or rented by farm operators is included as land in farms, unless it was being held for nonagricultural purposes or unless the acreage was unusually large. For 1959 and 1954, if a place had 1,000 or more acres of woodland not pastured and wasteland, and if less than 10 percent of the total acreage in the place was used for agricultural purposes, the acreage of woodland not pastured and wasteland was reduced to equal the acreage used for agriculture. The procedure used in 1950 for excluding unusually large acreages of woodland not pastured and wasteland differed slightly from the one used in 1959 and 1954. In 1950, adjustments were made in places of 1,000 or more acres (5,000 or more in the 17 Western States), if less than 10 percent of the total acreage was used for agricultural purposes.

Except for open range and grazing land used under government permit, all grazing land was to be included as land in farms provided the place of which it was a part was a farm. Grazing land operated by Grazing Associations was to be reported in the name of the person chiefly responsible for conducting the business of the Association. Land used rent free was to be reported as land rented from others. All land in Indian reservations that was used for growing crops or grazing livestock was to be included. Land in Indian reservations that was not reported by individual Indians and that was not rented to non-Indians was to be reported in the name of the cooperative group that used the land. In some instances, an entire Indian reservation was reported as one farm.

Land owned.—All land that the operator and/or his wife held under title, purchase contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration is considered as owned.

Land Rented from Others.—This item includes not only land that the operator rented or leased from others but also land he worked on shares for others and land he occupied rent free. Grazing land used under government permit or license is not included.

Land Rented to Others.—This item includes all land rented or leased to others, except land leased to the government under the Soil Bank, and all land worked by others on shares or on a rent-free basis. For the most part, the land rented to others represents agricultural land but it also includes land rented for residential or other purposes. The tenant or sharecropper is considered as the operator of land leased, rented, or worked on shares even though his landlord may supervise his operations. The landlord is considered as operator of only that portion of the land not assigned to tenants or croppers.

Land Managed.—This item includes all tracts of land managed for one or more employers by a person hired on a salary basis. A hired manager was considered to be the operator of the land he managed since he was responsible for the agricultural operations on that land and frequently supervised others in performing those operations. Managed land was always to be reported on a separate questionnaire whether or not the manager also operated a farm on his own account.

Land in Two or More Counties.—An individual farm was always enumerated in only one county, even in cases where the land was located in two or more counties. If the farm operator lived on the farm, the farm was enumerated in the county where he lived. If he did not live on the farm, the figures for the farm were tabulated for the county where the farm headquarters was located. In cases where there was any question as to the location of the headquarters, figures for the farm were tabulated for the county where most of the land was located.

Land in Farms According to Use.—Land in farms has been distributed according to the way in which it was used in 1959. The land uses described in the following paragraphs are mutually exclusive; that is, each acre of land is included only once even though it may have had more than one use during the year.

Cropland Harvested.—This category refers to all land from which any crops were harvested in 1959, whether for home use or for sale. It includes land from which hay (including wild hay) was cut and land in berries and other small fruits, orchards, vineyards, nurseries, and greenhouses. Matured crops hogged off or grazed were considered to have been "crops harvested" and were reported here. Land from which two or more crops were harvested in 1959 was to be counted only once in the land-use classification. Land used for other purposes either before or after the crops were harvested was to be reported as cropland harvested, without regard to the other uses.

The enumerator was instructed to check the figure for cropland harvested for each farm by adding the acreages of the individual crops and subtracting the acreages from which two or more crops were harvested. This checking procedure was repeated during the office processing of questionnaires for all farms having 100 or more acres of cropland harvested.

Cropland used only for Pasture.—This land-use classification includes rotation pasture and all other land used only for pasture or grazing that the operator considered could have been used for crops without additional improvement. Enumerators were instructed to include land planted to crops that were hogged off, pastured, or grazed before maturity but to exclude land pastured before or after hay or other crops were harvested from it. Permanent open pasture may have been reported either for this item or for "other pasture" depending on whether or not the operator considered it as cropland.

The figures for 1945 and earlier censuses are not entirely comparable with those for the last three censuses. For 1945, the figures include only cropland used solely for pasture in 1944 that had been plowed within the preceding seven years. The figures for 1940, 1935, and 1925 are more nearly comparable with those for 1959, 1954, and 1950, however, because they include land pastured that could have been plowed and used for crops without additional clearing, draining, or irrigating.

Cropland not Harvested and not Pastured.—This classification represents a total of three subclasses for the 17 Western States and two subclasses for other States.

Cultivated Summer Fallow.—This subclass of land is shown only for the 17 Western States. It refers to cropland that was plowed and cultivated but left unseeded for the 1959 harvest in order to control weeds and conserve moisture.

Soil Improvement Grasses and Legumes.—For the 1959 census, land used only for cover crops to control erosion or to be plowed under for green manure is tabulated separately from "other cropland". After the establishment of the Soil Bank, land that would normally have been used for other purposes was frequently planted to soil-improvement crops. In counties where large acreages were placed in the Soil Bank, the total of land used for soil-improvement crops plus "other cropland" may be considerably larger than the "other cropland" shown for previous censuses.

Other Cropland.—This subclass includes idle cropland, land in crops intended for harvest after 1959, and cropland not harvested because of complete crop failure, low prices, labor shortage, or other reasons. The 1959 figures for "other cropland" are not entirely comparable with those for previous censuses since they do not include land used only for soil-improvement crops. (See preceding paragraph.)

Woodland Pastured.—This classification includes all woodland where livestock were pastured or grazed in 1959. The instruction on the questionnaire—"Include as woodland all wood lots and timber tracts; cutover and deforested land which has value for wood products and has not been improved for pasture"—represents a somewhat more precise definition than the corresponding instruction contained on the 1954 questionnaire. No definition of woodland was given in 1950 apart from an instruction to enumerators not to include brush pasture as woodland. Some of the changes in woodland acreages from one census to another may merely represent differences in interpretation as to what constitutes "woodland."

Woodland not Pastured.—This classification refers to all woodland not used for pasture or grazing in 1959, including land in operated farms that was placed in the Soil Bank and planted to trees. Unusually large tracts of timberland that were reported as woodland not pastured were excluded from

the tabulation of land in farms when it was evident that such land was held primarily for nonagricultural purposes.

Other Pasture.—This classification refers to all land other than woodland and cropland that was used only for pasture or grazing in 1959. It includes noncrop open or brush pasture and cutover or deforested land that has been improved and used for pasture. The figures for the last three censuses are comparable but those for 1915 include all nonwoodland pasture that had not been plowed during the preceding seven years. For the 1940 census and earlier years, the figures are more nearly comparable with those for the last three censuses. However, the classification may be somewhat less inclusive because land that could have been plowed and used for crops without additional clearing, draining, or irrigating was classified as plowable pasture and included with "cropland used only for pasture".

Improved Pasture.—This subclass refers to that portion of "other pasture" on which one or more of the following practices had been used: liming, fertilizing, seeding, irrigating, draining, or the clearing of weed or brush growth. The figures are comparable with those for 1954, when the question on improved pasture was asked for the first time.

Other Land.—This classification refers to all land not included in the preceding land-use classifications, such as house lots, barn lots, lanes, roads, ditches, land area of ponds, and wasteland. This figure for 1959 was obtained from the machine tabulations by subtracting the total of all other uses from the total land in all farms reported for a given county or classification. Hence, there is no figure given to represent the farms reporting this item.

Value of Land and Buildings.—Only average values of land and buildings per farm and per acre are presented in this report. They are estimates based on data obtained for sample farms. Estimates of the total value of land and buildings by States, geographic divisions, and the United States, are presented in volume II.

The enumerator was instructed to record the market value of the land and the buildings on that land. Market value was defined as the price which the farm operator would expect to receive for the land and buildings if he were to sell them on the day of enumeration.

More problems and difficulties arise in the enumeration of farm-real-estate values than in the enumeration of most other agricultural items. Most of the items enumerated require the respondent to make a statement of fact. For example, information about the number and value of farm animals sold alive during the year is based on actual transactions. Similarly, information about livestock inventories relates to the situation existing on a specific place at a specific time. Reports concerning the value of land and buildings, however, are estimates based almost entirely on opinion. The majority of farms have not changed hands for many years and are not currently for sale. For such farms, the operators are not likely to have any clear basis for estimating the value. To make an intelligent and objective estimate, a respondent first needs to make an estimate of the prevailing average market value of farms in his community. Then, he must either add to or subtract from that estimate to allow for the different characteristics of his own farm. In many cases, an operator who would not sell his farm under any circumstances may report an unreasonably high market value. In other cases, a farm operator who acquired his real estate during a period of relatively low prices may estimate an unrealistically low value by current standards. Because of the extent of variation that is known to exist in real estate values, it is difficult to devise checking procedures that will identify inaccurate estimates.

Age of Operator.—Farm operators were classified by age into six age groups. The average age of farm operators was derived from the sum of the ages of all farm operators reporting age divided by the number reporting. The number of farm operators 65 or more years of age is an actual count based on the operators reporting age.

Residence of Operator.—Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated themselves lived on farms operated by others. In cases where all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated provided the dwelling he occupied was included in the rental agreement. The dwelling, in such cases, was not necessarily on the land being operated. Similarly, a farm operator who did not live on the land being cultivated or grazed but who had some agricultural operations (other than a home garden) at his dwelling was considered as living on the farm operated.

Since some farm operators live on their farms only during a part of the year, comparability of the figures for various censuses may be affected by the date of enumeration.

In a few cases, the enumerator failed to report the residence of the farm operator. Differences between the total number of farms and the number of farm operators classified by residence indicate the extent of under-reporting.

Year Began Operating Present Farm.—Enumerators were instructed to report the year during which a farm operator began to operate his present farm and, if the year was 1958 or later, also to report the month. The year was intended to refer to the first year of the period during which the operator had been in continuous charge of his present farm or of any part of it. The time of year that farmers move is indicated by the month they began operating their farms, as shown by a monthly breakdown of the reports for farmers who began operating their present farms during 1958 and 1959.

Off-Farm Work and Other Income.—To obtain a measure of the extent to which farm operators rely on nonfarm sources for part of their income, four questions were asked of all farm operators. The first question asked for the number of days the operator worked off his farm in 1959. The other three questions, to be answered "Yes" or "No," asked (1) whether other members of the operator's household did any work off the farm; (2) whether any income was received from sources other than the sale of agricultural products from the farm operated; and (3) whether the combined income of all members of the household from off-farm work and other sources was greater than the total value of agricultural products sold from the farm operated.

Off-farm work was defined to include work on someone else's farm for pay as well as all types of nonfarm jobs, businesses, and professions, whether the work was done on the farm premises or elsewhere. Exchange work was not included.

The questions asked in the 1959 Census are closely comparable with those asked in 1954. The data for 1959 are actual totals of all operators reporting off-farm work and other income whereas those for 1954 are estimated totals based on the sample.

Equipment and Facilities.—In 1959 as in several earlier censuses, data about specified equipment and facilities were obtained for only a sample of farms. Farm operators were asked to report equipment and facilities that were on the farm at the time of enumeration, regardless of ownership. They were to include items that were temporarily out of order but not any that were worn out.

Data in terms of actual number were obtained for the following items of farm equipment in 1959: (1) grain combines, (2) corn pickers, (3) pick-up balers, (4) field forage harvesters, (5) motortrucks, (6) wheel tractors, (7) garden tractors, (8) crawler tractors, and (9) automobiles. Definitions given enumerators included the following specifications, among others: Corn pickers related to all types of machines used for picking corn, whether used in separate or in combined picking-shelling operations. Pick-up balers were to include both hand-tie and automatic balers but not stationary ones. Motortrucks were to include pick-up trucks and truck-trailer combinations; Jeeps and station wagons

were also to be included if they were used primarily as trucks, but school buses were specifically excluded. Wheel tractors specifically excluded garden tractors, implements with built-in power units, such as self-propelled combines or powered back rakes, and the power unit of a truck-trailer combination. Automobiles were to include jeeps and station wagons if they were used primarily as passenger cars.

Questions to be answered "Yes" or "No" provided information as to the presence or absence of the following items: (1) telephone, (2) home freezer, (3) milking machine, (4) electric milk cooler, (5) bulk-type milk cooler (in six States only—Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin), (6) crop drier and (7) power-operated elevator, conveyor, or blower.

Comparable data from one census to another are not available for all items. The questions asked about equipment during a given census reflect changes in farm mechanization and in the facilities available to farm families. Questions about some items of equipment were asked in 1959 for the first time (electric milk cooler, crop drier, bulk-type milk cooler, etc.). Similarly, some questions that were asked in earlier censuses were omitted in 1959. For example, the use of electricity is now so widespread that there is no longer any need for obtaining a count of the farms having it.

Farms by Kind of Road.—The classification of farms by the kind of road on which they are located is based on only a sample of farms. The enumerator was instructed to report, on the basis of his own observation, the kind of road on which the most frequently used entrance to the farm was located. For farms consisting of two or more tracts, he was to limit his report to the tract on which the farm operator had his dwelling or other headquarters.

Farm Labor.—The questions about farm labor were asked only for the sample farms and related to persons working during the calendar week preceding the week of enumeration. Since the enumeration starting dates varied by geographic areas, and the enumeration within each area lasted over a period of several weeks, the calendar weeks to which the data apply also vary. Thus, the data for an individual farm may relate to any one week during the months of October, November, or December, or even, in a few instances, to weeks during September 1959 or January 1960.

Farm labor was defined to include any work, chores, or planning necessary to the agricultural operations of the farm; and to exclude housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons employed specifically for such work. The farm labor information contained in this report represents estimates based on answers to questions relating to the farm work or chores done during the week by (1) operator, (2) unpaid members of the operator's family, and (3) hired persons. An operator was considered as working if he worked one or more hours; unpaid members of the operator's family, if they worked 15 or more hours; and hired persons, if they worked at all during the week.

Data are not fully comparable from one census to another, primarily because of differences in the period to which they relate. In 1954, the data were purposely related to either one of two calendar weeks, depending in part on the starting date set for the enumeration and in part on which week represented a period of peak employment within a given State. For the majority of States, the period specified was the week of September 26–October 2; for other States, the week of October 24–30.

In 1950, as in 1959, the data related to the week preceding the actual enumeration. Unlike 1959, however, enumeration starting dates were identical for all States in 1950 (April 1) but since several weeks were required to complete the enumeration, the calendar week preceding the enumeration was not identical for

all farms. In 1945 and 1935, the number of farm workers related to the first week in January and, in 1940, to the last week in March. In 1945, 1940, and 1935, only persons working the equivalent of two or more days during the specified week were to be included. In 1945 and 1940, an additional specification limited the workers to those 14 years old and over.

Experience gained from earlier censuses indicates that farm labor data are often unsatisfactorily reported unless the week specified is the week immediately preceding the actual enumeration. When a farm operator was asked to report the number of persons employed during a specified week that was several weeks prior to enumeration, he often reported the highest number of persons employed during the year. Obviously incorrect reports were adjusted to make the data reflect more nearly the situation known to exist during the specified week. The farm labor data for 1954 relates to a specified week which, in some cases, was several weeks prior to enumeration. Few adjustments were made in those data, however, even though there were indications of incorrect reporting.

Regular and Seasonal Workers.—Hired persons working on the farm during the week concerned were classed as "regular" workers if the period of actual or expected employment was 150 days or more during the year. They were classed as "seasonal" workers if the period of actual or expected employment was less than 150 days. In cases where the period of employment was not reported for an individual farm, it was estimated from data for such items as basis of payment, wage rates, expenditures for labor in 1959, and type of farming operations.

Hired Workers by Basis of Payment.—Hired persons were also classified according to whether they were paid on a monthly, weekly, daily, or hourly basis, or by piecework. In cases of incomplete reporting, the basis of payment for hired workers was supplied during the office processing operations.

Wage Rates and Hours Worked.—The agreed cash rate of pay was asked for each class of hired worker except those employed on a piecework basis. (The number and the earnings of persons paid on a piecework basis were required for those who worked on Friday of the week preceding the enumeration.) The number of hours that workers were expected to work to earn their pay was asked for each class except those employed on an hourly or piecework basis. For 1959 and 1954, the data include office estimates for farms submitting incomplete reports of wage rates and hours worked. The estimates were consistent with the size and type of operations for the individual farm as compared with similar farms in the area for which complete reports were received. The corresponding data for 1950 apply only to farms that reported both wage rates and hours worked.

Fertilizer and Lime.—The questions about fertilizer and lime, asked only for the sample farms, relate to the acreage on which fertilizer and lime were used and to the quantity used. Farm operators were asked to report total quantities used in 1959 on the farms they operated regardless of when or by whom the fertilizer and lime were purchased. In the South, some landlords who operated farms themselves included the fertilizer and lime they had purchased for use on their tenant-operated land. Such fertilizer and lime may also have been reported by the tenants. When double reporting was detected during the editing process, the data on the questionnaires concerned were adjusted to eliminate duplication in the totals.

The 1959 data for fertilizer and lime are entirely comparable with those for 1954. A breakdown between dry and liquid fertilizing materials was not obtained in 1954 and data on cost of either fertilizer or lime were not obtained in 1959.

Fertilizer.—The report for fertilizer was to refer only to commercial fertilizer and fertilizing materials, including rock phosphate. The acres fertilized and the tons of fertilizer applied to those acres were obtained separately for selected crops. The selected crops varied by region so that it was possible to obtain detailed data for the crops most commonly fertilized in each region. In cases where the same land was used for more than one crop, the acres fertilized were to be reported separately for each crop. If the same crop was fertilized more than once, however, the acres in that crop were to be reported only once. In all cases, the total quantity of fer-

tilizer used in 1959 was to be reported, including quantities used on land occupied by crops planted in 1958 or by crops to be harvested in 1960.

Reports for quantity of fertilizer and fertilizing materials used were required for both dry and liquid materials. The terms "dry" and "liquid" referred to the form in which the fertilizers and fertilizing materials were purchased and not to the way in which they were applied. Thus, dry fertilizers were those purchased in dry or solid form, as powders, dusts, granules, pellets, etc.; liquid fertilizers were those purchased in fluid form, as solutions or as liquefied gases.

Lime.—The data for lime relate to the total acreage limed in 1959 and the total tonnage of lime and liming materials used on those acres for purposes of conditioning the soil. Instructions on the questionnaire stated that ground limestone, hydrated and burnt lime, mari, and oyster shells were to be included but that lime used for spraying or sanitation purposes was to be omitted.

For some counties, the tonnage of lime shown in the table may be less than the tonnage reported for the Agriculture Conservation Program or the Conservation Reserve Program of the Soil Bank. Differences may be due either to sampling error or to under-reporting by farm operators. Many of the differences are minimized or eliminated entirely in the data presented on a State or regional basis.

Specified Farm Expenditures.—The data for farm expenditures are estimates based on reports obtained from the sample farms. The 1959 questionnaire contained questions for six items of farm expenditure: (1) purchase of feed for livestock and poultry, (2) purchase of livestock and poultry, (3) machine hire, (4) hired labor, (5) seeds, bulbs, plants, and trees, and (6) gasoline and other petroleum fuel and oil. With the exception of items (2) and (5), exactly the same questions were asked in 1954. For each item specified, the total expenditures made for the farm in 1959 were to be reported, whether made by the farm operator, his landlord, or both. A farm operator who rented part of his land to others was to report only the expenditures for the land he operated himself. Enumerators were instructed to ask respondents who had difficulty estimating their expenses for the period between enumeration and the end of the year to estimate them on the basis of current costs.

Feed.—The report on feed purchased for livestock and poultry was to include expenditures for grain, hay, milfeeds, pasture, salt, condiments, concentrates, and mineral supplements as well as for the grinding and mixing of feed. The estimated cost of items furnished by a landlord, contractor, or other owner for feeding poultry and livestock kept on the farm was also to be included. Payments made by a tenant to his landlord for feed grown on the tenant farm were to be excluded.

Livestock and Poultry.—The cost of baby chicks and turkey poults was to be included in the expenditures made for the purchase of livestock and poultry. Enumerators were instructed to ask the farm operator to include the cost or estimated purchase value of poultry and livestock provided by others and cared for by the operator under a contract feeding arrangement. The cost of livestock purchased for resale within 30 days was not to be included. A short-term transaction of that nature was considered to be a dealer operation, not an agricultural one.

Data on the purchase of livestock and poultry were not obtained in 1954. The instructions for the 1950 census specified that expenditures for domestic rabbits, fur-bearing animals kept in captivity, and bees were to be included. Any lack of comparability in the 1950 and 1959 data resulting from inclusion or exclusion of rabbits, fur-bearing animals, or bees is considered to be so slight as to be insignificant.

Machine Hire.—Expenditures for machine hire relate to custom machine work, such as tractor hire, threshing, grain or seed combining, silo filling, baling, cotton picking, cotton ginning, corn picking, plowing, vegetable harvesting, fruit picking, spraying, and dusting. Any amount spent for the labor included in the cost of machine hire was to be considered as part of the total expenditure. The cost of freight or trucking and exchange work without pay were to be omitted.

Hired Labor.—Expenditures for hired labor were to include total cash payments made in 1959 to family members and to others for farm labor. Payments to persons supplied by a contractor or a cooperative organization and paid directly by them or by the crew boss were also to be included. Payments

for the following types of work were to be excluded: housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons specifically employed for such work.

Gasoline and Other Petroleum Fuel and Oil.—Expenditures for gasoline and other petroleum fuel and oil were to relate only to the products used in the farm business. Enumerators were instructed to exclude the cost of petroleum products used for the family automobile when operated for other than farm business purposes and of products used in the farmhouse for heating, cooking, and lighting.

Seeds, Bulbs, Plants, and Trees.—Expenditures were to represent the total amount spent for seeds, bulbs, plants, and trees to be used on the farm operated. The value of seed grown on the farm was to be excluded. For nurseries and greenhouses, the cost of products purchased for immediate resale was also to be excluded.

This item of expenditure was not included in the 1954 Census. The data are comparable with those for 1950, however.

CROPS

Crops Harvested.—The 1959 agriculture questionnaire was similar to the questionnaire used in several previous censuses in that it provided for the collection of detailed data for all crops harvested on each individual farm. The variation in the crops listed on the questionnaires used in different States made possible the separate reporting of all important crops grown in a given area. All versions of the questionnaire contained several "All other crops" questions where crops not specifically listed in separate questions were to be reported.

Acreage of Crops Harvested.—In most instances, the acreage reported for individual crops represents the area harvested during 1959. The area harvested is often less than the area planted. For fruit orchards and groves, vineyards, and planted nut trees, the acreage reported represents the total area in both bearing and nonbearing trees and vines as of the date of enumeration—usually a date in October, November, or December 1959. For soybeans, cowpeas, and peanuts, the acreage grown for all purposes was reported as well as the acreage harvested for specific purposes. For velvet beans, only the acreage grown was reported. As the enumeration was about to begin in South Florida (those counties in which the enumeration was begun on October 7), an instruction was issued to the effect that the data for vegetables and potato crops should relate to a full year, beginning on October 1, 1958, and ending September 30, 1959.

Quantity of Crops Harvested.—Except for citrus fruits, olives, avocados, and for vegetable and potato crops in South Florida (see preceding paragraph) data for quantity harvested relate to the calendar year 1959. For citrus fruits, the quantity harvested from the bloom of 1958 for the 1958-59 marketing season was to be reported. For olives, the crop harvested in 1959 was to be reported for all States except California and Arizona. Enumerators in those two States were instructed to report olives harvested from the bloom of 1958 during the 1958-59 harvest season (September 15, 1958, to February 28, 1959). In the case of avocados, the data for California were to relate to the quantity harvested from the bloom of 1958 for the marketing season that extended from October 1, 1958 to September 30, 1959; the data for Florida were to relate to the crop harvested for the marketing season that extended from July 1, 1959, to February 28, 1960. Respondents were to estimate quantities not yet harvested at the time of enumeration.

Unit of Measure.—The unit of measure in which quantities were to be reported has varied for some crops, not only from State to State, but also from census to census. The aim has been to permit reporting in the units of measure currently in use. In the State and county tables, the quantities harvested for each crop are usually expressed in the unit of measure given on the 1959 agriculture questionnaire. In 1959, for corn and Irish potatoes, a choice between two units in which to report the production was given in some States. (See the discussion for those crops.) To provide readily comparable information, data published in earlier reports in different units of measure generally have been converted to the units used in 1959.

Corn.—In the 1959 census, detailed questions regarding the purpose for which corn was harvested were asked in all States. For most States, bushels was the only unit specified for corn

for grain. In some areas, however, where farmers were not accustomed to using bushels as the unit of measure, the questionnaire contained a provision for the quantity of corn for grain to be reported either in bushels (shelled basis) or in baskets of ear corn. As in former censuses, some reports were received in units of measure other than bushels or baskets. Prior to tabulation, all reports were converted to bushels (shelled basis) on the basis of the following factors: 70 pounds of ear corn, 2 baskets of ears, or 56 pounds of shelled corn equal one bushel. A barrel of ear corn was usually considered equal to 5 bushels of shelled corn.

Annual Legumes.—For soybeans, cowpeas, and peanuts, the acres and quantity grown or harvested for specific purposes, as well as the total acreage grown for all purposes, were obtained for areas where these crops are grown extensively; for velvetbeans, only the total grown for all purposes was obtained. For all these crops except, possibly peanuts, the total acreage grown for all purposes includes some acreage that was plowed under for green manure. In a few Southern States, separate figures were obtained for the acres grown alone and the acres grown with other crops. In 1959, as in 1954, enumerators were instructed to report green soybeans and blackeyes and other green cowpeas harvested for sale as vegetables and not as annual legumes.

Hay Crops.—Data for the total acres of land from which hay was cut exclude the acreage in sorghum, soybean, cowpea, and peanut hays. These crops were reported in separate questions in the States where they are important. To obtain the total acres from which other hays were cut, the acres of the various hay crops, including grass silage, were added together for each county. The corresponding totals for 1954 were obtained by the same procedure. For the 1950 census, however, the totals were based on farmers' own reports of their total acreage in harvested hay crops.

The questionnaire contained an instruction that if two or more cuttings were made from the same land, the total production from all cuttings was to be reported but the acres cut were to be counted only once. In cases where both hay and grass silage were cut from the same land, the total acreage was to be reported for both crops. In 1959, as in 1954, alfalfa hay included alfalfa and alfalfa mixtures for hay and for dehydrating; clover and timothy hay included clover, timothy, and mixtures of clover and grasses; small grain hay included oats, wheat, barley, rye, or other small grains cut for hay. The hay crops listed on the questionnaire varied somewhat from one State or region to another. The kinds of hay to be included in separate questions can be determined for a specific State from reference to the facsimile of the questionnaire that is in the appendix.

The tonnage of hay, including alfalfa hay for dehydrating, is given on a dry-weight basis. Prior to tabulation, production reported in green weight was converted to its dry-weight equivalent by dividing by 3. However, the production of grass silage is given in terms of green weight.

Field Seed Crops.—The field seed crops listed on each version of the questionnaire were limited to those considered most important within the given State. Each version of the questionnaire contained space for listing other field seed crops in order to facilitate the reporting of all field seed crops harvested. Quantity harvested was to be reported in terms of clean seed for most field seed crops. Bluegrass, or June grass seed, was to be reported in terms of green seed for Iowa, Kansas, Kentucky, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, and Tennessee. No mention was made of "green-weight basis" for other States where this crop was to be reported in the "All other" question.

Irish Potatoes and Sweetpotatoes.—For Irish potatoes and sweetpotatoes (including yams), the total quantity harvested was to be reported for each crop in all cases, whether harvested for

home use or for sale or whether used for livestock feed. The acreage harvested was to be reported for each crop only in cases where the quantity amounted to 20 or more bushels (or the approximate equivalent in terms of hundredweights, barrels, or pounds, as explained on different versions of the questionnaire). This method of reporting was designed to facilitate the enumeration of potatoes harvested on small plots for home use. Essentially the same procedure was followed in both 1954 and 1950. In earlier censuses, however, the acreage of Irish potatoes and sweetpotatoes was to be reported in all cases, even when production was solely for home use. Therefore, the data on acres for censuses prior to 1950 are not fully comparable with those for the last three censuses, especially in counties or States where production is largely for home use.

The unit of measure in which quantity was to be reported varied from one State or region to another to correspond with the units most commonly used in a given area. In 27 States, the questionnaire provided a choice for reporting either bushels or 100-pound bags (hundredweights). The published data for counties and States are in terms of bushels.

Berries and Other Small Fruits.—The question for berries and other small fruits related specifically to the acreages and quantities harvested for sale. Only tame or cultivated berries were to be reported except for the New England States, where wild blueberries were also to be included. Enumerators were instructed always to report the total quantity of each kind of berry harvested for sale but to report the area harvested only when it amounted to one-tenth acre or more. Nonbearing areas and areas and quantities harvested for home use were to be excluded. The data for 1959 and 1954 are fully comparable.

Tree Fruits, Nuts, and Grapes.—In 1959, as in 1954, fruit trees, nut trees, and grapevines were not enumerated for farms having a combined total of less than 20 at the time of enumeration. Both bearing and nonbearing trees and vines were to be included but not any that had been abandoned. For censuses prior to 1954, all fruit or nut trees and grapevines on the farm were to be enumerated, regardless of the number. Because of this change in enumeration procedure, the data for 1959 and 1954 are not fully comparable with those for earlier censuses. In commercial fruit-producing counties, the change in procedure may have had a considerable effect on the number of farms reporting without causing any significant changes in the number of trees and vines nor in the quantity harvested. In counties where most of the trees or vines are in small plantings and where production is largely for home-use, however, the change may have caused a significant reduction not only in the number of farms reporting but also in the number of trees and vines and in the quantity harvested.

In both 1959 and 1954, the area in fruit orchards, groves, vineyards, and planted nut trees was enumerated when there were 20 or more fruit trees, nut trees, and grapevines. In 1950, the corresponding area was enumerated only if it amounted to one-half acre or more. In censuses prior to 1950, the area was to be reported regardless of its size or of the number of trees and vines. Enumerators frequently omitted the fractional acreages in small plantings and home orchards, however. In some counties, small plantings or home orchards comprise a sizeable proportion of the total fruit and nut acreage. For those counties, the change from one census to another in acreage of land in fruits and nuts may not be due to fact but merely to differences in enumeration.

In 1959, California was the only State for which the acreage in each individual fruit and nut crop was obtained. In 1954, such acreage was also obtained for Arizona. In all States, the number of bearing and nonbearing trees or vines on the farm at the time of enumeration and the quantity harvested in 1959 were to be reported separately for each fruit and nut crop. (Exceptions in the harvest period for citrus fruits, avocados, and

olives are described on p. XIX.) The unit of measure in which quantities were to be reported varied from one State to another. Tables in this report show quantities in the unit of measure appearing on the 1959 questionnaire used in the State.

Nursery and Greenhouse Products.—The questions about nursery and greenhouse products related only to products grown on the place for sale. Crops bought for resale without additional cultivation were to be excluded. The area used for growing and the value of sales were to be reported separately for each of three groups, as follows:

- Nursery products, (trees, shrubs, vines, and ornamentals).
- Cut flowers, potted plants, florist greens, and bedding plants. For these items, the area grown in the open was to be reported separately from the area grown under glass.
- Vegetables grown under glass, flower seeds, vegetable seeds, vegetable plants, bulbs, and mushrooms. For these items, the area grown in the open was to be reported separately from the area grown under glass or in the house.

The data obtained for 1959 are comparable with those for 1954 and 1950 since the questions asked were essentially the same in the three censuses. Detailed data regarding the production and sale of nursery, greenhouse, and other horticultural products on farms having sales of \$2,000 will be published in volume V, part 1.

Forest Products.—The forest products data obtained in the Census of Agriculture relate only to the products cut on farms. Commercial logging, timber operations, and forest products grown or cut on nonfarm places are excluded. Therefore, the data in this report do not represent the total forestry output or income for a county or State.

The questions included on the 1959 agriculture questionnaire are more detailed than those asked in the 1954 Census. Value was obtained for the sale of standing timber or trees and for the sale of poles and piling, bark, bolts, and mine timbers. The quantity cut, whether for home use or sale, and the quantity sold were obtained for individual forestry products such as firewood and fuelwood, fence posts, sawlogs and veneer logs. Data relating to pulpwood, Christmas trees, maple trees, and maple syrup were obtained in States where such products are important commercially.

Value of Crops Harvested.—The total value of crops harvested represents the estimated value of all crops harvested during the crop year 1959. It includes the value of quantities consumed on farms as food, feed, seed, etc., as well as quantities sold. Farmers were not asked to report values of crops harvested; the values were calculated in the Processing Office. For individual crops, the quantity harvested was multiplied by the average price at which the crop was sold in the State. State average prices were furnished to the Bureau of the Census by the Agricultural Marketing Service of the U.S. Department of Agriculture. They are based on reports received from a sample of farmers and dealers. Quantities harvested were not obtained for vegetables nor for nursery and greenhouse products. Therefore, for those crops, the value of sales, as obtained in the enumeration, was used in the calculation of total value of crops harvested.

Value of Crops Sold.—The questionnaire required value of sales of crops to be reported only for total vegetables, nursery and greenhouse products, and certain forest products. For all other crops, the value of sales was calculated on a county level during processing operations by multiplying the State average prices by either the quantity sold or the quantity harvested. Reports of quantity sold were obtained during the enumeration only for some of the major field crops. Quantity harvested was used in the calculation of value of crops sold for such crops as cotton, tobacco, etc., that are customarily grown for sale. The procedures used for the various crops are described on page XXV. They

are similar to the procedures followed in 1954. In 1950, values of crops sold were obtained for each farm during the enumeration.

IRRIGATION

Definition of Irrigated Land.—Irrigated land is defined as land watered for agricultural purposes by artificial means. These means included subirrigation as well as systems whereby water was applied to the ground surface, either directly or by sprinklers. Land flooded for rice cultivation was considered as irrigated. Land flooded during high-water periods was to be included as irrigated only if water was directed to agricultural use by dams, canals, or other works. The definition of irrigated land specifically excluded land where the "water table", or natural level of underground water, was controlled by drainage works with no additional water brought in by canals or pipes.

Enumeration of Irrigated Land.—A question on total land irrigated was asked in all States, with the exception of Alaska. The acreage reported for this question includes not only irrigated cropland but also any other land that was irrigated in 1959.

The questionnaires used in the 17 Western States, Louisiana, and Hawaii included several additional questions regarding irrigation. These questions related to the acreage of land irrigated by sprinklers, irrigated land from which crops were harvested, specific crops irrigated, and source of irrigation water. Such additional data, for irrigated farms, are presented in county table 1a for these States.

Statistics on the irrigation enterprises which supplied irrigation water were collected in the 1959 Census of Irrigation and are published in Volume III, "Irrigation of Agricultural Lands". This report contains a considerable amount of data about irrigation for the 17 Western States and Louisiana.

Irrigated Farms.—All farms reporting any land irrigated in 1959 are counted as irrigated farms.

Land in Irrigated Farms.—Data for land in irrigated farms according to use relate to the entire acreage in these farms, including land that was not irrigated.

Land Irrigated.—Data for land irrigated relate only to that part of the land in irrigated farms that was watered by artificial means at any time in 1959. Separate figures are given for farms reporting land irrigated by sprinklers whether or not the land was also irrigated by other means. Additional figures are given for farms reporting land irrigated by sprinklers only. Data on sprinkler irrigation were not obtained in the 1954 census.

Irrigated Cropland Harvested.—The data for irrigated cropland harvested relate to all irrigated land from which crops were harvested in 1959, regardless of the method of irrigation. An instruction on the questionnaire reminded enumerators and respondents to include irrigated land from which hay was cut, irrigated land in both bearing and nonbearing fruit and nut crops, and irrigated land from which volunteer crops were harvested. Each irrigated acre was to be reported only once, regardless of how many crops were harvested from it.

Other Irrigated Land.—This classification was obtained by subtraction of the acreage of irrigated cropland harvested from the acreage of total land irrigated. It represents primarily irrigated cropland not harvested and irrigated pasture or grazing land.

Farms Irrigated By Number of Acres Irrigated.—All farms on which any land was irrigated in 1959 are classified according to the number of acres irrigated in county table 1a for the 17 Western States, Louisiana, and Hawaii. This classification is based on total land irrigated. Therefore, it includes not only the irrigated land from which crops were harvested but also all other irrigated land, regardless of use.

Land Irrigated By Source of Water.—The agriculture questionnaire contained a question as to what proportion of irrigated water used on the farm in 1959 was obtained from ground-water, surface-water, and irrigation-organization sources. Respondents were asked to report separately the percentage of

water obtained from each source. The number of acres that were irrigated by water from each source or combination of sources was calculated during office processing operations by applying the percentages to the total land irrigated.

Ground-water sources relate to wells (pumped or flowing) and springs; surface-water sources relate to streams, lakes, reservoirs, and sewage and drainage ditches. For each of these sources, only water obtained by pumps or other works operated as part of the operator's own farm or as part of another single farm was to be included. Irrigation-organization sources relate to irrigation enterprises organized to supply water to a group of farms, regardless of how or where the enterprise obtained the water. The irrigation enterprise may be a legal organization or a group of farmers informally organized to operate a supply ditch or other works to provide water for their own farms.

LAND-USE PRACTICES

Summary Information.—The 1959 data for land-use practices are estimates based on reports obtained from only a sample of farms. Comparable data are not presented for 1954 because questions about land-use practices were included on the 1954 questionnaire for only a limited number of States. The various land-use practices relate to methods for reducing soil erosion, either by improving the soil, controlling the run-off of water, or reducing the blowing of topsoil.

Cropland in Cover Crops.—The data relate to land on which cover crops were turned under for green manure in 1959 and which was then planted to another crop. The entire acreage of cover crops so used was to be reported even if the following crop failed.

Cropland Used for Grain or Row Crops Farmed on the Contour.—This item relates to land on which grain or row crops were planted in level rows around the slope of a hill.

Land in Strip-Cropping Systems for Soil-Erosion Control.—Strip-cropping was defined as the practice of alternating close-sown crops with strips or bands of row crops or of alternating either close-sown or row crops with bands of cultivated fallow land. The published data refer to the total acreage of all fields and tracts in which strip-cropping was practiced in 1959.

System of Terraces on Crop and Pasture Land.—This item relates to the acreage in ridge-type or channel-type terraces constructed on sloping cropland and pastureland.

LIVESTOCK AND POULTRY

Inventories.—Data for livestock and poultry on farms relate to the number on hand at the time of enumeration. All livestock and poultry, including those being kept or fed under contract, were to be enumerated on the farm or ranch where they were, regardless of who owned them. Livestock in transit from one grazing area to another or grazing in national forests, grazing districts, open range, or on land used under permit were to be reported as being on the place where the person who had control over them had his headquarters.

The time of year at which livestock and poultry are enumerated affects the data. Therefore, the date of enumeration needs to be considered when totals for the various censuses are compared. Both the 1959 and the 1954 census data represent fall inventories. These censuses came at a time of large-scale movement of flocks and herds from one range to another, from ranch to feed lot, and from farm or ranch to market.

The censuses of 1920, 1925, 1935, and 1945 were taken as of January 1 and those of 1930, 1940, and 1950, as of April 1. A count made in April varies considerably from one made in January. In most areas a large number of animals are born between January and April. A considerable number of older animals die or are sold during the same period. In the range States, along

with the change in season and grazing condition, sheep and cattle are moved from one locality or county to another. This movement may affect the comparability of data for counties and, in some cases, for States. The comparability of data by age has been affected also by changes in the questions from one census to another.

Milk Cows, Cows Milked, Milk Produced, and Butter.—Data on the number of milk cows, cows milked, and milk produced relate to the day preceding the enumeration. Data for butter churned were obtained only for 14 States and relate to the calendar week preceding the enumeration. The data for cows milked yesterday and milk produced yesterday are not given in this volume. These figures were obtained primarily to serve the needs of the U.S. Department of Agriculture in making monthly and annual estimates of milk production. These figures can be made available, at a small cost, to others who express an interest in them.

Whole Milk and Cream Sold.—Data for whole milk and cream sold relate to the entire year 1959 and are estimates based on reports obtained for farms in the sample. All milk and cream sold from the farm (except quantities purchased from some other place and then resold) were to be included, regardless of who shared the receipts. The questionnaire provided three alternative units of measure for reporting the quantity of milk sold—pounds of milk, gallons of milk, and pounds of butterfat. The respondent was thus permitted to report quantity according to the unit of measure in which payment was received. In the State and county tables, the data for milk are given in the unit of measure most commonly used in the State. Pounds of butterfat were converted into gallons or pounds of whole milk on the basis of the average butterfat content of milk as shown by data furnished by the Agricultural Marketing Service of the U.S. Department of Agriculture.

Sows and Gilts Farrowing.—In the 1959 census, data were obtained for the number of litters farrowed between December 1, 1958, and June 1, 1959, and from June 1 to December 1, 1959. In the 1954 census, data were obtained for the sows and gilts that farrowed rather than for the number of litters.

Sheep, Lambs, and Wool.—In the 1959 census, questions about sheep, lambs, and wool were asked in all States. Data on shearings and on amount of wool shorn were obtained for lambs and sheep separately. In the 1954 census, sheep and lamb inventories were not obtained for Florida, Georgia, and South Carolina.

Goats and Mohair.—In 1959, questions on goats, kids, and mohair appeared on the questionnaires for the following nine States: Arizona, California, Missouri, Nevada, New Mexico, Oklahoma, Oregon, Texas, and Utah. In 1954, corresponding data were obtained for Louisiana, New Mexico, Oklahoma, Oregon, Texas, Washington, and selected counties in Missouri.

Bees and Honey.—No questions on bees and honey were included on the questionnaires for either the 1959 or the 1954 census. In 1959, however, enumerators were instructed to obtain agriculture questionnaires for places not having agricultural operations if they were engaged in beekeeping. The number of hives of bees and the amount of honey sold were to be reported in the "Remarks" space of the questionnaire. Data for bees and honey are not included in this report.

Value of Livestock on Farms.—To obtain the value of livestock on farms, the number of each class of livestock or poultry on hand was multiplied by the State average price for 1959, as furnished by the Agricultural Marketing Service of the U.S. Department of Agriculture. Comparable data for 1954 were compiled by the same method on the basis of average prices for that year.

Sales of Live Animals.—Data for the number and value of animals sold alive in 1959 are estimates based on reports for sample farms only. Corresponding data for 1954 were obtained for all farms. The dollar value of sales was obtained from the farmer

for cattle, calves, and horses and mules. Average value per head for other livestock sold was obtained from the U.S. Department of Agriculture. In the 1959 census, respondents were asked to report separately the number of live animals already sold and the number estimated to be sold between the time of enumeration and the end of the year. This separation of reports for the number sold and to be sold was designed to assure more complete coverage of all livestock sales made during the year. In the 1954 census, only totals for the entire year were obtained though reference was made to animals to be sold between enumeration and the end of the year.

Sales of Poultry and Poultry Products.—For both the 1959 and the 1954 Censuses, sales of chickens were obtained for two groups: (1) broilers and (2) other chickens. The enumeration of broiler sales presents problems arising from the varied contractual arrangements under which broilers are produced. The questionnaire contained an instruction to the effect that all broilers grown for others under contract were to be reported as sold. During office processing operations, the data reported for inventories and sales of chickens four months old and over, chicken eggs sold, and broilers sold were carefully examined. Obvious inconsistencies indicating confusion between broilers and other chickens were corrected on the basis of estimated values and, for sample farms, on the basis of data reported for expenditures for feed, poultry and livestock purchases, hired labor, etc.

Questions relating to poultry other than chickens (and broilers) were generally the same in 1959 as in 1954. In the 1959 census, however, only total numbers were obtained for turkeys and turkey fryers raised and for turkey hens kept for breeding whereas the 1954 questionnaire asked for a breakdown between light and heavy breeds. Also, for poultry other than chickens and turkeys, the 1959 census obtained the number sold whereas the 1954 census obtained the number raised.

CLASSIFICATION OF FARMS

Scope of Classification.—Data for land in farms, and for cropland harvested in farms classified by size, by color of operator and by tenure of operator were tabulated for all farms. However, most of the detailed data by size of farm, by color of operator, by tenure of operator, by economic class, and by type of farm are estimates based on farms in the sample. The farm classifications by size of farm, color of operator, tenure of operator, economic class of farm, and type of farm were made in the processing office on the basis of data reported on each questionnaire.

Farms by Size.—Farms were classified by size according to the total land area established for each farm. The same classification was used for all States. According to definition, a farm is essentially an operating unit, not an ownership tract. All land operated by one person or partnership represents one farm. In the case of a landlord who has assigned land to croppers or other tenants, the land assigned to each cropper or tenant is considered a separate farm even though the landlord may operate the entire landholding as one unit in respect to supervision, equipment, rotation practice, purchase of supplies, or sale of products. In some parts of the South, a special Landlord-Tenant Questionnaire was used to assure an accurate enumeration of each unit within a multiple-unit operation. A change was made in the size classification for 1959, as contrasted with several preceding years, by subdividing the 1,000-acre-and-over group and by combining two previously recognized groups, viz., 10 to 29 acres and 30 to 49 acres.

Farms by Color of Operator.—Farms were classified by color of operator into two groups, "white" and "nonwhite." "Nonwhite" includes primarily Negro and Indian operators but also some of other racial origin.

Enumerators were instructed to report the race on the basis of their own observation whenever possible rather than by asking the respondent.

Farms by Tenure of Operator.—The classification of farms by tenure of operator was based on data reported for land owned, land rented from others or worked for others on shares, land managed for others, and land rented to others or worked on shares by others. The same basis of classification was used in 1959 as in 1954.

For 1959, each questionnaire was coded, during the editing process, to indicate whether it represented a farm operated by a full owner, part owner, manager, or tenant. The sample questionnaires for tenants were given a code to indicate the kind of tenant.

The various classifications of tenure, as used for the 1959 census, are defined below:

- a. **Full Owners** operate only land they own.
- b. **Part Owners** operate land they own and also land rented from others.
- c. **Managers** operate land for others and are paid a wage or salary for their services. Persons acting merely as caretakers or hired as laborers are not classified as managers. If a farm operator managed land for others and also operated land on his own account, the land operated on his own account was considered as one farm and the land managed for others as a second farm. If, however, he managed land for two or more employers, all the managed land was considered to be one farm.
- d. **Tenants** rent from others or work on shares for others all the land they operate. They are further classified, as described below, on the basis of rental arrangements in regard to the payment of cash rent, sharing of crops, sharing of livestock or livestock products, and the furnishing of work power by the landlord.
 - (1) **Cash Tenants** pay cash rent, either on a per-acre basis or for the farm as a whole.
 - (2) **Share-Cash Tenants** pay part of the rent in cash and part in a share of the crops and/or of the livestock and livestock products.
 - (3) **Crop-Share Tenants** pay a share of the crops but not of the livestock or livestock products.
 - (4) **Livestock-Share Tenants** pay a share of the livestock or livestock products. They may or may not also pay a share of the crops.
 - (5) **Croppers** are tenants whose landlords furnished all the work animals or tractor power. They usually work under the close supervision of the landowners or their agents, or other farm operators. Also, the land assigned to them is often merely a part of a multi-unit operation. Croppers may or may not also pay cash rent or a share of crops, livestock, or livestock products. Data for croppers are available for only 16 southern States and Missouri.
 - (6) **Other Tenants** are those who did not qualify for inclusion in any of the foregoing subclassifications. They may have had the use of land rent-free or in return for a fixed quantity of products, payment of taxes, maintenance of buildings, etc.
 - (7) **Unspecified Tenants** are those for whom the rental arrangement was not reported.

The definition of each subclass of tenant was essentially the same for earlier censuses as for 1959. In 1945, however, the enumerator was asked to determine the subclass of tenants whereas in other censuses all classifications were made during the processing of questionnaires on the basis of the data reported. The procedure used in 1945 may have affected the comparability of the data, especially for cash tenants and share-cash tenants.

Farms by Economic Class.—The totals for farms by economic class are estimates for all farms made on the basis of data reported only for the sample farms. The economic classifications represent groupings of farms that are similar in characteristics and size of operation. The economic classes were established on the basis of one or more of four factors: (1) total value of all farm products sold, (2) number of days the farm operator worked off the farm, (3) the age of the farm operator, and (4) the relationship of income received by the operator and members of his household from nonfarm sources to the value of all farm products sold. Institutional farms, Indian reservations, agricultural experiment stations, and grazing associations were always classified as "abnormal."

The total value of farm products sold was obtained by addition of the reported or estimated values for all products sold from the farm. The value of cattle and calves, horses and mules, dairy products, some poultry products, vegetables, nursery and greenhouse products, standing timber, and miscellaneous forest products was obtained from the farm operator during the enumeration. The quantity sold was obtained during enumeration for corn, sorghums, small grains, hay, small fruits, some of the forest products, chickens and chicken eggs, hogs, sheep, and goats. To obtain the value of sales of these products, the quantity sold was multiplied by State average prices.

For each of the other products, the entire production was multiplied by the State average price. If the resulting value amounted to \$100 or more, the entire quantity produced was considered as sold. This procedure was followed only in establishing the economic class and the type of farm but was not used in establishing the total value of products sold from the farm. (See p. XXV.)

Farms were grouped into two major categories, commercial farms and other farms, mainly on the basis of total value of products sold. The 1959 class intervals and some of the criteria for determination of a given class are different from those used in 1954 and in 1950. In general, for 1959, all farms with a value of sales amounting to \$2,500 or more were classified as commercial. Farms with a value of sales of \$50 to \$2,499 were classified as commercial if the farm operator was under 65 years of age and (1) he did not work off the farm 100 or more days during the year and (2) the income received by the operator and members of his family from nonfarm sources was less than the value of all farm products sold. The remaining farms with a value of sales of \$50 to \$2,499 and institutional farms and Indian reservations were included in one of the groups of "other farms."

Commercial farms were divided into six economic classes on the basis of the total value of all farm products sold, as follows:

<i>Class of Farm</i>	<i>Value of Farm Products sold</i>
I.....	\$40,000 and over
II.....	\$20,000 to \$39,999
III.....	\$10,000 to \$19,999
IV.....	\$5,000 to \$9,999
V.....	\$2,500 to \$4,999
VI*	\$50 to \$2,499

*Provided the farm operator was under 65 years of age, and—

(1) he did not work off the farm 100 or more days, and (2) the income that he and members of his household received from nonfarm sources was less than the total value of farm products sold.

Other farms were divided into three economic classes as follows:

a. **Class VII, Part-time.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-time" if the operator was under 65 years of age and he either worked off the farm 100 or more days or the income he and members of his household received from nonfarm sources was greater than the total value of farm products sold.

b. **Class VIII, Part-retirement.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-retirement" if the farm operator was 65 years old or over. Many of these are farms on which the income from nonfarm sources was greater than the value of sales of agricultural products. Others are residential, subsistence, or marginal farms. In previous censuses, the age of the farm operator was not a criterion for grouping farms by economic class. Since the number of elderly people in our population has been steadily increasing during recent years, a separate classification for farms operated on a part-retirement basis was considered important for an adequate analysis of the agricultural structure of a county or State.

c. **Class IX, Abnormal.**—All institutional farms and Indian reservations were classified as "abnormal," regardless of the value of sales. Institutional farms include those operated

by hospitals, penitentiaries, schools, grazing associations, government agencies, etc.

Farms by Type.—The data for farms by type are estimates based on data tabulated for the farms in the sample. The type represents a description of the major source of income from farm sales. To be classified as a particular type, a farm had to have sales of a particular product or group of products amounting in value to 50 percent or more of the total value of all farm products sold during the year.

The types of farms, together with the products on which type classification is based, are as follows:

<i>Type of Farm</i>	<i>Source of Cash Income</i>
	(Products with sales value representing 50% or more of total value of all farm products sold)
Cash-grain	Corn, sorghums, small grains, soybeans for beans, cowpeas for peas, dry field and seed beans and peas.
Tobacco	Tobacco.
Cotton	Cotton.
Other field-crop.....	Peanuts, potatoes (Irish and sweet), sugarcane for sugar or sirup, sweet sorghums for sirup, broomcorn, popcorn, sugar beets, mint, hops, and sugar beet seed.
Vegetable	Vegetables.
Fruit-and-nut	Berries, other small fruits, tree fruits, grapes, and nuts.
Poultry	Chickens, chicken eggs, turkeys, and other poultry products.
Dairy	Milk and cream. The criterion of 50 percent of total sales was modified in the case of dairy farms. A farm having value of sales of dairy products amounting to less than 50 percent of the total value of farm products sold was classified as a dairy farm, if— (a) Milk and cream sold accounted for more than 30 percent of the total value of products sold and— (b) Milk cows represented 50 percent or more of total cows and— (c) The value of milk and cream sold plus the value of cattle and calves sold amounted to 50 percent or more of the total value of all farm products sold.
Livestock other than dairy and poultry.....	Cattle, calves, hogs, sheep, goats, wool and mohair except for farms in the 17 Western States, Louisiana, and Florida that qualified as livestock ranches.
Livestock Ranches.....	Farms in the 17 Western States, Louisiana, and Florida were classified as livestock ranches if the sales of livestock, wool, and mohair represented 50 percent or more of the total value of farm products sold and if pastureland or grazing land amounted to 100 or more acres and was 10 or more times the acreage of cropland harvested.
General.....	Field seed crops, hay, silage. A farm was classified as general also if it had cash income from three or more sources and did not meet the criteria for any other type.
Miscellaneous.....	Nursery and greenhouse products, forest products, mules, horses, colts and ponies. Also all institutional farms and Indian reservations.

The type classifications were essentially the same for the 1959 as for the 1954 census except that tobacco farms and livestock ranches were not separately classified in 1954. Tobacco was included as one of the crops used in the classification of "other field crop" farms in 1954. The farms classified as livestock ranches in 1959 would have been classified as "livestock other than dairy and poultry" in 1954 without regard to the acreage in pasture.

Value of Farm Products Sold.—Data for the value of farm products sold in 1959 were obtained by enumeration for some products and by estimation for others. The questionnaire used for the 1959 census provided for farm operators to report value of sales for the following products:

Vegetables	Miscellaneous poultry products
Nursery and greenhouse products	Milk and cream
	Cattle
Standing timber	Calves
Miscellaneous forest products	Horses, mules, colts, and ponies

For all other agricultural products, the value of sales was estimated during the office processing. The State average prices used for calculating the value of farm products sold were furnished to the Bureau by the Agricultural Marketing Service of the U.S. Department of Agriculture. One of three following procedures was used.

(1) For the products for which data on quantities sold were obtained during enumeration, the State average prices were multiplied by the county totals of the quantities reported as sold or the quantities reported as produced for sale. The following products were covered by this procedure:

Corn for grain	Fence posts
Sorghums for grain, seed, sirup, or dry forage	Sawlogs and veneer logs
All small grains	Christmas trees
Hay crops	Chickens (broilers and others)
All berries and small fruits ¹	Chicken eggs
Firewood and fuelwood	Hogs and pigs
Pulpwood	Sheep and lambs
	Goats and kids

¹ Adjustment made for cranberries based on Cranberry Payment Program.

(2) For most of the agricultural products which are customarily raised for sale, the entire quantity produced was considered to be sold. The State average prices were, accordingly, multiplied by the county total of production. The following crops were covered by this procedure:

Cotton	Sugarcane for sugar
Popcorn	Tobacco
Sugar beets for sugar	Wool
Broomcorn	Mohair

(3) For all other crops, the State average prices were multiplied by the quantities sold as estimated on the basis of crop-disposition data furnished by the Agricultural Marketing Service, data reported in questionnaires for "other crops" on the 1959 questionnaire, or data obtained from earlier censuses.

For all tree fruits, nuts, and grapes, the entire quantity produced was considered as sold, except for apples, apricots, sour and sweet cherries, peaches, plums, prunes, avocados, tangerines, oranges, and grapefruit in States where a portion of the crop was not harvested or was subjected to excess cullage as indicated by data obtained from the Agricultural Marketing Service of the U.S. Department of Agriculture.

The data for 1959 are comparable with those for 1954 since essentially the same procedures were used in both censuses for estimating quantities and values of farm products sold. In 1959, as in 1954, data for the sales of farm products represent total sales for the entire farm, regardless of who shared the receipts. For tenant-operated farms, the landlord's share of agricultural products was considered as sold provided the products were moved off the tenant farm. All crops, livestock, and poultry raised under a contract arrangement were considered as sold from the farm where they were raised. For institutional farms, all agricultural items produced on land operated by the institution and consumed by the inmates were to be reported as sold.

All sales data relate to one year's farm operations. Crop sales are for crops harvested during the crop year, whether the crops were actually sold immediately after harvest or placed in storage for later sale. Sales of livestock and livestock products relate to the calendar year, regardless of when the livestock or products were raised or produced. All wool and mohair reported as shorn or clipped was considered as sold.

Enumerators were instructed to record gross values of quantities sold, with no deductions for feed, seed, fertilizer, water, labor, or marketing costs. For some products, however, net values may have been reported. In the case of milk, particularly, some farm operators may have reported the payments they received as the gross value of sales, even though the buyer had deducted handling and hauling charges before making payment. Adjustments were made in the data reported only in cases of obvious error.

Chapter A

STATISTICS FOR THE STATE

(1)

State Table 1.—FARMS, ACREAGE, AND VALUE: CENSUSES OF 1920 TO 1959

Data on value of land and buildings for 1959, 1954, and 1950 are based on reports for only a sample of farms. See text.

NA Not available. ²For Censuses of 1959 and 1954, expenditures during Census year. For earlier Censuses, expenditures during the preceding calendar year. ³Cash payments for farm labor; housework not included. For 1959, 1954, 1950, 1945, and 1940, the data do not include expenditures for contract construction work, machine hire, and labor included in cost of machine hire. For 1920, the value of board furnished was included. ⁴Census of 1959, week preceding the enumeration; Censuses of 1954 and 1950, week of September 26-October 2; Census of 1950, week preceding enumeration; Censuses of 1945 and 1940, first week of January; Census of 1940, last week of March. ⁵See text for differences in definition of farm workers. ⁶Separate data not available by day or week. ⁷Separate data not available for workers hired by the hour or piece-work basis. Questionnaire called for other hired labor including piecework and contract labor.

State Table 6.—LIVESTOCK AND POULTRY ON FARMS, NUMBER AND VALUE: CENSUSES OF 1920 TO 1959

[Data for number of livestock not fully comparable for the several Censuses. See text.]

NA Not available.

2 Reported in small fractions.

3 Figures for orchards harvested and specified crops relate to the crop years 1949, 1954, 1949, 1944, 1939, 1934, 1929, 1924, and 1919.

4 Total acreage of crops for which figures are available, except that corn cut for forage was excluded as most of this acreage was probably duplicated in the acreage of corn harvested for grain.

5 Value of corn and other corn products sold.

6 Includes corn cut for silage.

7 Corn cut for forage.

8 Sorghum for all purposes, except for sirup.

9 Value of sorghum sold for hay or forage included in value of sorghum sold for grain or seed.

10 Includes sorghum cut for silage.

11 Reported in bushels.

12 Dry lima beans included with all dry field and seed beans.

13 Includes "blackeye". Includes dry lima beans prior to 1949.

14 Excludes reports for farms reporting acres grown for all purposes with no production. Acres harvested for beans or peas not available.

15 Includes acres grown alone and acres grown with other crops for all purposes. Acres harvested for beans or peas not available.

16 For all censuses, except 1920, obtained by adding the individual hay crops.

17 Includes oats cut for feeding unthreshed.

18 Includes crops other than corn and sorghum.

19 Clover seed, except sweetclover.

20 Clover seed, including sweetclover.

21 Includes prairie millet.

22 Value of lint cotton only.

23 For 1954, 1954, and 1949, does not include acreage for farms with less than 10 hundredweight harvested. See text.

24 For 1959, does not include acreage for farms with less than 1.00 pounds harvested; for 1949, does not include acreage for farms with less than 20 bushels harvested; for 1949, does not include acreage for farms with less than 10 bushels harvested. See text.

25 Includes receipts for sale of pasture and grazing privileges.

26 Excludes Irish potatoes and sweetpotatoes, except for 1920 census which included potatoes for home use only.

27 Excludes Irish and sweet potatoes.

28 Green lima beans included with snap beans.

29 Hot peppers and pimientos included with sweet peppers.

30 Pimientos included with sweet peppers.

31 For Censuses prior to 1949, small fruits harvested for home use or for sale.

32 Blueberries.

33 Loganberries and youngberries included with boysenberries.

34 For 1954 and 1954, does not include data for farms with less than 20 trees and grapevines. See text.

35 Does not include acreage for farms reporting less than 1.0 acre. See text.

36 For 1959, harvested in 1954-55 from the bloom of 1953; for 1949, harvested in 1943-54 from the bloom of 1953; for 1949, harvested in 1949-50 from the bloom of 1949; for 1945, harvested in 1945-46 from the bloom of 1943; for 1943, harvested in 1943-44 from the bloom of 1939.

37 Reported in boxes.

38 Reported in crates.

39 Nearly all sweet cherries.

40 Boxes, kind not specified.

NA Not available.

1 Excludes data for farms unclassified as to type.

2 Trees, plants, vines, etc., in nurseries; flower and vegetable seeds; and bulbs.

3 Flowers and flowering plants grown for sale.

4 Crops grown under glass (flowers, plants, and vegetables) and propagated mushrooms.

5 Flowers, plants, and vegetables grown under glass; and flowers grown in the open.

6 Total square feet under glass.

7 Flower and vegetable seeds, bulbs, and flowers and plants grown in the open.

8 Value of flower and vegetable seeds; vegetables and vegetable plants; and mushrooms.

9 Not strictly comparable with other years as figures probably include some reports of firewood used on farms.

State Table 10.—CHARACTERISTICS OF PLACES NOT COUNTED AS FARMS BECAUSE OF CHANGE IN DEFINITION OF FARM: 1959

In— (For definitions and explanations, see text)		Total	In— (For definitions and explanations, see text)		Total
Places excluded as farms by change in definition 1954-1959			Operators by days of work off place in 1959		
	number	5,993	No days	operators reporting	1,389
Orchard harvested	acres or places	244,155	1 to 49 days	operators reporting	111
	places reporting	2,428	50 to 99 days	operators reporting	157
	acres	2,451	100 to 199 days	operators reporting	303
Under 10 acres	places reporting	1,226	200 or more days	operators reporting	3,973
10 or more acres	places reporting	52	Operators not reporting	number	80
Operators by tenure	number		Operators reporting other reason of farm exceeding value of farm products sold	operators reporting	5,185
Full owners	number	5,476	Cattle and calves of all ages	places reporting	3,886
Part owners and managers	number	129		number	3,024
Tenants	number	488	Cows, including heifers that have calved	places reporting	2,184
Operators by color	number			number	2,777
White	number	5,264	Hogs and pigs	places reporting	938
Nonwhite	number	147		number	2,691
Operators by year began operation of present place			Chickens 4 months old and over	places reporting	3,486
1959	operators reporting	626		number	76,706
1958	operators reporting	478	Corn harvested for all purposes	places reporting	39
1957	operators reporting	429		acres	160
1956	operators reporting	454	Hay harvested	places reporting	179
1951-1955	operators reporting	1,442		acres	712
1950 or earlier	operators reporting	2,363			
Operators by age					
Under 55 years	operators reporting	798			
55 to 64 years	operators reporting	1,126			
65 or more years	operators reporting	3,474			
Operators not reporting age	number	4

State Table 17.—FARMS AND FARM CHARACTERISTICS BY ECONOMIC CLASS OF FARM: CENSUS OF 1959

Data are based on reports for only a sample of farms. See text.

Item (For definitions and explanations, see text)	Total all farms	Economic class			
		Commercial farms			
		Total	Class I	Class II	Class III
FARMS, ACREAGE, AND VALUE					
Farms.....	99,232	66,459	14,526	12,035	13,632
Percent distribution.....	100.0	67.4	14.6	12.1	13.7
Land in farms.....	36,853,851	34,861,613	20,474,958	4,828,734	4,079,927
Percent distribution.....	100.0	94.6	55.6	13.1	11.1
Average size of farm.....	371.4	520.4	1,409.5	401.2	298.3
Value of land and buildings					
Average per farm.....	107,368	140,180	345,834	136,478	90,124
Average per acre.....	379.21	360.96	345.37	414.55	306.19
Land in farms according to use					
Cropland harvested.....	76,784	54,712	11,861	10,053	11,489
1 to 9 acres.....	8,012,806	7,807,444	5,311,917	1,049,053	777,530
10 to 19 acres.....	25,039	8,488	542	754	1,043
20 to 29 acres.....	11,882	8,625	275	1,695	1,695
30 to 39 acres.....	6,462	5,446	251	680	1,686
40 to 49 acres.....	8,954	8,246	845	374	2,761
50 to 99 acres.....	9,534	9,180	1,675	2,873	2,597
100 to 199 acres.....	6,577	6,473	2,380	1,244	1,444
200 to 499 acres.....	5,167	5,136	3,445	294	422
500 to 999 acres.....	1,948	1,840	1,597	48	91
1,000 or more acres.....	1,201	1,198	1,111	61	15
Cropland used only for pasture.....	20,921	14,620	3,241	2,413	2,791
1 to 9 acres.....	3,034,741	2,838,264	1,385,650	471,191	425,718
10 to 19 acres.....	17,905	14,014	3,889	4,081	2,442
20 to 29 acres.....	1,416,450	1,784,177	1,008,777	81,403	218,190
30 to 39 acres.....	6,336	5,524	1,620	1,026	965
40 to 49 acres.....	1,103,148	1,079,718	633,170	190,751	128,463
50 to 99 acres.....	1,385	1,102	285	165	212
100 to 199 acres.....	1,05,140	103,497	39,113	11,711	20,078
200 to 499 acres.....	11,963	9,441	1,684	1,734	1,730
500 to 999 acres.....	682,162	607,267	336,494	99,041	67,649
1,000 or more acres.....	4,003,844	3,493,170	1,351,938	653,295	676,000
Woodland pastured.....	4,349	4,321	412	328	395
1 to 9 acres.....	362,512	706,749	337,647	139,751	133,641
10 to 19 acres.....	13,157	13,551	3,492	2,231	2,444
20 to 29 acres.....	27,734,729	16,447,321	10,369,118	1,970,649	1,644,401
30 to 39 acres.....	8,885	5,824	1,164	1,107	940
40 to 49 acres.....	254,556	210,723	466,611	119,344	89,555
50 to 99 acres.....	74,206	59,748	13,436	5,914	11,346
100 to 199 acres.....	7,416,714	7,014,320	4,039,940	949,769	634,495
200 to 499 acres.....	64,285	49,976	11,183	5,205	10,463
500 to 999 acres.....	6,002,625	5,086,251	4,418,415	770,749	490,479
Land use practices					
Cropland in cover crops.....	1,749	1,433	87	426	556
1 to 9 acres.....	181,454	177,185	129,342	11,417	14,676
Cropland used for grain or row crops farms on the contour.....	1,493	1,236	516	238	192
1 to 9 acres.....	268,739	265,359	193,910	36,040	17,865
Land in strip-cropping systems for soil erosion control.....	106	42	43	14	9
1 to 9 acres.....	12,275	7,977	12,487	4,110	14,088
System of terraces on crop and pasture land.....	1,466	1,106	128	100	214
1 to 9 acres.....	9,102	86,487	41,697	11,794	18,421
FARM OPERATORS BY AGE					
Operators reporting age.....	97,550	65,708	14,772	11,871	13,465
Under 25 years.....	847	651	79	147	112
25 to 34 years.....	9,511	6,130	1,715	1,325	1,276
35 to 44 years.....	22,647	15,655	4,476	3,269	3,121
45 to 54 years.....	16,444	12,655	4,191	3,193	3,865
55 to 64 years.....	2,642	1,489	446	329	329
65 or more years.....	16,454	8,813	1,269	1,248	1,882
Average age.....	51.3	50.4	47.7	48.1	50.5
OFF-FARM WORK AND OTHER INCOME					
Farm operators—					
Working off their farms, total.....	45,706	22,685	2,140	3,042	4,907
1 to 99 days.....	4,434	7,761	818	1,016	1,906
100 to 199 days.....	5,127	3,373	387	465	806
200 or more days.....	36,145	11,551	1,935	1,161	2,105
With other members of family working off farm.....	13,477	6,626	397	795	1,444
With income from sources other than farm operated and off-farm work.....	24,852	11,979	1,335	1,655	2,408
With other income of family exceeding value of agricultural products sold.....	31,126	10,105	511	812	1,065
Operators not working off their farms or not reporting as to work off their farms.....	53,526	44,444	12,336	7,993	8,725
With other members of family working off farm.....	7,761	5,469	1,038	1,371	1,332
With income from sources other than farm operated and off-farm work.....	25,896	15,004	2,446	3,143	3,461
With other income of family exceeding value of agricultural products sold.....	10,758	3,440	303	384	627
FARMS BY SIZE					
Under 10 acres.....	24,120	3,886	913	1,474	1,477
10 to 19 acres.....	34,776	22,708	1,824	2,449	5,286
20 to 29 acres.....	6,463	5,446	275	1,320	1,320
30 to 39 acres.....	1,307	7,155	814	1,347	1,522
40 to 49 acres.....	4,619	3,932	919	1,216	955
50 to 59 acres.....	3,906	3,145	921	1,089	541
60 to 69 acres.....	4,607	1,464	631	679	301
70 to 79 acres.....	1,811	1,600	746	351	187
80 to 89 acres.....	5,816	5,038	2,465	764	509
90 to 99 acres.....	4,451	4,030	2,162	476	406
1,000 to 1,999 acres.....	2,830	2,644	1,147	444	432
2,000 or more acres.....	3,142	3,088	1,553	537	516

See Explanatory notes at end of table.

State Table 17.—FARMS AND FARM CHARACTERISTICS BY ECONOMIC CLASS OF FARM: CENSUS OF 1959—Continued

Data are based on reports for only a sample of farms. See text.

Item (For definitions and explanations, see text)	Economic class—Continued					
	Commercial farms—Continued			Other farms		
	Class IV	Class V	Class VI	Part-time	Part-retirement	Abnornal
FARMS, ACREAGE, AND VALUE						
Farms.....	13,335	10,311	3,090	24,341	7,782	180
Land in farms.....	1,833,344	2,020,560	403,690	1,242,684	498,154	251,400
Percent distribution.....	100	100	100	100	100	100
Average size of farms.....	212.5	215.4	137.1	51.1	64.0	1,396.7
Value of land and buildings

Telephone.....	farms reporting... 1,436	1,171	1,432	311	1,336
Home freezer.....	farms reporting... 1,436	1,171	1,432	311	1,336
Milking machine.....	farms reporting... 1,436	1,171	1,432	311	1,336
Electric milk cooler.....	farms reporting... 1,436	1,171	1,432	311	1,336
Crop drier (for grain, forage, or other crops).....	farms reporting... 1,436	1,171	1,432	311	1,336
Power-operated elevator, conveyor, or blower.....	farms reporting... 1,436	1,171	1,432	311	1,336
Farms by kind of road on which located					
Hard surface.....	farms reporting... 1,436	1,171	1,432	311	1,336
Gravel, shell, or shale.....	farms reporting... 1,436	1,171	1,432	311	1,336
Dirt or unimproved.....	farms reporting... 1,436	1,171	1,432	311	1,336
Less than 1 mile to a hard-surface road.....	farms reporting... 1,436	1,171	1,432	311	1,336
1 to 4 miles to a hard-surface road.....	farms reporting... 1,436	1,171	1,432	311	1,336
5 to 9 miles to a hard-surface road.....	farms reporting... 1,436	1,171	1,432	311	1,336
10 or more miles to a hard-surface road.....	farms reporting... 1,436	1,171	1,432	311	1,336
FARM LABOR, WEEK PRECEDING ESTIMATION					
Hired workers.....	farms reporting... 1,436	1,171	1,432	311	1,336
Regular hired workers—employed 15 or more days.....	farms reporting... 1,436	1,171	1,432	311	1,336
	number... 1,436	1,171	1,432	311	1,336
Farms reporting by number of regular hired workers.....	farms reporting... 1,436	1,171	1,432	311	1,336
1 hired worker.....	farms reporting... 1,436	1,171	1,432	311	1,336
2 hired workers.....	farms reporting... 1,436	1,171	1,432	311	1,336
3 or 4 hired workers.....	farms reporting... 1,436	1,171	1,432	311	1,336
5 to 9 hired workers.....	farms reporting... 1,436	1,171	1,432	311	1,336
10 or more hired workers.....	farms reporting... 1,436	1,171	1,432	311	1,336
RESIDENCE OF FARM OPERATOR					
Residing on farm operated.....	farms reporting... 1,436	1,171	1,432	311	1,336
Not residing on farm operated.....	farms reporting... 1,436	1,171	1,432	311	1,336
Operators not reporting no residence.....	farms reporting... 1,436	1,171	1,432	311	1,336
USE OF COMMERCIAL FERTILIZER AND LIME					
Commercial fertilizer and fertilizing materials used during the year.....	farms reporting... 1,436	1,171	1,432	311	1,336
Dry materials.....	farms reporting... 1,436	1,171	1,432	311	1,336
Liquid materials.....	farms reporting... 1,436	1,171	1,432	311	1,336
Crops on which applied.....	farms reporting... 1,436	1,171	1,432	311	1,336
Hay and/or ripened pasture.....	farms reporting... 1,436	1,171	1,432	311	1,336
Dry materials.....	farms reporting... 1,436	1,171	1,432	311	1,336
Liquid materials.....	farms reporting... 1,436	1,171	1,432	311	1,336
Other pasture (not ripened).....	farms reporting... 1,436	1,171	1,432	311	1,336
Dry materials.....	farms reporting... 1,436	1,171	1,432	311	1,336
Liquid materials.....	farms reporting... 1,436	1,171	1,432	311	1,336
Other crops.....	farms reporting... 1,436	1,171	1,432	311	1,336
Dry materials.....	farms reporting... 1,436	1,171	1,432	311	1,336
Liquid materials.....	farms reporting... 1,436	1,171	1,432	311	1,336

See footnote at end of table.

State Table 23.—SAMPLING RELIABILITY OF ESTIMATED TOTALS FOR COUNTY AND STATE BY NUMBER OF FARMS REPORTING, BY LEVELS

If the estimated number of farms reporting is—

Level	Percent	Level	Percent	Level	Percent	Level	Percent	Level	Percent
1	6.8	2	4.8	3	3.6	4	2.1	5	1.5
6	1.0	7	0.8	8	0.6	9	0.5	10	0.4

The sampling reliability of the estimated totals for county and state should be obtained from table 23 by multiplying the percent given in the table by the number of all farms in the universe. A better approximation to the sampling reliability

When the number of farms reporting is 75 percent of all farms, multiply the percent error by 0.75. When the number of farms reporting is 40 percent of all farms, multiply the percent error by 0.40. When the number of farms reporting is 20 percent of all farms, multiply the percent error by 0.20.

[To determine the sampling reliability for an item, use this table to determine which of the 4 levels of sampling reliability to use in State Table 23. To use State Table 23, it is necessary to refer also to county or State table to obtain the number of farms reporting for the item.]

[To determine the sampling reliability for an item, use this table to determine which of the 4 levels of sampling reliability to use in State Table 23. To use State Table 23, it is necessary to refer also to county or State table to obtain the number of farms reporting for the item.]

The excess of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated in the county in which the headquarters is located, even though a part of the farm may be situated in an adjoining county.

reports for only a sample of farms. See text.

County Table 1.—FARMS, ACREAGE, AND VALUE: CENSUSES OF 1959 AND 1954—Continued

[Data for items shown in italics are based on reports for only a sample of farms. See text.]

	Item (For definitions and explanations, see text)	Secona	Stanislaus	Sutter	Tehama	Trinity	Tulare	Tuolumne	Ventura	Yolo	Yuba
FARMS, ACREAGE, AND VALUE											
1	Farms	number 1960	4,695	6,000	1,712	1,455	165	6,141	308	1,863	700
2	Decrease in farms due to change in farm-inventory 1954 to 1959	1964	*,831	6,629	1,787	1,707	215	6,634	352	1,856	804
3	Approximate land area	number	742	138	58	84	47	169	44	13	32
4	Proportion of farms	percent 1959	1,010,560	960,000	1,388,480	1,904,640	2,042,240	3,096,320	1,455,360	1,184,640	407,680
5	Land in farms	acres 1959	763,426	885,136	1,047,776	1,524,377	1,644,767	1,946,233	946,233	779,379	261,589
6	Proportion of farms	percent 1959	763,426	885,136	1,047,776	1,524,377	1,644,767	1,946,233	946,233	779,379	261,589
7	Land in farms	acres 1954	761,832	884,726	1,047,776	1,524,377	1,644,767	1,946,233	946,233	779,379	261,589
8	Proportion of farms	percent 1959	761,832	884,726	1,047,776	1,524,377	1,644,767	1,946,233	946,233	779,379	261,589
9	Proportion of farms	percent 1954	761,832	884,726	1,047,776	1,524,377	1,644,767	1,946,233	946,233	779,379	261,589
10	Value of land and buildings	dollars 1959	53,386	71,263	121,982	80,596	54,998	110,101	43,165	230,537	78,007
11	Average per farm	dollars 1959	32,035	48,318	79,760	57,877	27,981	57,913	37,645	114,288	52,006
12	Average per acre	dollars 1959	42.0	54.6	76.8	38.0	34.0	29.4	39.6	147.0	197.7
13	Proportion of farms reporting value	percent 1959	90	84	79	90	84	90	81	70	88
14	Proportion of farms reporting value	percent 1954	81	84	79	88	78	84	76	79	95
Land in farms according to use											
15	Cropland harvested	farms reporting 1959	2,709	4,663	1,591	973	164	5,351	128	1,743	688
16	Cropland harvested	farms reporting 1954	3,170	4,865	1,591	1,153	137	5,351	162	1,718	1,039
17	Acres 1959	acres 1959	280,647	299,037	69,138	2,388	5,034	1,077	127,520	366,282	49,634

88	System of terraces on crop and pasture land	farms reporting 1954

The extent of farm acreage over approximate land area is due to the fact that the entire acreage of a farm is tabulated in the county in which the headquarters is located, even though a part of the farm may be situated in an adjoining county.

County Table 4.—CHARACTERISTICS OF COMMERCIAL

[Data are based on reports for only]

Item (For definitions and explanations, see text)	The State	Alameda	Alpine	Amador	Butte	Calaveras	Colusa	
Farms, acreage, and value								
1 All commercial farms.....	number	16,937	144	133	1,440	157	593	
2 Land in farms.....	acres	6,884,370	291,769	9,370	193,099	638,217	291,187	474,524
3 Average size of farm.....	acres	571.1	4,481.1	3,123.3	1,371.9	443.2	1,854.7	800.2
4 Value of land and buildings.....	average per acre, dollars	150,330	185,780	46,315	137,467	123,224	93,171	169,368
5 Value of land and buildings.....	average per acre, dollars	132,500	156,780	136,780	132,500	75,750	75,750	250.00
6 Unplanted harvested.....	farms reporting	64,691	504	2	83	1,324	76	464
7.....	acres	7,814,867	41,336	570	3,444	206,179	3,146	225,538
Farm operators								
8 Working off their farms, total.....	number	22,671	173	1	36	708	64	184
9 Full or more days.....	number	16,911	116	...	476	476	43	94
10 With other income of family exceeding value of agricultural products sold.....	number	14,065	118	...	35	461	41	92
11 By tenant.....	number	60,231	146	1	36	918	65	247
12 Full owner.....	number	16,067	207	2	77	417	87	128
13 Managers.....	number	1,813	13	...	17	17	7	7
14 All tenant.....	number	8,524	110	...	18	167	12	111
Specified equipment and facilities								
15 Grain cranes.....	farms reporting	5,452	62	...	5	784	6	264
16 Hand saws.....	number	8,891	75	610	6	69
17 Corn pickers.....	farms reporting	723	2	37	...	1
18.....	number	993	2	40	...	1
19 Pickup balers.....	farms reporting	7,704	70	...	13	142	...	78
20.....	number	8,542	75	...	13	162	...	93
21 Mowers.....	farms reporting	63,046	507	3	111	1,217	143	514
22.....	number	110,203	1,071	3	195	2,590	199	1,419
23 Tractors other than garden.....	farms reporting	52,489	486	3	102	1,200	100	529
24.....	number	130,855	1,540	11	157	1,165	132	1,735
25 Automobiles.....	farms reporting	60,130	720	3	127	1,246	100	530
26.....	number	90,327	833	3	191	1,909	136	805
27 Telephone.....	farms reporting	60,454	784	3	111	1,326	116	611
28 Hand tractor.....	farms reporting	91,135	1,117	3	96	1,007	106	444
29 Milking machine.....	farms reporting	14,001	30	...	6	167	...	46
30 Electric milk cooler.....	farms reporting	5,089	14	...	1	79	...	35
Farms by kind of road on which located								
31 Hard surface.....	farms reporting	53,434	455	2	96	1,203	46	427
32 Gravel, shell, or shale.....	farms reporting	2,246	42	...	17	173	15	112
33 Dirt or unimproved.....	farms reporting	6,209	111	...	15	...	40	26
Farm labor, week preceding enumeration								
34 Family and of hired workers.....	farms reporting	87,768	660	3	124	1,246	156	569
35 Family workers, including operator.....	farms reporting	7,438	175	3	111	1,246	156	476
36 Operators working 1 or more hours.....	persons	53,691	616	3	111	1,176	153	509
37 Total number of operator's family working 15 or more hours.....	farms reporting	18,436	230	2	86	488	39	218
38.....	persons	74,712	116	2	67	710	46	181
39 Regular hired workers employed 150 or more days.....	farms reporting	20,226	134	3	17	290	16	171
40.....	persons	78,791	1,580	9	1	791	31	437
Livestock and poultry on farms								
41 Cattle and calves.....	farms reporting	1,144	...	3	112	60	177	183
42.....	number	3,277,346	8,138	1,315	10,880	44,758	20,948	18,792
43 Milk cows.....	farms reporting	14,466	96	2	29	311	72	84
44.....	number	94,282	9,605	89	89	1,021	137	1,346
45 Horses and ponies.....	farms reporting	43,799	1,138	3	12	128	117	317
46.....	number	7,620	1,177	32	27	84	421	43
47 Hoses and pigs.....	farms reporting	1,462	59	1	30	13	31	138
48.....	number	182,668	17,117	117	978	14,911	496	5,522
49 Chickens, 14 weeks old and over.....	farms reporting	184,481	1,437	3	47	24,911	74	192
50.....	number	8,122,675	8,616	78	5,245	242,728	1,968	9,836
Livestock and poultry sold								
51 Cattle, not counting calves, sold alive.....	farms reporting	27,063	176	3	86	540	109	109

County Table 4.—CHARACTERISTICS OF COMMERCIAL

[Data are based on reports for only]

	Item (For definitions and explanations, see text)	Madera	Marin	Mariposa	Mendocino	Merced	Modoc	Mono
Farms, acreage, and value								
1	All commercial farms..... number	1,346	256	146	597	2,719	495	18
2	Land in farms..... acres	82,019	223,334	260,781	96,105	959,362	1,018,562	86,048
3	Average size of farm..... acres	61.7	372.0	1,775.4	1,618.1	342.0	1,097.7	4,780.4
4	Value of land and buildings..... average per farm, dollars	129,221	214,505	83,777	115,755	91,585	107,212	243,929
5	Average per acre, dollars.....	250.79	242.31	71.54	67.42	381.96	70.30	106.80
6	Cropland harvested..... farms reporting..... acres	1,059	98	5,878	1,277	22,566	376,133	130,384
7	Farm operators							
8	Working off their farms, total..... number	431	56	41	438	808	201	6
9	120 or more days..... number	223	34	26	153	434	103	3
10	With other means of family exceeding value of agricultural products sold..... number	204	15	35	146	379	81	4
By tenure								
11	Full owners..... number	761	116	71	392	1,516	305	9
12	Part owners..... number	407	39	43	133	712	230	8
13	Managers..... number	12	0	14	22	6	16	5
14	All tenants..... number	156	95	18	30	429	44	1
Specified equipment and facilities								
15	Grain machines..... farms reporting..... number	94	3	8	32	111	229	1
16	Corn pickers..... farms reporting..... number	139	7	8	33	181	289	1
17	Pick-up trailers..... farms reporting..... number	92	2	52
18	Motorcycles..... farms reporting..... number	107	2	88
19	Tractors other than garden..... farms reporting..... number	231	31	4	81	617	216	12
20	Automobiles..... farms reporting..... number	1,189	250	124	516	2,134	475	18
21	Tractors other than garden..... farms reporting..... number	1,197	217	71	465	3,305	1,000	42
22	Tractors other than garden..... farms reporting..... number	1,187	213	71	485	2,465	492	14
23	Automobiles..... farms reporting..... number	3,209	413	123	837	5,721	1,215	34
24	Motorcycles..... farms reporting..... number	1,500	246	121	518	2,521	237	17
25	Tractors other than garden..... farms reporting..... number	1,243	205	71	497	2,507	302	32
26	Telephone..... farms reporting..... number	1,193	228	44	524	2,461	388	15
27	House freezer..... farms reporting..... number	946	181	101	406	1,821	413	11
28	Milking machine..... farms reporting..... number	236	185	5	64	1,072	15	...
29	Electric milk cooler..... farms reporting..... number	121	156	...	38	472	13	...
Farms by kind of road on which located								
30	Hard surface..... farms reporting..... number	1,117	132	65	340	2,180	230	7
31	Gravel, shell, or shale..... farms reporting..... number	29	26	33	107	155	202	...
32	Dirt or unimproved..... farms reporting..... number	193	70	47	142	191	45	...
Farm labor, week preceding enumeration								
33	Family and or hired workers..... farms reporting..... persons	1,236	250	138	542	2,363	401	11
34	Family workers, including operator..... farms reporting..... persons	1,215	244	136	521	2,270	374	14
35	Operators working 12 or more hours..... farms reporting..... persons	1,177	219	136	486	2,233	362	14
36	Unpaid members of operator's family working 15 or more hours..... farms reporting..... persons	389	108	49	154	927	147	7
37	Regular hired workers (employed 150 or more days)..... farms reporting..... persons	568	184	63	238	1,388	183	7
38	Regular hired workers (employed 150 or more days)..... farms reporting..... persons	1,301	343	25	137	2,343	230	13
Livestock and poultry on farms								
39	Cattle and calves..... farms reporting..... number	659	1,100	317	1,601	316	4,556	16
40	Milk cows..... farms reporting..... number	85,876	50,749	15,491	26,367	201,597	80,447	...
41	Horses and or mules..... farms reporting..... number	211	36	14	1,234	221	3	...
42	Horses and or mules..... farms reporting..... number	113,142	8,451	1,071	5,672	63,261	666	...
43	Hogs and pigs..... farms reporting..... number	1,142	360	397	838	1,726	1,367	172
44	Hogs and pigs..... farms reporting..... number	124	35	33	119	274	113	...
45	Chickens, 4 months old and over..... farms reporting..... number	2,055	775	1,670	3,596	5,597	5,586	...
46	Chickens, 4 months old and over..... farms reporting..... number	56,365	159,685	87,812	21,145	466,133	15,399	98
Livestock and poultry sold								
47	Cattle, not counting calves, sold alive..... farms reporting..... number	445	133	76	209	1,166	238	14
48	Calves sold alive..... farms reporting..... number	39,870	8,044	5,593	6,747	86,747	26,836	1,267
49	Horses and or mules, sold alive..... farms reporting..... number	331	203	53	189	1,162	139	10
50	Hogs and pigs sold alive..... farms reporting..... number	17,399	17,960	2,213	4,366	26,615	10,746	1,477
51	Sheep and lambs sold alive..... farms reporting..... number	48	11	26	79	75	71	...
52	Chickens including broilers, sold..... farms reporting..... number	1,479	757	2,125	4,282	7,337	1,011	...
53	Chickens including broilers, sold..... farms reporting..... number	14,025	9,410	1,563	5,440	31,670	22,149	16,520
54	Livestock and poultry products sold..... farms reporting..... number	50	37	33	38	211	34	...
55	Chickens, eggs, sold..... farms reporting..... dozens	242,510	67,742	657,365	7,423	1,591,985	1,439	...
56	Milk and cream, sold..... farms reporting..... dozens	45	38	24	67	140	62	1
57	Milk and cream, sold..... farms reporting..... dozens	823,185	1,072,710	737,707	167,445	5,874,520	127,612	50
58	Wool..... farms reporting..... pounds	4,384,446	11,680,734	1,677	1,057,474	20,388,051	45,969	...
59	Eggs..... farms reporting..... pounds	74	52	29	79	132	120	7
Specified farm expenditures								
60	Any specified farm expenditures..... farms reporting..... dollars	194,088	124,851	15,518	818,434	336,510	251,936	195,085
61	Food for livestock and poultry..... farms reporting..... dollars	1,346	256	146	597	2,714	455	18
62	Purchase of livestock and poultry..... farms reporting..... dollars	25,362,144	10,555,367	2,807,472	3,993,658	47,956,028	5,222,266	328,073
63	Machine hire..... farms reporting..... dollars	6,143,926	7,833,037	1,891,260	3,000,678	16,660,109	1,635,470	38,561
64	Fuel..... farms reporting..... dollars	5,646,446	7,020,051	1,026,873	1,026,873	11,819,716	1,125,986	112,986
65	Gasoline and other petroleum fuel and oil for the farm, including..... farms reporting..... dollars	1,215,194	55,391	10,441	159,367	2,132,400	252,087	20,830
66	Soap, kerosene, kerosene, and kerosene..... farms reporting..... dollars	8,569,447	1,265,743	153,916	1,265,743	13,646,708	1,291,539	120,516
67	Gasoline and other petroleum fuel and oil for the farm, including..... farms reporting..... dollars	1,407,436	156,421	69,195	34,531	4,701,848	364,050	34,255
68	Seeds, bulbs, plants, and trees..... farms reporting..... dollars	377,701	62,722	6,193	110,126	237,094	221,398	1,315
Crops harvested								
69	Wheat..... farms reporting..... bushels	34	40	14	11	53	275	...
70	Barley..... farms reporting..... bushels	11,439	2,003	53	44	3,514	1,448	...
71	Rye..... farms reporting..... bushels	259,560	7,366	645	3,777	16,427	41,455	...
72	Oats..... farms reporting..... bushels	171	1	...	31
73	Corn..... farms reporting..... bushels	58,303	90	...	44,837	21,804
74	Sorghum..... farms reporting..... bushels	616,479	1,000	...	3,876	87,583	381,897	...
75	Rice..... farms reporting..... bushels	40
76	Cotton..... farms reporting..... bushels	3,747	12,677
77	Cotton..... farms reporting..... bushels	1,222,001	405,713
78	Tobacco..... farms reporting..... bushels	760
79	Tobacco..... farms reporting..... bushels	44,259	31,574
80	Tobacco..... farms reporting..... bushels	92,076	61,745
81	Tobacco..... farms reporting..... bushels	75,401	79,594	78,324	2,905
Value of products sold, other than								
82	Irish and sweet potatoes..... farms reporting..... dollars	23	5	1	1	26	5	...
83	Land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees..... farms reporting..... dollars	224,104	25,446	11,400	2,000	41,160	39,000	...
84	Land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees..... farms reporting..... dollars	552	22	17	283	1,003	48	1
85	Land in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees..... farms reporting..... dollars	30,014	59	174	8,519	45,493	80	2

Does not include data for farms with less than 20 trees and grapevines.

a sample of farms. See text

County Table 4.—CHARACTERISTICS OF COMMERCIAL

[Data are based on reports for 1911]

	Butte (for definitions and explanations, see text)	Contra Costa	San Mateo	San Benito	Santa Clara	Santa Cruz	Shasta	Sierra
Farms, acreage and value								
All commercial farms	number	4,078	7,017	7,953	5,421	4,117	3,950	26
Land in farms	acres	1,111,476	1,111,476	1,111,476	1,111,476	1,111,476	1,111,476	85,839
Average size of farm	acres	272.8	158.5	140.0	205.0	270.0	281.0	3,301.5
Value of land and buildings	dollars per farm	1,111,476	1,111,476	1,111,476	1,111,476	1,111,476	1,111,476	134,786
Equipped harvest land	acres	1,111,476	1,111,476	1,111,476	1,111,476	1,111,476	1,111,476	1,111,476
Farm operators								
Working off their farms, full time	number	176	176	176	176	176	176	176
Working on their farms, full time	number	176	176	176	176	176	176	176
Part other income of farms exceeding value of agricultural products sold	number	176	176	176	176	176	176	176
By owner	number	176	176	176	176	176	176	176
Part owner	number	176	176	176	176	176	176	176
Manager	number	176	176	176	176	176	176	176
All tenants	number	176	176	176	176	176	176	176
Specified equipment and facilities								
Grain elevators	number	176	176	176	176	176	176	176
Corn pickers	number	176	176	176	176	176	176	176
Harrows	number	176	176	176	176	176	176	176
Plow-pickers	number	176	176	176	176	176	176	176
Motor trucks	number	176	176	176	176	176	176	176
Tractors other than garden	number	176	176	176	176	176	176	176
Automobiles	number	176	176	176	176	176	176	176
Telephones	number	176	176	176	176	176	176	176
House fixtures	number	176	176	176	176	176	176	176
Milking machines	number	176	176	176	176	176	176	176
Electric milk cooler	number	176	176	176	176	176	176	176
Farms by kind of road on which located								
Hard surface	number	176	176	176	176	176	176	176
Gravel, shell, or shale	number	176	176	176	176	176	176	176
Dirt or unimproved	number	176	176	176	176	176	176	176
Farm labor, week preceding enumeration								
Family and on hired workers	number	176	176	176	176	176	176	176
Family workers, including operator	number	176	176	176	176	176	176	176
Operator working 1 or more hours	number	176	176	176	176	176	176	176
Equipped numbers of operator's family working 15 or more hours	number	176	176	176	176	176	176	176
Regular hired workers employed 15 or more hours	number	176	176	176	176	176	176	176
Livestock and poultry on farms								
Cattle and calves	number	176	176	176	176	176	176	176
Milk cows	number	176	176	176	176	176	176	176
Horses and mules	number	176	176	176	176	176	176	176
Hogs and pigs	number	176	176	176	176	176	176	176
Chickens, turkeys, old and young	number	176	176	176	176	176	176	176
Livestock and poultry sold								
Cattle, not counting calves, sold alive	number	176	176	176	176	176	176	176
Calves sold alive	number	176	176	176	176	176	176	176
Hogs and pigs sold alive	number	176	176	176	176	176	176	176
Sheep and lambs sold alive	number	176	176	176	176	176	176	176
Chickens, including broilers, sold	number	176	176	176	176	176	176	176
Livestock and poultry products sold								
Chicken eggs sold	number	176	176	176	176	176	176	176
Milk and cream sold	dollars	176	176	176	176	176	176	176
Wool	dollars	176	176	176	176	176	176	176
Specified farm expenditures								
For feed for livestock and poultry	dollars	176	176	176	176	176	176	176
For purchase of livestock and poultry	dollars	176	176	176	176	176	176	176
For farm labor	dollars	176	176	176	176	176	176	176
For hired labor	dollars	176	176	176	176	176	176	176
For fuel, oil, and other petroleum products used for the farm business	dollars	176	176	176	176	176	176	176
For seed, bullock, plow, and other	dollars	176	176	176	176	176	176	176
Crops harvested								
Wheat	number	176	176	176	176	176	176	176
Barley	number	176	176	176	176	176	176	176
Oats	number	176	176	176	176	176	176	176
Hay	number	176	176	176	176	176	176	176
Alfalfa	number	176	176	176	176	176	176	176
Other crops	number	176	176	176	176	176	176	176

a sample of farms. See text

County Table 5.—FARMS REPORTING BY OFF-FARM WORK; AND FARMS BY TENURE OF OPERATOR,
CENSUSES OF 1959

Most data for 1959 are based on reports

for only a sample of farms. See text.

* Reported in small fractions.

† Figures include data from farms with less than 40 trees and grape vines.

* For 1954, harvested in 1955-56 from the 11 to 11,699; for 1955, harvested in 1955-56 from the bloom of 1953.

APPENDIX

The Questionnaire

Index to tables

(279)

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 142, 221-4, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. The census report cannot be used for purposes of taxation, investigation, or regulation.

U. S. DEPARTMENT OF COMMERCE—BUREAU OF THE CENSUS
PARSONS, KANSAS
A1 CENSUS OF AGRICULTURE QUESTIONNAIRE: 1959

Section I.—PERSON NOW IN CHARGE

1. What is your name (person in charge)?
(First name) (Middle initial) (Last name)

2. What is your mail address?
(House or street number) (Post office) (County) (State)

Section II.—OWNERSHIP

OWNED LAND. Include all lands and tracts of land owned, regardless of where located even though these are considered separate units, also cropland, pastureland, woodland, and wasteland.
3. How many acres do you own? (If no land is owned, mark X in the square for "None.") Acres

LAND RENTED OR LEASED FROM OTHERS. Include all land and tracts of land rented or leased by you regardless of where located. Include any separate fields, meadows, pastureland, woodland, and wasteland. Also include leased Federal, State, and railroad land. Do not include land used under a Government permit.
4. How many acres do you rent from others? Include acres worked on shares. None (If "None," mark X and skip to question [2].) Acres

(a) What is the name and address of each landlord and the number of acres rented or worked on shares for each?
(1) Name of landlord Acres
(2) Mail address (Post office and State) Acres
(3) Name of landlord Acres
(4) Mail address (Post office and State) Acres

LAND MANAGED FOR OTHERS.
5. How many acres do you operate for others as a hired manager? None Acres (Enter the name and address of employer under question 4(a).)

LAND RENTED OR LEASED TO OTHERS. Include any separate fields and land rented to others. Include land worked on shares by others. Do not include land leased to the Government under the Soil Bank.
6. How many acres do you rent to others? None Acres (If "None," mark X and skip to question [7].)

(a) Of the acres rented to others, how many are owned by you? None Acres

ACRES IN THIS PLACE:
7. Adding acres owned and acres rented from others, then subtracting acres rented to others, we get Acres in this place
(Question 3 plus question 4 minus question 6; if managed, question 5 minus question 6.)

LOCATION OF LAND
8. Is any of this land located in another county? No Yes
(If "Yes," mark X and skip to question [9].) Acres
(a) How many acres are in your county? Acres
(b) Give names of other counties and acres located in each: (Name of county) (Acres)

Section III.—CROPS HARVESTED THIS YEAR, 1959

Report all crops harvested or to be harvested this year from these (read answer for question 7) acres. If you rent or work land for others on shares include landlord's share.

CORN. Include the landlord's share as sold if taken from this place.
9. Was any corn harvested for any purpose this year? (If "No," mark X and skip to question [10].) No Yes
(Answer these questions, if "Yes.") Acres

(1) (2) (3)
How many acres were or will be harvested? How much was or will be harvested? How much of this year's crop was or will be sold?

10. Corn for all purposes? (Do not include sweet corn or popcorn.) Acres Bu Bu
(70 lb ear corn or 56 lb shelled corn = 1 bu.)
(a) Corn for silage? Acres Tons Tons
(100 lb ear corn or 160 lb shelled corn = 1 ton)

(b) Corn hogged or grazed, or cut for green or dry fodder (Do not include or separate).
(The total of the acres for questions (a), (b), and (c) must equal the acres for question 10.) Acres Tons Tons

SORGHUMS FOR GRAIN AND FORAGE. Include the landlord's share as sold if taken from this place.
11. Were any sorghums harvested for any purpose this year? No Yes
(If "No," mark X and skip to question [12].) Acres

12. Sorghums for all purposes? (Include sorghums for grain, silage, forage, and pasture.) Acres Tons Tons
(a) Sorghums for grain or seed? Acres Tons Tons
(b) Sorghums for silage? Acres Tons Tons
(c) Sorghums cut for dry forage or hay, or hogged or grazed? Acres Tons Tons
(The total of the acres for questions (a), (b), and (c) must equal the acres for question 12.)

SMALL GRAINS. (Include the landlord's share as sold if taken from this place.) (Answer these questions, if "Yes.")
[21] Wheat? Acres Bu Bu
26. Oats for grain? Acres Bu Bu
29. Barley? Acres Bu Bu
31. Flaxseed? Acres Bu Bu
32. Rice? (Report bags on dry-weight basis) Acres Bu Bu
38. Other grains? Mustard seed? Rye? Safflower? Mixed grains? (If neither kind) Acres Bu Bu

HAY, STRIPS. (If two or more cuttings, count the acres only once but give total production of all cuttings. Include the landlord's share as sold if taken from this place.) (Answer these questions, if "Yes.")
39. Alfalfa and alfalfa mixtures for hay and for dehydrating? Acres Tons Tons
42. Clover, timothy, and mixtures of clover and grasses for hay? Acres Tons Tons
43. Oats, alone or mixed with vetch, wheat, barley, rye, wild oats, volunteer grains, or other small grains cut for hay? Acres Tons Tons
46. Wild hay (prairie, range, or marsh grass) cut for hay? Acres Tons Tons
47. Any other hay? (Include mallet, old meadows, Sudan grass, sweetclover) Acres Tons Tons

ALFALFA SEED AND OTHER FIELD SEEDS.
49. Were any alfalfa seed or other field seeds harvested this year? (If "No," mark X and skip to question [79].) (Answer these questions, if "Yes.") Acres Tons Pounds
(1) (2)
How many acres were or will be harvested? How much was or will be harvested? (Report trunks of an acre for alfalfa seed harvested or to be harvested.)

50. Alfalfa seed? Acres Tons Pounds
78. Other field seeds? (Alfalfa, clover, Ladino clover, Red clover, Ryegrass, Sudan grass, Bird-foot trefoil, Vetch) Give name Acres Tons Pounds

POTATOES, COTTON, DRY BEANS, AND SUGAR BEETS. (Answer these questions, if "Yes.")
[79] Irish potatoes for home use or for sale? (If less than 10 hundredweight or 1,000 pounds were harvested, do not report acres.) Acres Tens Cwt
80. Sweet potatoes for home use or for sale? (If less than 1,000 pounds were harvested, do not report acres.) Acres Tens Bales
81. Cotton? Acres Tens Bales
91. Dry lima beans? Acres Tons Tons
92. Other dry field and seed beans? (Blackeye, cranberry beans, pink, pinto, red kidney, small red, small white, etc.) Acres Tons Tons
94. Sugar beets for sugar? Acres Tons Tons

VEGETABLES FOR HOME USE AND FOR SALE. (If two or more plantings of the same crop were made, either on the same land or on different land, report the total harvested acres of the several plantings.)
105. Were any vegetables, sweet corn, or melons harvested this year for sale for fresh market, or to canners, growers, processors? No Yes
106. Were any vegetables, sweet corn, or melons harvested this year for home use? No Yes
Were any of the following vegetable crops harvested this year? (Answer these questions, if "Yes.") (Answer these questions, if "Yes.")
(1) (2) (3)
Acres harvested? Acres harvested? Acres harvested? (Report trunks of acres)

107. Tomatoes? Acres Tens Bu
108. Sweet corn? Acres Tens Bu
109. Cucumbers and pickles? Acres Tens Bu
110. Snap beans (bush and pole types)? Acres Tens Bu
111. Watermelons? Acres Tens Bu
112. Cabbage? Acres Tens Bu
113. Sweet peppers? Acres Tens Bu
117. Cantaloupes, honeydews, Persians, and muskmelons? Acres Tens Bu
120. Green lima beans? Acres Tens Bu
121. Squash? Acres Tens Bu
122. Cider apples, Bosc apples, Braeburn apples, and other apples? Acres Tens Bu
123. Dry onions? Acres Tens Bu
124. Asparagus? Acres Tens Bu
125. Carrots? Acres Tens Bu
126. Lettuce and romaine? Acres Tens Bu
131. Cauliflower? Acres Tens Bu
134. Celery? Acres Tens Bu
135. Broccoli? Acres Tens Bu
141. Others? (See list below) Give name Acres Tens Bu
142. What was the value of all vegetables sold this year? (Include the landlord's share. Do not include the value of Irish potatoes and sweet potatoes.)

BERRIES AND OTHER SMALL FRUITS									
[143] Were any berries or other small fruits harvested this year for sale? No <input type="checkbox"/> Yes <input type="checkbox"/>									
<i>If "Yes," mark X and skip to question [152]</i>									
<i>Answer these questions if "Yes"</i>									
[144] Strawberries*		(1) Acres harvested? Report (bushels of berries)		(2) Pounds harvested?		No <input type="checkbox"/> Yes <input type="checkbox"/>		Acres <input type="checkbox"/> Tons <input type="checkbox"/> Pounds <input type="checkbox"/>	
Were any of the following berry crops harvested this year?		145 Boysenberries*		151 (Other berries)* Blackberries* Loganberries* Raspberries* Youngberries*		Give name		*	
TREE FRUITS, NUTS AND GRAPES									
[152] Is there a total of 20 fruit and nut trees and grapevines on this place? No <input type="checkbox"/> Yes <input type="checkbox"/>									
<i>If "Yes," answer questions 153 through 197</i>									
153. How much land is in bearing and nonbearing fruit orchards, groves, vineyards, and planted nut trees?									
<i>Answer these questions if "Yes"</i>									
No <input type="checkbox"/> Yes <input type="checkbox"/>		Acres <input type="checkbox"/> Tons <input type="checkbox"/>		(1) What is the total of all trees and vines on this place? Report in bushels of fruit and nuts		(2) How many acres are planted this year? Report in bushels of fruit and nuts		(3) How much was harvested this year? Report in bushels of fruit and nuts	
Were any of the following kinds of fruit and nut trees on this place?									
154 Apples*									
156 (Longstone peaches)*									
157 Freestone peaches*									
159 Bartlett pears*									
160 Pears other than Bartlett*									
Grapes Report according to variety, irrespective of use									
162 Table grapes* Tokay, Malika, Emperor, etc.									
163 Raisin grapes* Thompson, Muscat, etc.									
164 Wine or juice grapes* Zinfandel, Alentejo, Carignane, etc.									
166 Plums*									
167 Prunes*									
168 Cherries*									
171 Apricots*									
172 Figs all varieties*									
173 Avocado*									
174 Nectarines*									
175 Olives*									
179 Walnuts, English*									
180 Almonds*									
184 Grapefruit*									
185 Valencia oranges*									
186 Navel oranges*									
189 Other oranges*									
190 Lemons*									
197 Other fruits and nuts*									
* Chestnuts, Dates, Guavas, Kumquats, Limes, Loquats, Peaches, Japanese persimmons, Pomegranates, Quinces									
Give name									
NURSERY AND GREENHOUSE PRODUCTS, FLOWERS AND VEGETABLE SEEDS AND PLANTS, AND BULBS									
[198] Were any nursery or greenhouse products, flowers or vegetable seeds or plants, flowers, or bulbs grown for sale this year? No <input type="checkbox"/> Yes <input type="checkbox"/>									
<i>If "No," mark X and skip to question [202]</i>									
<i>Answer these questions if "Yes"</i>									
No <input type="checkbox"/> Yes <input type="checkbox"/>		Acres <input type="checkbox"/> Tons <input type="checkbox"/>		(1) How much area was used for growing?		(2) What will be the value of sales in 1959?		\$ <input type="text"/>	
199. Nursery products, trees, shrubs, vines, ornamentals*									
200. (a) flowers, potted plants, floral greens, and bedding plants for sale?									
(b) Under glass*									
201. Vegetables grown under glass, flower seeds, vegetable seeds, vegetable plants, bulbs, mushrooms*									
(a) In open*									
(b) Under glass or in house?									

OTHER CROPS									
[202] Are there any other crops that were or will be harvested this year on this place? No <input type="checkbox"/> Yes <input type="checkbox"/>									
Broomcorn* Castor beans* Hops* Dry field and seed peas* Root and grain crops hogged or grazed* Grass silage* Sugar-beet seed* Sunflower seed*									
<i>If "Yes," answer for each crop</i>									
Name of crop*		Acres harvested*		Quantity harvested*		Unit of measure*		Value of sales*	
\$ <input type="text"/>									
Section IV—LAND USE THIS YEAR, 1959									
203. Acres in this place crops acres from question 7									
CROPLAND									
204. How many acres of land were in fields and tracts from which crops were harvested including hay cut this year?									
This may be obtained by adding the acres in the fields or tracts from which one or more crops were harvested or hay was cut this year; acres in nonbearing and bearing planted fruit trees, nuts, and grapes; and acres in nursery and greenhouse products.									
THIS SHADED SECTION IS TO BE FILLED BY CENSUS ENUMERATOR									
(a) Add acres of all crops listed in Sec. III and enter total here									
(b) From how many acres of land were two crops harvested this year?									
(c) Subtract the acres for (b) from (a) and enter difference here									
205. How many acres of cropland were used only for pasture or grazing this year?									
206. How many acres of cropland were in cultivated summer fallow this year?									
207. How many acres of cropland were used only for soil-improvement grasses and legumes not harvested and not pastured this year?									
208. How many acres of cropland have not been accounted for?									
(Include idle cropland and cropland on which all crops failed)									
WOODLAND (Include as woodland all wood lots and timber tracts, cutover and deforested land which has a crop for wood products and has not been improved for pasture)									
209. How many acres of woodland were pastured or grazed this year?									
210. How many acres of woodland were not pastured or grazed this year?									
OTHER LAND									
211. How many acres were in other pasture?									
(Not cropland, pasture and not woodland pasture)									
<i>If "None," mark X and skip to question [212]</i>									
a. Of this other pasture, how many acres are considered to be improved pasture?									
(Improve by liming, fertilizing, seeding, irrigating, draining, and controlling weeds and brush)									
[212] How many acres were in house lots, barn lots, lanes, roads, ditches, and wasteland?									
Add these acres (questions 204, 205, 206, 207, 208, 209, 210, 211, and 212) and enter the total here									
Section V—IRRIGATION									
213. Of the total land in this place reported in question 203, how many acres were irrigated this year?									
<i>If "None," mark X and skip to question [218]</i>									
214. How many acres in this place were irrigated by sprinklers this year?									
215. From how many acres of irrigated land were crops harvested this year?									
(b) Sum to include all irrigated land from which hay was cut and all irrigated land in both bearing and nonbearing fruit and nut crops and irrigated land from which volunteer crops were harvested)									
<i>If "None," mark X and skip to question [217]</i>									
216. What part of the land from which crops were harvested this year was irrigated?									
<i>If "All," mark X and skip to question [217]</i>									
<i>If "Part," give below, name and acres irrigated for each crop. If all orchard was irrigated, list "Orchard," and if all vegetables for sale, list "Vegetables."</i>									
Name of crop irrigated?		Acres irrigated?		Name of crop irrigated?		Acres irrigated?		(3)	
(1)		(2)		(3)		(4)		(5)	
[217] What percent of the irrigation water used on this place this year was obtained									
(a) From a well (pumped or flowing) or spring directly by this farm or from another farm?									
(b) From a stream, lake, drainage ditch, or reservoir directly by this farm or from another farm?									
(c) From a mutual or cooperative water or ditch company, irrigation district, or other irrigation organization? (Give name below)									
(The total for questions (a), (b), and (c) must = 100%)									
Name <input type="text"/>									

Section VI.—RACE, AGE, RESIDENCE, OFF-FARM WORK, AND OTHER INCOME			
<div style="display: flex; justify-content: space-between;"> <div> <p>[218] What is your race? (Mark one.)</p> <p>White <input type="checkbox"/> Negro <input type="checkbox"/> Other <input type="checkbox"/></p> </div> <div> <p>(1) (2) (3) What race?</p> </div> </div>			
<p>219. How old were you on your last birthday? No <input type="checkbox"/> Yes <input type="checkbox"/> Years _____</p>			
<p>220. Do you live on this place? No <input type="checkbox"/> Yes <input type="checkbox"/></p>			
<p>221. When did you begin to operate this place? Report month if you began to operate this place since January 1, 1959. Month _____ Year _____</p>			
<p>OFF-FARM WORK AND OTHER INCOME</p> <p>222. How many days this year did you work off your farm? Include work at a nonfarm job, business, profession, or on someone else's farm. Include days you expect to work off your farm between now and December 31, 1959. (Do not include exchange work.)</p> <p>(Mark one.)</p> <p>None <input type="checkbox"/> 1 to 9 days <input type="checkbox"/> 10 to 29 days <input type="checkbox"/> 30 to 59 days <input type="checkbox"/> 60 to 89 days <input type="checkbox"/> 90 to 119 days <input type="checkbox"/> 120 or more days <input type="checkbox"/></p>			
<p>223. Did any other member of your family living with you have a nonfarm job, business, profession, or work on someone else's farm this year? No <input type="checkbox"/> Yes <input type="checkbox"/></p>			
<p>224. Have you any income this year from any of the following sources: Sale of products from land rented out? Cash rent? Boarding? Social Security? Old-age assistance? Veterans' allowances? Unemployment compensation? Interest? Dividends? Profits from nonfarm business? Financial help from members of your family? (If "None" for question 222 and "No" for both questions 223 and 224, skip to question [253].)</p>			
<p>225. Will the income which you and your family receive from work off the farm and from other sources listed in questions 223 and 224 be greater than the total value of all agricultural products sold or to be sold from your place this year? No <input type="checkbox"/> Yes <input type="checkbox"/></p>			
Section VII.—FOREST PRODUCTS THIS YEAR, 1959			
<p>[226] How much was or will be received this year from the sale of standing timber or trees? (Include standing timber sold for pulpwood.) None sold <input type="checkbox"/> \$ _____</p>			
<p>How much was or will be received this year from the sale of pulpwood, poles and piling, bark, bolts, and mine timbers? (Do not include sale of standing timber, firewood, fence posts, and sawlogs.) None sold <input type="checkbox"/> \$ _____</p>			
<p>(Answer these questions, if "Yes")</p> <p>(Do not report below any products sold on the stump. Products sold on the stump should be included in question 226.)</p> <p>228. Firewood and fuelwood? No <input type="checkbox"/> Yes <input type="checkbox"/> How much was or will be sold in 1959? (a) Cord <input type="checkbox"/> (b) Cubic ft. <input type="checkbox"/></p>			
<p>230. Fence posts? No <input type="checkbox"/> Yes <input type="checkbox"/> How many were sold in 1959? (a) Number <input type="checkbox"/> (b) Board feet <input type="checkbox"/></p>			
<p>231. Sawlogs and veneer logs? No <input type="checkbox"/> Yes <input type="checkbox"/> How many were sold in 1959? (a) Number <input type="checkbox"/> (b) Board feet <input type="checkbox"/></p>			
Section VIII.—POULTRY AND LIVESTOCK NOW ON THIS PLACE AND LIVESTOCK PRODUCTION THIS YEAR, 1959			
<p>Include all poultry and animals on this place owned by you, by your landlord, by your employees, and by others. Include livestock grazing on land used under a Government grazing permit.</p>			
<p>POULTRY</p> <p>236. Are there any chickens, turkeys, or other poultry on this place? No <input type="checkbox"/> Yes <input type="checkbox"/></p> <p>237. If "No," were there any on this place any time this year? (If "No" for both questions 236 and 237, mark X and skip to question [246].)</p> <p>238. How many chickens (hens, pullets, roosters, etc.) 4 months old and over are now on this place? None <input type="checkbox"/> Number _____</p> <p>239. How many broilers were or will be sold this year? (Report all broilers sold and those grown for others under contract.) None <input type="checkbox"/> Number _____</p> <p>240. How many hens, roosters, pullets, cockerels, and other chickens were or will be sold this year? None <input type="checkbox"/> Number _____</p> <p>241. How many dozens of chicken eggs were or will be sold this year? None <input type="checkbox"/> Dozens _____</p> <p>242. How many turkeys and turkey fryers were raised this year? (Include those raised from poult hatchlings, poult bought, and those raised for others under contract.) None <input type="checkbox"/> Number _____</p> <p>243. How many turkey hens now on hand are you keeping for breeding next year? None <input type="checkbox"/> Number _____</p> <p>244. How many ducks, geese, and other poultry (not counting chickens and turkeys) were sold this year? None <input type="checkbox"/> Name _____ Number _____</p> <p>246. How much was or will be received this year from the sale of turkeys, ducks, geese, and miscellaneous poultry, and their eggs? None sold <input type="checkbox"/> Value of sales \$ _____</p>			
<p>SHEEP AND LAMBS</p> <p>[245] How many ewes, rams, wethers, and lambs of all ages are on this place? (If "None," mark X and skip to question [247].) None <input type="checkbox"/> Number _____</p> <p>Of this total, how many are: (a) Lambs under 1 year old? Number _____ (b) Ewes 1 year old and over? Number _____ (c) Rams and wethers 1 year old and over? Number _____ (The total for questions (a), (b), and (c) must equal the number for question 246.)</p>			
<p>HORSES AND MULES</p> <p>[247] How many horses, mules, colts, and ponies are on this place? None <input type="checkbox"/> Number _____</p>			
Section IX.—DAIRY PRODUCTS SOLD AND TO BE SOLD THIS YEAR, 1959			
<p>[262] Was any milk or cream sold this year, 1959? No <input type="checkbox"/> Yes <input type="checkbox"/></p> <p>Report all sales from this place whether made by you or by others. Report dairy products sold for your landlord. Be sure to include dairy products which you will sell by December 31, this year.</p> <p>(For each item, answer these questions.)</p> <p>(1) Quantity sold or to be sold in 1959? (2) How much was or will be the value of sales in 1959?</p> <p>(a) (1) Lb. of milk (2) Gallons of milk (3) Lb. of butterfat</p> <p>263. How much whole milk was or will be sold in 1959? (Report in pounds of milk, gallons of milk, or pounds of butterfat.) None <input type="checkbox"/> \$ _____</p> <p>264. How much cream was or will be sold in 1959? (If cream was sold by the gallon, multiply the number of gallons by 2½ to get pounds of butterfat.) None <input type="checkbox"/> \$ _____</p>			
Section X.—ANIMALS SOLD AND TO BE SOLD ALIVE THIS YEAR, 1959			
<p>Report all sales from this place whether made by you or by others. Report all animals turned over to or sold for your landlord, and animals fed under contract for others. Be sure to report animals which you will sell by December 31, this year.</p> <p>(Answer these questions, if "Yes")</p> <p>(1) How many have been sold this year? (2) How many more will be sold between now and Dec. 31? (3) How much was or will be the value of sales in 1959?</p> <p>(a) (1) Number (2) Number (3) \$</p> <p>[265] Calves? 265. Cattle, not counting calves? 266. Horses, mules, colts, and ponies? 267. Sheep and lambs? 268. Goats and kids?</p>			

Section XI.—FERTILIZER AND LIME

Include all fertilizer and lime used on this place during 1959, whether purchased by you or by your landlord.

271. On how many acres were commercial fertilizers and fertilizing materials used in 1959? ☐ None ☐ Acres _____

If "None," mark X and skip to question [272].

(Answer these questions, if "X" is marked, on how many acres was fertilizer used?)

	(1) Dry materials* Include rock phosphate	(2) Dry materials* Include rock phosphate	(3) Liquid materials*
(a) Hay and cropland pasture?	_____	_____	_____
(b) Other pasture (not cropland)?	_____	_____	_____
(c) Irish potatoes?	_____	_____	_____
(d) Cotton?	_____	_____	_____
(e) Sugar beets?	_____	_____	_____
(f) All other crops?	_____	_____	_____

272. How many acres were lime-limed in 1959? ☐ None ☐ Acres _____

If "None," mark X and skip to question [273].

273. How much lime of lime materials was used in 1959? _____ Tons

(Include ground limestone, hydrated and burnt lime, marl, oyster shells, etc. limit time used for sprays or sanitation.)

Section XII.—SELECTED FARM EXPENDITURES AND LAND-USE PRACTICES THIS YEAR, 1959

EXPENDITURES Include: expenses paid, or to be paid by December 31, 1959, by you and your landlord for this place.

How much was or will be spent this year for—

[274] Feed for livestock and poultry? ☐ None ☐ \$ _____ 00

275. The purchase of livestock and poultry? ☐ None ☐ \$ _____ 00

276. Machine hire? ☐ None ☐ \$ _____ 00

277. Hired labor? ☐ None ☐ \$ _____ 00

278. Seeds, bulbs, plants, and trees? ☐ None ☐ \$ _____ 00

279. Gasoline and other petroleum fuel and oil for the farm business? ☐ None ☐ \$ _____ 00

LAND-USE PRACTICES

280. How many acres of land were used to grow cover crops this year and then planted to another crop? ☐ None ☐ Acres _____

281. How many acres of cropland used for grain or row crops this year were farmed on the contour? ☐ None ☐ Acres _____

282. How many acres of strip-cropping systems for soil-erosion control were on this place this year? ☐ None ☐ Acres _____

283. How many acres of crop and pasture land on this place have terraces? ☐ None ☐ Acres _____

Section XIII.—FARM LABOR

284. About how many hours last week did you (the person in charge of this place) do farm work or chores on this place? (Mark one) ☐ None ☐ 1 to 4 hours ☐ 12 hours or more

285. How many other members of your family did 15 hours or more of farm work or chores on this place last week without receiving cash wages? ☐ None ☐ Persons _____

286. How many hired persons did any farm work or chores on this place last week? ☐ None ☐ Persons _____

(Include members of your family receiving cash wages.)

If "None," mark X and skip to question [291].

287. Of these hired persons working last week, how many were employed on this place for—

(a) 150 days or more during this year? ☐ None ☐ Persons _____

(b) Less than 150 days during this year? ☐ None ☐ Persons _____

(The total for questions a and b must equal the number for question 286.)

	(1) Monthly basis*	(2) What was the agreed cash rate of pay? (If more than one person, give average)	(3) How many hours per person were these workers expected to work to earn this pay? Per month hours
288. Of these hired persons working last week, how many were paid on a	Monthly basis* <input type="checkbox"/> Persons _____	\$ _____ Dollars only 00 per month	_____ Per month hours
	Weekly basis* <input type="checkbox"/> Persons _____	\$ _____ Dollars only 00 per week	_____ Per week hours
	Daily basis* <input type="checkbox"/> Persons _____	\$ _____ Dollars only 00 per day	_____ Per day hours
	Hourly basis* <input type="checkbox"/> Persons _____	\$ _____ Dollars only 00 per hour	_____ Per hour hours
	Piecework basis* <input type="checkbox"/> Persons _____	\$ _____ Dollars only 00 per piece	_____ Per piece hours

(The total of the persons reported in column 1 must equal the number for question 286.)

289. How many hired persons paid on a piecework basis worked on the place last Friday? ☐ None ☐ Persons _____

If "None," mark X and skip to question [291].

290. How much did these hired persons on piecework reported for question 289, earn for their work last Friday? \$ _____ 00

Section XIV.—EQUIPMENT AND FACILITIES NOW ON THIS PLACE

Include equipment, whether owned by you or by others, on this place. Include equipment and facilities that are temporarily out of order.

How many of the following are on this place—

[291] Grain combines? _____

292. Corn pickers (include picker-shellers and corn combines)? _____

293. Pick-up balers? _____

294. Field forage harvesters (for field chopping of silage and forage crops)? _____

295. Motortrucks (include pick-ups)? _____

296. Wheel tractors other than garden? _____

297. Garden tractors? _____

298. Crawler tractors (tracklaying)? _____

299. Automobiles? _____

Do you have on this place—

300. Telephone? ☐ No ☐ Yes

301. Home freezer (for quick freezing and storing food)? ☐ No ☐ Yes

302. Milk refrigerator? ☐ No ☐ Yes

303. Milking machine? ☐ No ☐ Yes

304. Electric milk cooler? ☐ No ☐ Yes

305. Crop drier (for grain, forage, or other crops)? ☐ No ☐ Yes

306. Power-operated elevator, conveyor, or blower? ☐ No ☐ Yes

307. On what kind of road is this place located? (1) Hard surface? ☐ (2) Gravel, shell, or shale? ☐ (3) Dirt or unimproved? ☐

If marked Yes, answer—

How many miles to a hard surface road? ☐ Less than 1 mile (or) ☐ Whole miles _____

Section XV.—RENTAL AGREEMENT, FARM VALUES, AND MORTGAGE DEBT

308 a. Do you rent any land from others? ☐ No ☐ Yes

b. Do you work any land on shares? ☐ No ☐ Yes

If "No" for both questions 308 a and 308 b, mark X and skip to question [314].

If "Yes" for either question 308 a or 308 b, answer questions 310 through 313.

310. Do you pay to your landlord any cash as rent? ☐ No ☐ Yes

a. If "Yes," how much for the year? \$ _____ 00

311. Do you pay to your landlord any share of the crops (such as 1/3, 1/2)? ☐ No ☐ Yes

312. Do you pay to your landlord any share of the livestock or livestock products (such as 1/3, 1/2)? ☐ No ☐ Yes

313. Do you have this land under any other arrangement (such as a fixed quantity of any product, upkeep of land and buildings, payment of taxes, keep of landlord, rent free, etc.)? ☐ No ☐ Yes

	(1) None	(2) Acres	(3) Total value (dollars)
[314] About how much would the land and the buildings sell for—			
a. Land and buildings owned by you? (Copy acres from question 3)	<input type="checkbox"/>	_____	\$ _____ 00
b. Land and buildings rented from others? (Copy acres from question 4)	<input type="checkbox"/>	_____	\$ _____ 00
c. Land and buildings managed for others? (Copy acres from question 5)	<input type="checkbox"/>	_____	\$ _____ 00
d. Land and buildings rented to others? (Copy acres from question 6)	<input type="checkbox"/>	_____	\$ _____ 00

316. Is there any mortgage debt on land and buildings owned by you? (Mark one) ☐ No ☐ Yes ☐ No land owned

If "Yes," give month and day _____ 1959

316. On what date did you fill this questionnaire? _____ 1959

REMARKS

Section XVI.—ENUMERATOR'S RECORD—To be filled by Census Enumerator

State _____ County _____

Census county division _____ E.D. No. _____

Who furnished the information in this report? (Mark one) ☐ Operator ☐ Wife or other member of operator's family ☐ Landlord ☐ Hired laborer ☐ Neighbor ☐ Other (Give name) _____

Certified by _____ Date (month and day) _____ 1959

Checked by _____ Enumerator _____ Date (month and day) _____ 1959

Crew leader _____

PREFACE

Volume I, Counties, is one of the five principal reports presenting the results of the 1959 Census of Agriculture. This volume, in 54 parts, presents the compilation of the information given by farm operators to census enumerators in 1959.

The 1959 Census of Agriculture was taken in conformity with the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

The collection of the data was carried out by census enumerators directed by supervisors appointed by the Director of the Bureau of the Census and working under the direction of Robert B. Voight, then Chief, Field Division. Paul R. Squires, then Special Assistant to the Director, was responsible for the recruitment of the field staff. The planning of the census and the compilation of the statistics were supervised by Ray Hurley, Chief, Agriculture Division, Warder B. Jenkins, Assistant Chief, and Orvin L. Wilhite, Assistant Chief. They were assisted by M. Vincent Lindquist, Thomas Jabine, Robert S. McCauley, John C. Mackey, Robert Standley, Hilton E. Robison, Helen E. Teir, Carl R. Nyman, Kenneth R. Norell, Gladys L. Eagle, Henry L. DeGraff, Charles H. Boehne, Joseph A. Correll, Margaret G. Wood, Evelyn K. Jett, Simon Yablon, Emma B. Gass, Charlotte J. Messinese, Bennie L. Sharp, Isaac E. Lemon, James M. Lindsey, Samuel S. Murray, William F. Kauffman, Hector Vila, Harry P. Owings, Charles A. Nicholls, Henry A. Tucker, Robert S. Boyle, Helen M. Davenport, Albert W. Graybill, Lois G. Miller, Thomas D. Monroe, Gerald P. Owens, Bernard L. Ross, Marvin M. Thompson, Helen D. Turner, Kurt W. Luethy, Arnold L. Bollenbacher, George W. Coffman, Joseph A. Horak, Samuel J. Hundley, Donald K. Larson, Chester G. Lykins, Wilmer R. Maxham, Virgil L. McClain, Jr., Darrell D. Prochaska, Robert J. Rades, Hubert E. Sites, Duane E. Traylor, Donald H. von Steen, Elmer O. Rea, Frances G. Compton, Lillian W. Bentel, and Neil V. Perkins.

Acknowledgment is made of the technical assistance and the loan of personnel by the United States Department of Agriculture in the planning, the enumeration, and the compilation of the 1959 Census of Agriculture.

June 1961

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
1	New England States:	19	West North Central—Continued	38	Mountain:
2	Maine.	20	South Dakota.	39	Montana.
3	New Hampshire.	21	Nebraska.	40	Idaho.
4	Vermont.	22	Kansas.	41	Wyoming.
5	Massachusetts.	23	South Atlantic:	42	Colorado.
6	Rhode Island.	24	Delaware.	43	New Mexico.
7	Connecticut.	25	Maryland.	44	Arizona.
8	Middle Atlantic States:	26	Virginia.	45	Utah.
9	New York.	27	West Virginia.	46	Nevada.
10	New Jersey.	28	North Carolina.	47	Pacific:
11	Pennsylvania.	29	South Carolina.	48	Washington.
12	East North Central:	30	Georgia.	49	Oregon.
13	Ohio.	31	Florida.	50	California.
14	Indiana.	32	East South Central:	51	Alaska.
15	Illinois.	33	Kentucky.	52	Hawaii.
16	Michigan.	34	Tennessee.	53	Other Areas:
17	Wisconsin.	35	Alabama.	54	American Samoa.
18	West North Central:	36	Mississippi.		Guam.
	Minnesota.	37	West South Central:		Puerto Rico.
	Iowa.		Arkansas.		Virgin Islands.
	Missouri.		Louisiana.		
	North Dakota.		Oklahoma.		
			Texas.		

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part 1.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

INTRODUCTION

THE 1960 CENSUS OF AGRICULTURE

History of the Census.—The 1959-1960 Census is the 17th nationwide agricultural census. The first agricultural census was taken in 1840, at the same time as the Sixth Decennial Census of Population. From 1850 to 1920, an agricultural census was taken every 10 years. With increased application of scientific findings and the growing use of mechanization in agriculture, farming practices were changing so rapidly that facts collected at 10-year intervals were no longer adequate. Aware of the need for more accurate and timely information, the Congress in 1909 (36 stat. 10, sec. 31, provided for a census to be taken in 1915 and every 10 years thereafter which was to be in addition to the census of agriculture to be taken at the time of the decennial census of population. The 1915 census was not taken, however, because of the abnormal conditions created by World War I. Beginning with 1920, a national agricultural census has been taken every 5 years. The first United States Census of Alaska was taken in 1900.

Legal Basis for the Census.—The 1959 Census of Agriculture was authorized by an Act of Congress, as were all prior censuses of agriculture. "Title 13, United States Code-Census," codified in August 1954, and amended in August 1957 and September 1960, is now the legal basis for censuses of agriculture and other censuses, and surveys conducted by the Bureau of the Census. Section 142, paragraph (a), of Title 13 makes provision for the Census of Agriculture. It reads as follows:

"The Secretary shall, beginning in the month of October 1959, and in the same month of every fifth year thereafter, take a census of agriculture, provided that the censuses directed to be taken in October 1959 and each tenth year thereafter, may, when and where deemed advisable by the Secretary, be taken instead in conjunction with the censuses provided in section 141 of this title." (Section 141 relates to the decennial censuses of population, unemployment, and housing to be taken as of the first day of April of each decennial year.) Under authority granted by Section 4 of Title 13, the Secretary of Commerce delegated "the functions and duties imposed upon him by this title" to the Director of the Bureau of the Census.

Pretest of the 1959 Census.—A "pretest" of the field procedures of the 1959 Census of Agriculture was conducted in 17 counties of the United States during the fall of 1958. The purpose of the pretest was to provide the Bureau with a measure of the effectiveness of the questions and procedures planned for the 1959 nationwide census. Three versions of the agriculture questionnaire—the first one for Northern States, the second for Southern States, and the third for Western States—were used in the pretest. Each version contained questions appropriate to the type of agriculture in the part of the country where it was used. All major aspects of field forms and procedures, from the hiring and training of crew leaders and enumerators to actual interviews with farm operators, were given a "trial run" in each of the 17 counties. Preliminary versions of reporting forms, maps, payroll records, training guides, and instruction manuals were subjected to actual use under conditions simulating those expected in the nationwide enumeration conducted in the fall of 1959.

In making final preparations for the 1959 census, the staff of the Bureau drew heavily on the results of the pretest, as well as on experience gained from previous censuses.

Training Program for Personnel for Enumeration.—Every person hired to do work in connection with the 1959 Census of Agriculture received specialized training for his job. Staff members of the Washington and Regional Offices of the Bureau and of the U.S. Department of Agriculture trained approximately 110 agriculture field assistants and 2,100 crew leaders. The crew leaders, in turn, trained and supervised approximately 30,000 enumerators. All training was presented according to procedures contained in various guides and manuals prepared by the Bureau. The training program included filmstrips, map-reading, practice interviewing, and practice filling of questionnaires and other census forms. In most instances, training sessions were held near the areas in which employees worked and immediately prior to the beginning of their assignments.

Enumeration Period.—The actual enumeration in the continental United States started at dates varying from October 7 to November 15, 1959. In general, starting dates were based upon regional variations in harvesting seasons and on weather conditions. The primary aim was to have the enumeration late enough to follow the harvesting of the bulk of important crops and early enough to precede the advent of winter weather with the attending unfavorable travel conditions. The bulk of the enumeration work was completed within three to four weeks after the starting date. In Hawaii, the enumeration was made during the months of December 1959 and January 1960; and in Alaska, during April 1960.

Enumeration starting dates for the census are given in State Table 11, together with figures showing the percentage of farms enumerated in the State during weekly periods.

Data for inventory items—land in farms, machinery and equipment, livestock, and poultry—relate to the situation at the actual time of enumeration of each individual farm. Data for acres, production, and sales of crops relate generally to the crops harvested during the crop year 1959, regardless of whether and when they were sold while data for sales of livestock and livestock products relate to the calendar year 1959.

ENUMERATION FORMS AND PROCEDURES

Authorization.—Section 5 of Title 13 of the United States Code authorizes the preparation of forms and questionnaires used in the census. It reads as follows:

"The Secretary shall prepare schedules, and shall determine the inquiries, and the number, form, and subdivisions thereof, for the statistics, surveys, and censuses provided for in this title."

The Agriculture Questionnaire.—The questionnaire for the 1959 Census of Agriculture was prepared by the staff of the Bureau. Selection of the inquiries was based on the results of the 1958 pretest and experience gained in earlier censuses. Careful consideration was given to such factors as the current availability

of data from other sources, the possibility of obtaining data by methods other than a census, the adequacy of the data that might be obtained, and the need for and usefulness of the data. Two committees gave advice and counsel to the Bureau. One of these, a Special Advisory Committee, was composed of members designated by the organizations they represented, following an invitation from the Director of the Bureau of the Census to name a representative to serve in an advisory capacity. The Special Advisory Committee for the 1959 Census of Agriculture was made up of one representative from each of the following: Agricultural Publishers Association, American Association of Land-Grant Colleges and State Universities, American Farm Bureau Federation, American Farm Economic Association, American Statistical Association, Farm Equipment Institute, National Association of Commissioners, Secretaries, and Directors of Agriculture, National Council of Farmer Cooperatives, National Farmers' Union, National Grange, Rural Sociological Society, and the U.S. Department of Agriculture. A representative of the Bureau of the Budget was in attendance at all meetings of the Advisory Committee.

Because of the special interest of the U.S. Department of Agriculture in censuses of agriculture, the Director of the Bureau of the Census sought the continuous cooperation of that organization in developing plans, questionnaires, and procedures for the 1959 Census of Agriculture. Working Groups were established in the U.S. Department of Agriculture to make recommendations for the following general subjects:

Tenure, Land Values, and Mortgage Debt
Land Use and Conservation and Production Practices
Field Crops
Fruits and Vegetables
Forest Products
Livestock, Poultry, and Dairy
Income and Expenditure (including Contractual Operations)
Farm Labor
Equipment and Facilities (including Structures)

Each Working Group had the responsibility for ascertaining the U.S. Department of Agriculture's need for data in the field covered by its "terms of reference" and for presenting recommendations to a small Joint Committee comprising representatives of both the Bureau of the Census and the U.S. Department of Agriculture. The Joint Committee received written recommendations from each Working Group. The Chairman of each Group appeared before the Joint Committee as did any member of the Working Group who was needed to present supplemental information of a specialized nature.

Prior to the formulation of the questionnaire, State Agricultural Colleges and other major users of census data were invited to suggest inquiries for the enumeration. Each member of the Special Advisory Committee had the opportunity and the responsibility for channeling in suggestions from the organization he represented. The number of inquiries submitted from all sources greatly exceeded the number that could be included in the census, from the point of view of cost, of the respondent's time and patience, and of practical value to the majority of users of data.

In all, 35 versions of the questionnaire—one for each State or combination of adjoining States and two for Texas—were used for the 1959 census in the conterminous United States as compared with 21 versions in 1954 and 41 in 1950. A separate version was used in Alaska and another in Hawaii.

Differences in the questionnaires were designed to account for regional and local differences in agriculture. Most, but not all, of the differences related to crops. The use of State questionnaires made possible the inclusion of separate inquiries for all important crops grown within a State and, at the same time, a reduction in the total number of inquiries for a State.

Questions that did not apply, to any considerable degree, to a particular State were omitted from the questionnaire used in that State. For example, separate questions about citrus fruits were omitted from all questionnaires except for the few States where citrus fruits are grown. An added advantage of State questionnaires was that production and sales data could be asked in the unit of measure most commonly used by the farmers in each State. Regional variation in the number and type of questions is an important provision of the census for obtaining complete coverage of agricultural operations.

About 2 weeks before the start of the enumeration, agriculture questionnaires were mailed to all known farm operators. A letter was attached to each questionnaire asking the farm operator to fill the questionnaire and to give it to the enumerator when he called. The purpose of this procedure was to save time and money in taking the census and to improve the quality of the information given by farm operators. By having the questionnaire ahead of time, the farmer could determine what information would be required and could check his records in advance of the enumerator's visit. It was, however, the responsibility of the enumerator to obtain an agriculture questionnaire for each place which qualified. If the questionnaire had been filled out by the farm operator, the enumerator was instructed to examine the questionnaire for completeness and accuracy and, if need be, to give the farmer such help as might be necessary.

Agricultural Operations.—The training of enumerators stressed the concept that a census of agriculture is a census of agricultural operations rather than a census of farms. This concept was intended to assure a complete agricultural census free of any personal judgment by enumerators as to what constitutes a farm. During the enumeration for the Census of Population, the census enumerator was required to ask for all occupied houses except those on city lots, whether the house in which the persons lived, was on a place of 10 or more acres or on a place of less than 10 acres. If the house was on a place of more than 10 acres the enumerator was required to ask if the sales of crops, livestock, and other farm products from the place amounted to \$50 or more in 1959. If the sales amounted to \$50 or more, the enumerator was instructed to fill an agriculture questionnaire. If the house was located on a place of less than 10 acres, the enumerator was instructed to ask if the sales of crops, livestock, and other farm products from the place amounted to \$250 in 1959, and if the sales amounted to \$250 or more the enumerator was required to fill an agriculture questionnaire.

As a result of these requirements, more questionnaires were obtained than are included in the tabulations for farms. During the office processing operations that followed the completion of enumeration, criteria were applied to the questionnaires to sort out for tabulation those that represented farms according to the census definition of a farm (see page XII).

List of Farms.—Prior to the enumeration, a list of farmers was prepared on the basis of records obtained from the University of Alaska. Enumerators were given the list of farms within their assignment areas to use as aids to obtaining complete coverage. The crew leader had a duplicate list of farms for use in checking enumeration coverage.

PROCESSING OPERATIONS

Completion of Enumeration.—As an enumerator completed his assignment, he turned the portfolio containing questionnaires and other census materials over to his crew leader. After making a final review of the enumerator's work, the crew leader mailed the portfolio to the Agriculture Processing Office at Parsons, Kansas. There, each enumerator portfolio was thoroughly checked for completeness of all required forms.

Editing of Questionnaires.—Each agriculture questionnaire was individually edited and coded before the information was transferred to punch cards and tabulated. As the first major step in the editing process, questionnaires that did not represent farms according to the census definition were withdrawn from further processing. (See p. XII.) As the second major step, the remaining questionnaires were examined for errors, omissions, and inconsistencies. Among the specific items subjected to consistency checks were the following:

- a. Total acreage compared with its distribution by use.
- b. Acreage of individual crops harvested compared with total cropland harvested.
- c. Irrigated acreage compared with total acres in the farm.
- d. Total acreage of individual crops for all purposes compared with the acreage harvested for specific purposes.
- e. Quantity of crops harvested in relation to acreage harvested.
- f. Sales in relation to production and, for livestock, to inventories.
- g. Total livestock compared with the inventory by age and sex.
- h. Expenditures compared with production and inventories.

Obvious errors in calculations or in units of measure, and misplaced entries were corrected as they were found. Entries not clearly legible were rewritten. Many omissions or inconsistencies were disregarded during editing. Those of significant magnitude could be and were handled more efficiently and economically during mechanical processing operations. Questionnaires containing major inconsistencies and omissions were referred to members of the technical staff for review. Depending on the magnitude of the data involved, the technical staff corrected (or supervised the correction of) the questionnaires either on the basis of information reported for other farms of similar type in the area or on the basis of additional information received in response to letters directed to the farm operators.

Coding of Questionnaires.—Most of the numerical information on a questionnaire was self-coding in that the inquiry number was utilized for the item identification on punch cards or on tabulations runs. However, some manual coding was also necessary for such items as irrigated crops for selected States, crops infrequently reported, miscellaneous poultry, etc. Code numbers were entered on questionnaires to classify farms and, in some cases, to identify data for individual items. All farms were coded by size of farm in terms of total acreage, by race, and by tenure of operator. Farms in the 17 Western States, Louisiana, and Hawaii were also coded on the basis of irrigated cropland and irrigated pasture. Additional codes were applied to all farms included to classify them by type of farm and by total value of agricultural products sold. Individual items were coded only where reports were received for crops or poultry not covered by separate inquiries on the questionnaire. This coding was necessary to assure inclusion of the data in the appropriate farm product totals.

Tabulation of Data.—After the questionnaires were edited and coded, the information on them was punched on cards. The cards were then mechanically sorted and fed into machines which transferred the data to tabulation sheets. One of the initial and primary steps in the machine handling of the punch cards was to separate and list those cards which lacked necessary information, those which contained inconsistent or impossible data, and those on which the data were possible but of such magnitude that a further review of the individual questionnaires was warranted. The listing sheets were examined and, as necessary, the cards were corrected. When the cards for a particular county were considered satisfactory, the data were tabulated.

Subject-matter specialists of the Bureau and the U.S. Department of Agriculture examined all tabulations for reasonableness and consistency. As necessary, they made corrections on the basis of a further review and reappraisal of the original reports and verification of the editing, coding, and punching.

PRESENTATION OF STATISTICS

Statistical Content of This Report.—This report is part of Volume I of the 1959 Census of Agriculture. Volume I consists of 54 parts, each part containing information about agriculture for a single State, Commonwealth, or Possession. Each part contains county data for that particular State or area. The term "county," as used in this report embraces election districts in Alaska, parishes in Louisiana, municipios (municipalities) in Puerto Rico, etc. The statistics for 1959 were obtained from the Census of Agriculture taken in the "conterminous United States" (see following paragraph), Hawaii, and Puerto Rico during the period October 1959 to January 1960 and in Alaska, American Samoa, Guam, and Virgin Islands as of April 1, 1960. Comparative data for years prior to 1959 were obtained from earlier censuses.

In the planning of the publications for the 1960 Censuses of Population and Housing and the 1959 Census of Agriculture, the term "conterminous United States," recommended by the Board of Geographic Names to designate the 48-State area as it existed before Alaska and Hawaii became States, was adopted by the Bureau of the Census.

The definitions and explanations in this introduction for volume I generally have application broad enough to include the States of Alaska and Hawaii, and the Commonwealth of Puerto Rico and the island possessions. However, specific application in many instances may be limited to the conterminous United States; for example, references to earlier censuses, to specific sections or questions on the questionnaires, and to specific table numbers.

For each part of volume I (one part for each State or area), a facsimile of the appropriate questionnaire is reproduced in the appendix.

The statistics for States and counties are presented according to the same general plan as was followed in the volume I reports for the 1954 and the 1950 censuses. State and county totals are given for nearly all items for which information was obtained in the 1959 census. However, most of the data by economic class of farm, type of farm, and color and tenure of farm operator are given only for States.

Comparative data for the States are given for each census year.

Comparability of Data.—The data obtained from the various censuses of agriculture are not strictly comparable for all items. For example, differences from one census to another in the time of enumeration, the wording of the questions, and the definition of a farm cause some lack of comparability. Differences considered to have a significant effect on the comparability of data are described in the text and/or mentioned in footnotes to the tables.

Minor Civil Divisions.—As in prior censuses, data for most of the items included in the 1959 Census of Agriculture were tabulated for minor civil divisions. The term "minor civil division" applies to the primary subdivision of a county into smaller geographic areas such as townships, precincts, districts, wards, beats, municipalities, etc. Figures for these smaller geographic areas are not included in any of the published reports, but they may be supplied upon request and payment of the costs of compiling and checking the data.

Requests for census information for minor civil divisions should be directed to the Agriculture Division, Bureau of the Census, Washington 25, D.C.

DEFINITIONS AND EXPLANATIONS

Descriptive Summary and References.—The definitions and explanations that follow relate only to those items that are considered to be inadequately described in the tables where they appear. Although the descriptive terms and explanations refer specifically to the 1960 Census of Agriculture, many of them also apply to earlier censuses. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and of the instructions included on the questionnaire, see the facsimile of the Agriculture Questionnaire in the appendix of this report.

An analysis of the questions asked in the 1959 census, and of the data obtained, is given in Volume II, General Report, Statistics by Subjects, United States Census of Agriculture, 1959. The general report presents statistics for States by subject matter.

GENERAL FARM INFORMATION

Census Definition of a Farm.—For the 1960 Census of Agriculture, the definition of a farm was based primarily on a combination of "acres in the place" and the estimated value of agricultural products sold.

The word "place" was defined to include all land on which agricultural operations were conducted in 1960 under the control or supervision of one person or partnership. (For definition of "agricultural operations," see p.X.) Control may have been exercised through ownership or management, or through a lease, rental, or cropping arrangement.

Places of less than 10 acres were counted as farms if the estimated sales of agricultural products for 1959 amounted to at least \$250. Places of 10 or more acres were counted as farms if the estimated sales of agricultural products for 1959 amounted to at least \$50. Places having less than the \$50 or \$250 minimum estimated sales were also counted as farms if they could normally be expected to produce agricultural products in sufficient quantity to meet the requirements of the definition. This additional qualification resulted in the inclusion as farms of some places engaged in farming operations for the first time in 1960 and places affected by crop failure or other unusual conditions.

To avoid biases arising from an enumerator's personal judgment and opinion, the Bureau did not give enumerators the definition of a farm. Instead, enumerators were instructed to obtain questionnaires for all places considered farms by their operators and for all other places that had one or more agricultural operations. In 1950, agricultural operations were defined to include every place of 3 or more acres, whether or not the operator considered it a farm, and every place having "specialized operations", regardless of the acreage. "Specialized operations" referred to nurseries and greenhouses and to places having 100 or more poultry, production of 300 or more dozen eggs in 1949, or 3 or more hives of bees. In all of the three last censuses, as a result, questionnaires were filled for a considerable number of places that did not qualify as farms. The determination as to which questionnaires represented farms was made during office processing operations and only those questionnaires meeting the criteria for a farm were included in the tabulations.

For the 1950 Census of Agriculture, places of 3 or more acres were counted as farms if the annual value of agricultural products, whether for home use or for sale but exclusive of home-garden products, amounted to \$150 or more. Places of

less than 3 acres were counted as farms only if the annual sales of agricultural products amounted to \$150 or more. A few places with very low agricultural production because of unusual circumstances, such as crop failure, were also counted as farms if they normally could have been expected to meet the minimum value or sales criteria.

For the 1940 and earlier censuses, enumerators were given a definition of "farm" and were instructed to obtain reports only for those places which met the criteria. According to this definition, farms included all places of 3 or more acres, regardless of the quantity or value of agricultural production, and places of less than 3 acres if the value of agricultural products, whether for home use or for sale, amounted to \$250 or more. Because of changes in price level, the \$250 minimum resulted in the inclusion of varying numbers of farms of less than 3 acres in the several censuses taken during this period. Generally, the only reports excluded from tabulation were those taken in error and those showing very limited agricultural production, such as only a small home garden, a few fruit trees, a small flock of chickens, etc.

The decrease in the number of farms in 1950, as compared with earlier censuses, was partly due to the change in farm definition, especially with respect to farms of 3 or more acres in size. Some of the places of 3 or more acres that were not counted as farms in 1950 because the value of their agricultural production was less than \$150 would have qualified as farms if the criteria had been the same as in earlier censuses.

For 1960, the decrease in the number of farms as compared with all prior censuses resulted partly from the change in farm definition. The fact that sales of agricultural products in 1959 was used resulted in the exclusion of some places that would have qualified as farms had the value of agricultural products alone been considered. The increase in the acreage minimum also had an effect. The reduction in the number of farms due to change in definition, 1950 to 1960, is shown in district table 1. Some characteristics of the places not counted as farms in 1960, but which would have been included in 1950 are shown in State table 10.

The change in farm definition made in 1950 and again in 1960 had no appreciable effect on the totals for livestock or crops because the places affected by the change ordinarily accounted for less than 1 percent of the totals for the State.

Farm Operator.—The term "farm operator" is used to designate a person who operates a farm, either doing the work himself or directly supervising the work. He may be the owner, a member of the owner's household, a hired manager, or a tenant, renter, or sharecropper. If he rents land to others or has land worked on shares by others, he is considered as operator only of the land which he retains for his own operation. In the case of a partnership, only one partner is counted as an operator. The number of farm operators is considered to be the same as the number of farms.

Farms Reporting or Operators Reporting.—Figures for farms reporting or operators reporting, based on a tabulation of all farms, represent the number of farms, or operators, for which the specified item was reported. For example, if there were 1,922 farms in a State and only 1,465 had chickens 4 months old and over on hand at the time of enumeration, the number of farms reporting chickens would be shown as 1,465. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for all farms.

Where applicable, figures may be given for the number of farms or operators not reporting items that were intended to be obtained for all farms; for example, residence of farm operator,

State table 4. The number not reporting, as compared with the total number of farms or operators, indicates the extent of incompleteness of the reporting of the data for the item.

Land Area.—The approximate total land area of States and counties as reported for 1960 is, in general, the same as that reported for all censuses beginning with 1940. Such differences as are shown reflect political changes in boundaries or actual changes in land area caused by changes in the number or size of reservoirs, lakes, streams, etc. For Alaska, the areas for election districts represent the gross area of land and water.

Land in Farms.—Except for managed farms, the land to be included in each farm was determined from the answers to questions about the number of acres owned, the number of acres occupied as a homestead not yet patented, and the number of acres rented from others or worked on shares for others. The acres owned, the acres occupied as a homestead, and the acres rented from others or worked on shares for others were added together. The result represented the number of acres in the farm. The number of acres in a managed farm was the difference between the total land managed and that part of the managed land that was rented to others or worked on shares by others.

In the 1950 census, enumerators were instructed to record total figures for land owned, land rented from others, and land managed for others. In censuses prior to 1950, enumerators were instructed to exclude all land rented to others and to record only that portion of the acreage owned, rented from others, or managed for others that was retained by the farm operator. Thus, the figures for the individual tenures of land are not entirely comparable for all censuses. However, the land included in each farm was determined on essentially the same basis for all censuses.

The acreage designated in the tables as "land in farms" consists primarily of "agricultural" land—that is, land used for crops and pasture or grazing. It also includes considerable areas of land not actually under cultivation nor used for pasture or grazing. For example, the entire acreage of woodland and wasteland owned or rented by farm operators is included as land in farms, unless it was being held for nonagricultural purposes or unless the acreage was unusually large.

Except for open range and grazing land used under government permit, all grazing land was to be included as land in farms provided the place of which it was a part was a farm. Land used rent free was to be reported as land rented from others.

Land Owned.—All land that the operator and/or his wife held under title, purchase contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration is considered as owned.

Land Rented from Others.—This item includes not only land that the operator rented or leased from others but also land he worked on shares for others and land he occupied rent free. Grazing land used under government permit or license is not included.

Land Rented to Others.—This item includes all land rented or leased to others, except land leased to the government under the Soil Bank, and all land worked by others on shares or on a rent-free basis. For the most part, the land rented to others represents agricultural land but it also includes land rented for residential or other purposes. The tenant is considered as the operator of land leased, rented, or worked on shares even though his landlord may supervise his operations. The landlord is considered as operator of only that portion of the land not assigned to tenants.

Land Managed.—This item includes all tracts of land managed for one or more employers by a person hired on a salary basis. A hired manager was considered to be the operator of the land he managed since he was responsible for the agricultural operations on that land and frequently supervised others

in performing those operations. Managed land was always to be reported on a separate questionnaire whether or not the manager also operated a farm on his own account.

Land in Two or More Districts.—An individual farm was always enumerated in only one district, even in cases where the land was located in two or more districts. If the farm operator lived on the farm, the farm was enumerated in the district where he lived. If he did not live on the farm, the figures for the farm were tabulated for the district where the farm headquarters was located. In cases where there was any question as to the location of the headquarters, figures for the farm were tabulated for the district where most of the land was located.

Land in Farms According to Use.—Land in farms has been distributed according to the way in which it was used in 1959. The land uses described in the following paragraphs are mutually exclusive; that is, each acre of land is included only once even though it may have had more than one use during the year.

Cropland Harvested.—This category refers to all land from which any crops were harvested in 1959, whether for home use or for sale. It includes land from which hay (including wild hay) was cut and land in berries and other small fruits, orchards, vineyards, nurseries, and greenhouses. Matured crops hogged off or grazed were considered to have been "crops harvested" and were reported here. Land from which two or more crops were harvested in 1959 was to be counted only once in the land-use classification. Land used for other purposes either before or after the crops were harvested was to be reported as cropland harvested, without regard to the other uses.

The enumerator was instructed to check the figure for cropland harvested for each farm by adding the acreages of the individual crops and subtracting the acreages from which two or more crops were harvested. This checking procedure was repeated during the office processing of questionnaires for all farms having 100 or more acres of cropland harvested.

Cropland used only for Pasture.—This land-use classification includes rotation pasture and all other land used only for pasture or grazing that the operator considered could have been used for crops without additional improvement. Enumerators were instructed to include land planted to crops that were hogged off, pastured, or grazed before maturity but to exclude land pastured before or after hay or other crops were harvested from it. Permanent open pasture may have been reported either for this item or for "other pasture" depending on whether or not the operator considered it as cropland.

The figures for 1945 and earlier censuses are not entirely comparable with those for the last three censuses. For 1945, the figures include only cropland used solely for pasture in 1944 that had been plowed within the preceding seven years. The figures for 1940, 1935, and 1925 are more nearly comparable with those for 1959, 1954, and 1950, however, because they include land pastured that could have been plowed and used for crops without additional clearing, draining, or irrigating.

Cropland on Which Crops Completely Failed.—This includes the land from which no crop was harvested in 1959 because of destruction by frost, flood, drought, hail, insects, fire, or from any cause or from failure to harvest because of low prices or lack of labor. If a crop was harvested, even though the yield was very low, the land from which the crop was actually harvested was included in the acreage for cropland harvested, not crop failure. The acreage designated as crop failure does not represent the entire acreage of crops that failed, but only that acreage of land in crops that failed which was not successfully replanted to a crop that was harvested in 1959.

Cropland Idle.—This item includes cropland which was lying idle or which was in fallow; land which was not pastured or from which no crop of any kind was harvested in 1959.

Woodland Pastured.—This classification includes all woodland where livestock were pastured or grazed in 1959. The instructions on the questionnaire were—"Include as woodland all wood lots and timber tracts; cutover and deforested land which has value for wood products and has not been improved for pasture."

Woodland not Pastured.—This classification refers to all woodland not used for pasture or grazing in 1959, including land in operated farms that was placed in the Soil Bank and planted to trees. Unusually large tracts of timberland that were reported as woodland not pastured were excluded from the tabulation of land in farms when it was evident that such land was held primarily for nonagricultural purposes.

Other Pasture.—This classification refers to all land other than woodland and cropland that was used only for pasture or grazing in 1959. It includes noncrop open or brush pasture and cutover or deforested land that has been improved and used for pasture.

Other Land.—This classification refers to all land not included in the preceding land-use classifications, such as house lots, barn lots, lanes, roads, ditches, land area of ponds, and wasteland. This figure for 1959 was obtained from the machine tabulations by subtracting the total of all other uses from the total land in all farms reported for a given district or classification.

Value of Land and Buildings.—Only average values of land and buildings per farm and per acre are presented in this report. They are estimates based on data obtained for the sample of farms reporting the value of land and buildings. Estimates of the total value of land and buildings by States, geographic divisions, and the United States, are presented in volume II.

The enumerator was instructed to record the market value of the land and the buildings on that land. Market value was defined as the price which the farm operator would expect to receive for the land and buildings if he were to sell them on the day of enumeration.

More problems and difficulties arise in the enumeration of farm-real-estate values than in the enumeration of most other agricultural items. Most of the items enumerated require the respondent to make a statement of fact. For example, information about the number and value of farm animals sold alive during the year is based on actual transactions. Similarly, information about livestock inventories relates to the situation existing on a specific place at a specific time. Reports concerning the value of land and buildings, however, are estimates based almost entirely on opinion. The majority of farms have not changed hands for many years and are not currently for sale. For such farms, the operators are not likely to have any clear basis for estimating the value. To make an intelligent and objective estimate, a respondent first needs to make an estimate of the prevailing average market value of farms in his community. Then, he must either add to or subtract from that estimate to allow for the different characteristics of his own farm. In many cases, an operator who would not sell his farm under any circumstances may report an unreasonably high market value. In other cases, a farm operator who acquired his real estate during a period of relatively low prices may estimate an unrealistically low value by current standards. Because of the extent of variation that is known to exist in real estate values, it is difficult to devise checking procedures that will identify inaccurate estimates.

Age of Operator.—Farm operators were classified by age into six age groups. The average age of farm operators was derived from the sum of the ages of all farm operators reporting age divided by the number reporting. The number of farm operators 65 or more years of age is an actual count based on the operators reporting age.

Residence of Operator.—Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated themselves lived on farms operated by others. In cases where all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated provided the dwelling he occupied was included in the rental agreement. The dwelling, in such cases, was not necessarily on the land being operated. Similarly, a farm operator who did not live on the land being cultivated or grazed but who had some agricultural operations (other than a home garden) at his dwelling was considered as living on the farm operated.

Since some farm operators live on their farms only during a part of the year, comparability of the figures for various censuses may be affected by the date of enumeration.

In a few cases, the enumerator failed to report the residence of the farm operator. Differences between the total number of farms and the number of farm operators classified by residence indicate the extent of under-reporting.

Year Began Operating Present Farm.—Enumerators were instructed to report the year during which a farm operator began to operate his present farm and, if the year was 1958 or later, also to report the month. The year was intended to refer to the first year of the period during which the operator had been in continuous charge of his present farm or of any part of it. The time of year that farmers move is indicated by the month they began operating their farms, as shown by a monthly breakdown of the reports for farmers who began operating their present farms during 1958 and 1959.

Off-Farm Work and Other Income.—To obtain a measure of the extent to which farm operators rely on nonfarm sources for part of their income, four questions were asked of all farm operators. The first question asked for the number of days the operator worked off his farm in 1959. The other three questions, to be answered "Yes" or "No," asked (1) whether other members of the operator's household did any work off the farm; (2) whether any income was received from sources other than the sale of agricultural products from the farm operated; and (3) whether the combined income of all members of the household from off-farm work and other sources was greater than the total value of agricultural products sold from the farm operated.

Off-farm work was defined to include work on someone else's farm for pay as well as all types of nonfarm jobs, businesses, and professions, whether the work was done on the farm premises or elsewhere. Exchange work was not included.

Equipment and Facilities.—Farm operators were asked to report equipment and facilities that were on the farm at the time of enumeration, regardless of ownership. They were to include items that were temporarily out of order but not any that were worn out.

Definitions given enumerators included the following specifications, among others: **Pick-up balers** were to include both hand-tie and automatic balers but not stationary ones. **Motor-trucks** were to include pick-up trucks and truck-trailer combinations; jeeps and station wagons were also to be included if they were used primarily as trucks, but school buses were specifically excluded. **Wheel tractors** specifically excluded garden tractors, implements with built-in power units, such as self-propelled combines or powered buck rakes, and the power unit of a truck-trailer combination. Automobiles were to include jeeps and station wagons if they were used primarily as passenger cars.

Questions to be answered "Yes" or "No" provided information as to the presence or absence of the following items: (1) telephone, (2) home freezer, (3) milking machine, (4) electric milk cooler, (5) electricity, (6) crop drier and (7) power-operated elevator, conveyor, or blower.

Comparable data from one census to another are not available for all items. The questions asked about equipment during a given census reflect changes in farm mechanization and in the facilities available to farm families. Questions about some items of equipment were asked in 1960 for the first time (electric milk cooler, crop drier, etc.).

Farms by Kind of Road.—The enumerator was instructed to report, on the basis of his own observation, the kind of road on which the most frequently used entrance to the farm was located. For farms consisting of two or more tracts, he was to limit his report to the tract on which the farm operator had his dwelling or other headquarters.

Farm Labor.—The questions about farm labor related to persons working during the calendar week preceding the week of

enumeration. Since the enumeration starting dates varied by geographic areas, and the enumeration within each area lasted over a period of several weeks, the calendar weeks to which the data apply also vary. Thus, the data for an individual farm may relate to any one week during the month of April 1960.

Farm labor was defined to include any work, chores, or planning necessary to the agricultural operations of the farm; and to exclude housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons employed specifically for such work. The farm labor information contained in this report represents estimates based on answers to questions relating to the farm work or chores done during the week by (1) operator, (2) unpaid members of the operator's family, and (3) hired persons. An operator was considered as working if he worked one or more hours; unpaid members of the operator's family, if they worked 15 or more hours; and hired persons, if they worked at all during the week.

Regular and Seasonal Workers.—Hired persons working on the farm during the week concerned were classed as "regular" workers if the period of actual or expected employment was 150 days or more during the year. They were classed as "seasonal" workers if the period of actual or expected employment was less than 150 days. In cases where the period of employment was not reported for an individual farm, it was estimated from data for such items as basis of payment, wage rates, expenditures for labor in 1959, and type of farming operations.

Hired Workers by Basis of Payment.—Hired persons were also classified according to whether they were paid on a monthly, weekly, daily, or hourly basis, or by piecework. In cases of incomplete reporting, the basis of payment for hired workers was supplied during the office processing operations.

Wage Rates and Hours Worked.—The agreed cash rate of pay was asked for each class of hired worker except those employed on a piecework basis. (The number and the earnings of persons paid on a piecework basis were required for those who worked on Friday of the week preceding the enumeration.) The number of hours that workers were expected to work to earn their pay was asked for each class except those employed on an hourly or piecework basis. For 1960, the data include office estimates for farms submitting incomplete reports of wage rates and hours worked. The estimates were consistent with the size and type of operations for the individual farm as compared with similar farms in the area for which complete reports were received.

Fertilizer and Lime.—The questions about fertilizer and lime, relate to the acreage on which fertilizer and lime were used and to the quantity used. Farm operators were asked to report total quantities used in 1959 on the farms they operated regardless of when or by whom the fertilizer and lime were purchased.

Fertilizer.—The report for fertilizer was to refer only to commercial fertilizer and fertilizing materials, including rock phosphate. The acres fertilized and the tons of fertilizer applied to those acres were obtained separately for selected crops. The selected crops varied by region so that it was possible to obtain detailed data for the crops most commonly fertilized in each region. In cases where the same land was used for more than one crop, the acres fertilized were to be reported separately for each crop. If the same crop was fertilized more than once, however, the acres in that crop were to be reported only once. In all cases, the total quantity of fertilizer used in 1959 was to be reported, including quantities used on land occupied by crops planted in 1958 or by crops to be harvested in 1960.

Reports for quantity of fertilizer and fertilizing materials used were required for both dry and liquid materials. The terms "dry" and "liquid" referred to the form in which the fertilizers and fertilizing materials were purchased and not to the way in which they were applied. Thus, dry fertilizers were those purchased in dry or solid form, as powders, dusts, granules, pellets, etc.; liquid fertilizers were those purchased in fluid form, as solutions or as liquefied gases.

Lime.—The data for lime relate to the total acreage limed in 1959 and the total tonnage of lime and liming materials used on those acres for purposes of conditioning the soil. Instruc-

tions on the questionnaire stated that ground limestone, hydrated and burnt lime, marl, and oyster shells were to be included but that lime used for spraying or sanitation purposes was to be omitted.

Specified Farm Expenditures.—The 1960 questionnaire contained questions for eight items of farm expenditure: (1) purchase of feed for livestock and poultry, (2) purchase of livestock and poultry, (3) machine hire, (4) hired labor, (5) seeds, bulbs, plants, and trees, (6) gasoline and other petroleum fuel and oil, (7) purchase of commercial fertilizer and fertilizing materials, and (8) expenditures for land clearing, breaking, and draining. For each item specified, the total expenditures made for the farm in 1959 were to be reported, whether made by the farm operator, his landlord, or both. A farm operator who rented part of his land to others was to report only the expenditures for the land he operated himself. Enumerators were instructed to ask respondents who had difficulty estimating their expenses for the period between enumeration and the end of the year to estimate them on the basis of current costs.

Feed.—The report on feed purchased for livestock and poultry was to include expenditures for grain, hay, milfeeds, pasture, salt, condiments, concentrates, and mineral supplements as well as for the grinding and mixing of feed. The estimated cost of items furnished by a landlord, contractor, or other owner for feeding poultry and livestock kept on the farm was also to be included. Payments made by a tenant to his landlord for feed grown on the tenant farm were to be excluded.

Livestock and Poultry.—The cost of baby chicks and turkey poults was to be included in the expenditures made for the purchase of livestock and poultry. Enumerators were instructed to ask the farm operator to include the cost or estimated purchase value of poultry and livestock provided by others and cared for by the operator under a contract feeding arrangement. The cost of livestock purchased for resale within 30 days was not to be included. A short-term transaction of that nature was considered to be a dealer operation, not an agricultural one.

Data on the purchase of livestock and poultry were obtained in 1950. The instructions for the 1950 census specified that expenditures for domestic rabbits, fur-bearing animals kept in captivity, and bees were to be included.

Machine Hire.—Expenditures for machine hire relate to custom machine work, such as tractor hire, threshing, grain or seed combining, silo filling, baling, cotton picking, cotton ginning, corn picking, plowing, vegetable harvesting, fruit picking, spraying, and dusting. Any amount spent for the labor included in the cost of machine hire was to be considered as part of the total expenditure. The cost of freight or trucking and exchange work without pay were to be omitted.

Hired Labor.—Expenditures for hired labor were to include total cash payments made in 1959 to family members and to others for farm labor. Payments to persons supplied by a contractor or a cooperative organization and paid directly by them or by the crew boss were also to be included. Payments for the following types of work were to be excluded: housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons specifically employed for such work.

Gasoline and Other Petroleum Fuel and Oil.—Expenditures for gasoline and other petroleum fuel and oil were to relate only to the products used in the farm business. Enumerators were instructed to exclude the cost of petroleum products used for the family automobile when operated for other than farm business purposes and of products used in the farmhouse for heating, cooking, and lighting.

Seeds, Bulbs, Plants, and Trees.—Expenditures were to represent the total amount spent for seeds, bulbs, plants, and trees to be used on the farm operated. The value of seed grown on the farm was to be excluded. For nurseries and greenhouses, the cost of products purchased for immediate resale was also to be excluded.

Commercial Fertilizer and Fertilizing Materials.—Expenditures for fertilizer were to include amounts spent for commer-

cial fertilizer and fertilizing materials only. Expenditures for liming materials and manure were not to be included.

Land Clearing, Breaking, and Draining.—The expenditures for land clearing, breaking, and draining were to include the cost of materials as well as payments for machines hired and also for the labor for operating the machines.

CAOPS

Crops Harvested.—The agriculture questionnaire was similar to the questionnaire used in several previous censuses in that it provided for the collection of detailed data for all crops harvested on each individual farm. The variation in the crops listed on the questionnaires used in different States made possible the separate reporting of all important crops grown in a given area. All versions of the questionnaire contained several "All other crops" questions where crops not specifically listed in separate questions were to be reported.

Acreage of Crops Harvested.—In most instances, the acreage reported for individual crops represents the area harvested during 1959. The area harvested is often less than the area planted.

Unit of Measure.—The unit of measure in which quantities were to be reported has varied for some crops, not only from State to State, but also from census to census. The aim has been to permit reporting in the units of measure currently in use. In the State and district tables, the quantities harvested for each crop are usually expressed in the unit of measure given on the agriculture questionnaire. To provide readily comparable information, data published in earlier reports in different units of measure generally have been converted to the units used in 1960.

Irish Potatoes.—For Irish potatoes, the total quantity harvested was to be reported in all cases, whether harvested for home use or for sale or whether used for livestock feed. The acreage harvested was to be reported only in cases where the quantity amounted to 10 or more hundredweight. This method of reporting was designed to facilitate the enumeration of potatoes harvested on small plots for home use. Essentially the same procedure was followed in 1950. In earlier censuses, however, the acreage of Irish potatoes was to be reported in all cases, even when production was solely for home use. Therefore, the data on acres for censuses prior to 1950 are not fully comparable with those for the last two censuses.

Berries and Other Small Fruits.—The question for berries and other small fruits related specifically to the acreages and quantities harvested for sale. Enumerators were instructed always to report the total quantity of each kind of berry harvested for sale but to report the area harvested only when it amounted to one-tenth acre or more. Nonbearing areas and areas and quantities harvested for home use were to be excluded.

Nursery, Hothouse, and Greenhouse Products.—The questions about nursery, hothouse, and greenhouse products related only to products grown on the place for sale. Crops bought for resale without additional cultivation were to be excluded. The value of sales were to be reported separately for each of three groups, as follows:

- a. Vegetables.
- b. All flowers including those grown in the open.
- c. Plants including those grown in the open.

Forest Products.—The forest products data obtained in the Census of Agriculture relate only to the products cut on farms. Commercial logging, timber operations, and forest products grown or cut on nonfarm places are excluded. Therefore, the data in this report do not represent the total forestry output or income for a district or the State.

Value of Crops Harvested.—The total value of crops harvested represents the estimated value of all crops harvested during the

crop year 1959. It includes the value of quantities consumed on farms as food, feed, seed, etc., as well as quantities sold. Farmers were not asked to report values of crops harvested; the values were calculated in the Processing Office. For many items, the value of each farm product sold was obtained during the enumeration. For farm products for which satisfactory data were not obtained during the enumeration, average prices published by the University of Alaska were used. For individual crops, the quantity harvested was multiplied by the average price at which the crop was sold in the State. Quantities harvested were not obtained for vegetables nor for nursery and greenhouse products. Therefore, for those crops, the value of sales, as obtained in the enumeration, was used in the calculation of total value of crops harvested.

Value of Crops Sold.—Data on the quantity sold and/or the value of sales were obtained during the enumeration for all crops.

LIVESTOCK AND POULTRY

Inventories.—Data for livestock and poultry on farms relate to the number on hand at the time of enumeration. All livestock and poultry, including those being kept or fed under contract, were to be enumerated on the farm or ranch where they were, regardless of who owned them. Livestock in transit from one grazing area to another or grazing in national forests, grazing districts, open range, or on land used under permit were to be reported as being on the place where the person who had control over them had his headquarters.

The time of year at which livestock and poultry are enumerated affects the data. Therefore, the date of enumeration needs to be considered when totals for the various censuses are compared.

Milk Cows, Cows Milked, Milk Produced, and Butter.—Data on the number of milk cows, cows milked, and milk produced relate to the day preceding the enumeration. Data for butter churned were obtained only for 14 States including Alaska, and relate to the calendar week preceding the enumeration.

Whole Milk and Cream Sold.—Data for whole milk and cream sold relate to the entire year 1959. All milk and cream sold from the farm (except quantities purchased from some other place and then resold) were to be included, regardless of who shared the receipts. The questionnaire provided three alternative units of measure for reporting the quantity of milk sold—pounds of milk, gallons of milk, and pounds of butterfat. The respondent was thus permitted to report quantity according to the unit of measure in which payment was received. Pounds of butterfat were converted into gallons or pounds of whole milk on the basis of average butterfat content of milk.

Sows and Gilts Farrowing.—In the 1960 census, data were obtained for the number of litters farrowed between December 1, 1955, and June 1, 1959, and from June 1 to December 1, 1959.

Value of Livestock on Farms.—To obtain the value of livestock on farms, the number of each class of livestock or poultry on hand was multiplied by the State average price. The average price reported for each kind of livestock sold was used in calculating the value of livestock and poultry on farms.

Sales of Live Animals.—The dollar value of sales was obtained from the farmer for cattle, calves, horses, mules, etc., hogs and pigs, sheep and lambs, and goats and kids.

Sales of Poultry and Poultry Products.—For the 1960 Census, sales of chickens were obtained for two groups: (1) broilers and (2) other chickens. The enumeration of broiler sales presents problems arising from the varied contractual arrangements under which broilers are produced. The questionnaire contained an instruction to the effect that all broilers grown for others under contract were to be reported as sold. During office processing operations, the data reported for inventories and sales of chickens four months old and over, chicken eggs sold, and broilers sold were carefully examined. Obvious inconsistencies indicating confusion between broilers and other chickens were corrected on the basis of estimated values and, on the basis of data reported for expenditures for feed, poultry, and livestock purchases, hired labor, etc.

CLASSIFICATION OF FARMS

Scope of Classification.—Data for most items were tabulated and are published for farms classified by size, by tenure of operator, by economic class of farm, and by type of farm.

Farms by Size.—Farms were classified by size according to the total land area established for each farm. The same classification was used for all States. According to definition, a farm is essentially an operating unit, not an ownership tract. All land operated by one person or partnership represents one farm.

Farms by Color of Operator.—Farms were classified by color of operator into two groups, "white" and "nonwhite."

Enumerators were instructed to report the race on the basis of their own observation whenever possible rather than by asking the respondent.

Farms by Tenure of Operator.—The classification of farms by tenure of operator was based on data reported for land owned, land occupied as a homestead, land rented from others or worked for others on shares, land managed for others, and land rented to others or worked on shares by others.

For 1960, each questionnaire was coded, during the editing process to indicate whether it represented a farm operated by a full owner, part owner, manager, or tenant.

The various classifications of tenure, as used for the 1960 census, are defined below:

- a. **Full Owners** operate only land they own or land they occupy as a homestead.
- b. **Part Owners** operate land they own or occupy as a homestead and also land rented from others.
- c. **Managers** operate land for others and are paid a wage or salary for their services. Persons acting merely as caretakers or hired as laborers are not classified as managers. If a farm operator managed land for others and also operated land on his own account, the land operated on his own account was considered as one farm and the land managed for others as a second farm. If, however, he managed land for two or more employers, all the managed land was considered to be one farm.
- d. **Tenants** rent from others or work on shares all the land they operate.

Farms by Economic Class.—The economic classifications represent groupings of farms that are similar in characteristics and size of operation. The economic classes were established on the basis of one or more of four factors: (1) total value of all farm products sold, (2) number of days the farm operator worked

off the farm, (3) the age of the farm operator, and (4) the relationship of income received by the operator and members of his household from nonfarm sources to the value of all farm products sold. Institutional farms, Indian reservations, agricultural experiment stations, and grazing associations were always classified as "abnormal."

The total value of farm products sold was obtained by addition of the reported or values for all products sold from the farm. The value of cattle and calves, horses and mules, dairy products, poultry products, vegetables, nursery and greenhouse products, crops, and miscellaneous forest products was obtained from the farm operator during the enumeration.

Farms were grouped into two major categories, commercial farms and other farms, mainly on the basis of total value of products sold. Farms with a value of sales of \$50 to \$2,499 were classified as commercial if the farm operator was under 65 years of age and (1) he did not work off the farm 100 or more days during the year and (2) the income received by the operator and members of his family from nonfarm sources was less than the value of all farm products sold. The remaining farms with a value of sales of \$50 to \$2,499 and institutional farms and Indian reservations were included in one of the groups of "other farms."

Commercial farms were divided into six economic classes on the basis of the total value of all farm products sold, as follows:

<i>Class of Farm</i>	<i>Value of Farm Products Sold</i>
I-----	\$40,000 and over
II-----	\$20,000 to \$39,999
III-----	\$10,000 to \$19,999
IV-----	\$5,000 to \$9,999
V-----	\$2,500 to \$4,999
VI*-----	\$50 to \$2,499

*Provided the farm operator was under 65 years of age, and—

(1) he did not work off the farm 100 or more days, and (2) the income that he and members of his household received from nonfarm sources was less than the total value of farm products sold.

Other farms were divided into three economic classes as follows:

- a. **Class VII, Part-time.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-time" if the operator was under 65 years of age and he either worked off the farm 100 or more days or the income he and members of his household received from nonfarm sources was greater than the total value of farm products sold.
- b. **Class VIII, Part-retirement.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-retirement" if the farm operator was 65 years old or over. Many of these are farms on which the income from nonfarm sources is greater than the value of sales of agricultural products. Others are residential, subsistence, or marginal farms. In previous censuses, the age of the farm operator was not a criterion for grouping farms by economic class. Since the number of elderly people in our population has been steadily increasing during recent years, a separate classification for farms operated on a part-retirement basis was considered important for an adequate analysis of the agricultural structure of a county or State.
- c. **Class IX, Abnormal.**—All institutional farms and Indian reservations were classified as "abnormal," regardless of the value of sales. Institutional farms include those operated by hospitals, penitentiaries, schools, grazing associations, government agencies, etc.

Farms by Type.—The data for farms by type are estimates based on data tabulated for the farms in the sample. The type represents a description of the major source of income from farm sales. To be classified as a particular type, a farm had to

have sales of a particular product or group of products amounting in value to 50 percent or more of the total value of all farm products sold during the year.

The types of farms, together with the products on which type classification is based, are as follows:

Type of Farm	Source of Cash Income
	(Products with sales value representing 50% or more of total value of all farm products sold)
Cash-grain -----	Corn, sorghums, small grains, soybeans for beans, cowpeas for peas, dry field and seed beans and peas.
Other field-crop-----	Peanuts, potatoes (Irish and sweet), sugarcane for sugar or sirup, sweet sorghums for sirup, broomcorn, popcorn, sugar beets, mint, hops, and sugar beet seed.
Vegetable -----	Vegetables.
Fruit-and-nut -----	Berries, other small fruits, tree fruits, grapes, and nuts.
Poultry -----	Chickens, chicken eggs, turkeys, and other poultry products.
Dairy -----	Milk and cream. The criterion of 50 percent of total sales was modified in the case of dairy farms. A farm having value of sales of dairy products amounting to less than 50 percent of the total value of farm products sold was classified as a dairy farm, if— (a) Milk and cream sold accounted for more than 30 percent of the total value of products sold and— (b) Milk cows represented 50 percent or more of total cows and— (c) The value of milk and cream sold plus the value of cattle and calves sold amounted to 50 percent or more of the total value of all farm products sold.
Livestock other than dairy and poultry-----	Cattle, calves, hogs, sheep, goats, wool and mohair except for farms in the 17 Western States, Louisiana, and Florida that qualified as livestock ranches.
Livestock Ranches-----	Farms in the 17 Western States, Louisiana, Alaska, Hawaii, and Florida were classified as livestock ranches if the

sales of livestock, wool, and mohair represented 50 percent or more of the total value of farm products sold and if pastureland or grazing land amounted to 100 or more acres and was 10 or more times the acreage of cropland harvested.

General-----	Field seed crops, hay, silage. A farm was classified as general also if it had cash income from three or more sources and did not meet the criteria for any other type.
Miscellaneous-----	Nursery and greenhouse products, forest products, mules, horses, colts and ponies. Also all institutional farms and Indian reservations.

Value of Farm Products Sold.—Data for the value of farm products sold in 1959 were obtained by enumeration. The questionnaire used provided for farm operators to report value of sales of each product or group of products.

Data for the sales of farm products represent total sales for the entire farm, regardless of who shared the receipts. For tenant-operated farms, the landlord's share of agricultural products was considered as sold provided the products were moved off the tenant farm. All crops, livestock, and poultry raised under a contract arrangement were considered as sold from the farm where they were raised. For institutional farms, all agricultural items produced on land operated by the institution and consumed by the inmates were to be reported as sold.

All sales data relate to one year's farm operations. Crop sales are for crops harvested during the crop year, whether the crops were actually sold immediately after harvest or placed in storage for later sale. Sales of livestock and livestock products relate to the calendar year, regardless of when the livestock or products were raised or produced. All wool and mohair reported as shorn or clipped was considered as sold.

Enumerators were instructed to record gross values of quantities sold, with no deductions for feed, seed, fertilizer, water, labor, or marketing costs. For some products, however, net values may have been reported. In the case of milk, particularly, some farm operators may have reported the payments they received as the gross value of sales, even though the buyer had deducted handling and hauling charges before making payment. Adjustments were made in the data reported only in cases of obvious error.

Chapter A

STATISTICS FOR THE STATE

APPENDIX

The Questionnaire

(73)

Form (A) 1-26 (10-10-59)

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 142, 221-4, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. The census report cannot be used for purposes of taxation, insurance, or regulation.

Section I. PERSON NOW IN CHARGE

1. What is your name (person in charge)?

2. What is your mail address?

Section II. LAND OWNED, HOMESTEADED, AND RENTED, APRIL 1, 1960

OWNED LAND: If you own more than one tract, include all land owned in Alaska. Include not only cropland but also pastureland, woodland, wasteland, etc.

3(a) How many acres do you own? (Do not include land not patented)

4(a) How many acres do you occupy as a homesteaded not yet patented?

5(a) How many acres do you rent from others? Include acres worked on shares.

6(a) How many acres do you operate for others as a hired manager?

ACRES IN THIS PLACE:

7. Adding acres owned, acres occupied as a homestead, and acres rented from others, we get

Section III. CROPS HARVESTED IN 1959

Include all crops harvested in 1959 on land in this place (question 7) whether harvested by you or by someone else. Be sure to include the landlord's share. For value of sales, always include value of landlord's share as sold except that used for seed or feed on this place. Do not include crops which were a complete failure or which were not harvested because of labor shortage, low prices, or destruction from any cause. Do not include crops grown by you on any land now farmed or rented by others. Report values in whole dollars only.

SMALL GRAINS, HAY, AND MISCELLANEOUS CROPS (Include landlord's share as sold if taken from this place)

8. Oats harvested alone for grain?

9. Barley harvested alone for grain?

10. Other grains harvested for grain? (Wheat, rye, mixed grains, etc.) (Underline kind)

11. Mixed grains cut for hay? (Oats and peas, oats, vetches, and peas, etc.)

12. Tame and cultivated grasses cut for hay?

13. Marsh, prairie, or wild grasses cut for hay?

14. Mixed grains, vetches, peas, and grasses cut for silage?

15. Irish potatoes for home use or for sale? (If less than 10 hundredweight were harvested, do not report acre)

16. How much was received from the sale of oats, barley, peas, and other grains harvested for grain last year?

17. How much of last year's hay, including small grain hay, was sold?

18. How much was received from the sale of Irish potatoes harvested last year?

VEGETABLES FOR HOME USE AND FOR SALE

19. Were any vegetables grown in the open or under glass last year for home use?

20. Were any vegetables grown in the open for sale last year?

21. Cabbage?

22. Carrots?

23. Cauliflower?

24. Celery?

25. Lettuce?

26. Radishes?

27. Spinach?

28. Other? (See list below)

Give name

Give name

Give name

Give name

Spinach

Green peas (split)

Bean (broad)

Crossed onions

Turnip

BERRIES:

- [29] Were any tame berries, such as strawberries, raspberries, currants, or gooseberries, harvested for sale in 1959? No ☐ Yes ☐
(Do not include nonbearing area. Do not include wild berries.)

(If "No," mark X and skip to question [32].)

(Answer these questions, if "Yes")

	(1) Acres harvested? (Report tenths of acres)		(2) Quarts harvested?	
	No	Yes	Tenths	Quarts
30. Strawberries?	<input type="checkbox"/>	<input type="checkbox"/>	_____	_____
31. Other tame berries? Currants? Gooseberries? Raspberries?	<input type="checkbox"/>	<input type="checkbox"/>	_____	_____
Were any of the following berry crops harvested for sale last year?	<input type="checkbox"/>	<input type="checkbox"/>	_____	_____

GREENHOUSE, HOTHOUSE, AND NURSERY PRODUCTS FOR SALE

- [32] Were any vegetables grown in a greenhouse or hothouse for sale in 1959? No ☐ Yes ☐
[33] Were any flowers or plants grown, either under glass or in the open, for sale in 1959? No ☐ Yes ☐

(If "No," for both questions 32 and 33, skip to question [34].)

- 34(a) How many square feet are in greenhouses or hothouses used for growing vegetables, flowers, or plants for sale? None ☐ Square feet _____
(b) What was the value of all vegetables sold in 1959 which were grown in greenhouses or hothouses? None sold ☐ \$ _____/00
(c) What was the value of all flowers sold in 1959 which were grown either under glass or in the open? None sold ☐ \$ _____/00
(d) What was the value of all plants sold in 1959 which were grown either under glass or in the open? None sold ☐ \$ _____/00

OTHER CROPS:

- [35] Are there any other crops that were harvested in 1959? No ☐ Yes ☐

(If "Yes," answer for each crop.)

Place of crop?	Acres harvested?	Quantity harvested?	Unit of measure?	Value of sales?
_____	_____	_____	_____	\$ _____/00

Section IV.—ACRAGE, APRIL 1, 1960, AND USE OF LAND IN 1959

36. Acres in this place (copy area from question 7—
(Account in questions 37 through 41(b) for all the land in this place in terms of how it was used last year.)

CROPLAND:

37. From how many acres of land were crops harvested (including hay cut) last year? None ☐
(This area may be obtained by adding the acres of the various crop reports in Section III. However, if more than one crop was harvested from the same land last year, count the land only once here.)

38. On how many acres of land did all crops completely fail last year? None ☐
(Include here any land planted to crops which were not harvested because of frost damage, labor shortage, low prices, or destruction from any cause.)

39. Is there any other land in this place that could be plowed for crops without additional clearing or draining? No ☐ Yes ☐

(If "No," mark X and skip to question [40].)

- (a) How many acres of this land were pastured (or grazed) last year?

- (b) How many acres of this land were not pastured (or grazed) last year?

WOODLAND: (Include as woodland all wood lots and timber tracts, cutovers and deforested land which has value for wood products and has not been improved for pasture.)

- [40] Is there any woodland on this place? No ☐ Yes ☐

(If "No," mark X and skip to question [41].)

- (a) How many acres of woodland were pastured (or grazed) last year?

- (b) How many acres of woodland were not pastured (or grazed) last year?

ALL OTHER LAND:

- [41] Is there any land, other than woodland, in this place not suitable for growing crops? No ☐ Yes ☐

- (a) How many acres were pastured (or grazed) last year?

- (b) How many acres were not pastured (or grazed) last year?

Add these acres (questions 37, 38, 39(a), 39(b), 40(a), 40(b), 41(a), and 41(b)) and enter total here _____

42. How many acres of land in this place have been cleared since 1950? None ☐ Acres _____

43. How many acres of woodland in this place are suitable for clearing for crops? None ☐ Acres _____

Section V.—RACE, AGE, RESIDENCE, OFF-FARM WORK, AND OTHER INCOME

44. What is your race? (Mark one) (1) ☐ (2) ☐ What race?
White ☐ Other ☐

45. How old were you on your last birthday? Years _____

46. Do you live on this place? No ☐ Yes ☐

If "No," enter location of land in this place under "Remarks."

47. When did you begin to operate this place? Month _____ Year _____
Report month if you began to operate this place since January 1, 1958.

OFF-FARM WORK AND OTHER INCOME:

48. How many days last year did you work off your farm? Include work at a nonfarm job, business, profession, or on someone else's farm. (Do not include exchange work.)

- (Mark one) (1) ☐ (2) ☐ (3) ☐ (4) ☐ (5) ☐ (6) ☐
None ☐ 1 to 49 days ☐ 50 to 99 days ☐ 100 to 149 days ☐ 150 or more days ☐

49. Did any other member of your family living with you have a nonfarm job, business, profession, or work on someone else's farm in 1959? No ☐ Yes ☐

50. Did you have any income in 1959 from any of the following sources: Sale of products from land rented out? Cash rent? Boarders? Social Security? (Old-age assistance? Pensions? Veterans' allowances? Unemployment compensation? Interest? Dividends? Profits from nonfarm business? Financial help from members of your family? No ☐ Yes ☐

(If "None" for question 48 and "No" for both questions 49 and 50, skip to question [52].)

51. Was the income which you and your family received from work off the farm and from other sources (listed in questions 48 and 50) greater than the total value of all agricultural products sold from your place last year? No ☐ Yes ☐

Section VI.—FOREST PRODUCTS CUT IN 1959

- [52] Were any firewood, fence posts, sawlogs, or other forest products cut in 1959 on this place? No ☐ Yes ☐

(If "No," mark X and skip to question [57].)

- How many of the following forest products were cut in 1959? Cords _____ (if sold)
53. Firewood and fuelwood? Number _____
54. Fence posts? Board feet _____
55. Sawlogs and veneer logs? Board feet _____

56. How much saw or will be recovered from the sale of firewood, fence posts, logs, lumber and other forest products cut in 1959? None sold ☐ \$ _____/00

Section VII.—POULTRY AND LIVESTOCK NOW ON THIS PLACE AND LIVESTOCK PRODUCTION AND SALES IN 1959

Include all poultry and animals on this place owned by you, by your landlord, by your employees, and by others. Include livestock grazing on public land.

POULTRY:

- [57] Are there any chickens, turkeys, or other poultry on the place? No ☐ Yes ☐

58. If "No," were there any on this place any time last year? No ☐ Yes ☐

(If "No," for both questions 57 and 58, mark X and skip to question [59].)

59. How many chickens (hens, pullets, roosters, etc.) 4 months old and over, are now on this place? None ☐ Number _____

60. How many broilers were sold last year? None ☐ Number _____
(Report all broilers sold and those grown for others under contract.)

61. How many hens, roosters, pullets, cockerels, and other chickens were sold last year? None ☐ Number _____

62. How many dozens of chicken eggs were sold last year? None ☐ Dozens _____

63. How many turkeys and turkey fryers were raised last year? None ☐ Number _____
(Include those raised from poult hatched, poult bought, and those raised for others under contract.)

64. How many turkey hens now on hand are you keeping for breeding? None ☐ Number _____

65. How many ducks, geese, and other poultry (not counting chickens and turkeys) were sold in 1959? None ☐ Give name _____ Number _____

66. How much was received in 1959 from the sale of chickens and chicken eggs, turkeys, ducks, geese, and miscellaneous poultry and their eggs? None sold ☐ Value of sales \$ _____/00

<p>SHEEP AND LAMBS: [67] How many ewes, rams, wethers, and lambs of all ages are on this place? (If "None," mark X and skip to question [68].) None <input type="checkbox"/> Number _____</p> <p>Of this total, how many are — (a) Lambs under 1 year old? Number _____ (b) Ewes 1 year old and over? Section X. FARM LABOR

101. About how many hours *last week* did you (the person in charge of this place) do farm work or chores on this place? (Mark one) ☐ (1) None ☐ (2) 1 to 14 hours ☐ (3) 15 hours or more ☐

102. How many other members of your family did 15 hours or more of farm work or chores on this place *last week* without receiving cash wages? (Do not include housework) None ☐ Persons ☐

103. How many hired persons did any farm work or chores on this place *last week*? Include members of your family receiving cash wages. (If "None," mark X and skip to question [106].) None ☐ Persons ☐

104. Of these hired persons working *last week*, how many were employed on this place for

a. 150 days or more *last year*? None ☐ Persons ☐

b. Less than 150 days *last year*? None ☐ Persons ☐

(The total for questions a and b must equal the number for question 103.)

(1) Number of persons	(2) What was the agreed cash rate of pay? (If more than one person, give average)	(3) How many hours per person were these workers expected to work to earn this pay?
Monthly bases*	\$ _____ 00 per month	Per month hours _____
Weekly bases*	\$ _____ 00 per week	Per week hours _____
Daily bases*	\$ _____ 00 per day	Per day hours _____
Hourly bases*	\$ _____ (Cents) per hour	
Piecework bases*		

(The total of the persons reported in column 1 must equal the number for question 103.)

105. Of these hired persons working *last week*, how many were paid on a _____

106. How many hired persons paid on a piecework basis worked on this place *last Friday*? None ☐ Persons ☐

(If "None," mark X and skip to question [106].)

107. How much did these hired persons on piecework (reported for question 106) earn for their work *last Friday*? \$ _____ 00

124. On what kind of road is this place located? (Mark one) ☐ (1) Hard surface ☐ (2) Gravel, shell, or shale ☐ (3) Dirt or unimproved

How many miles to a hard surface road? ☐ Less than 1 mile OR ☐ Whole miles

If marked here, answer _____

125. On what date did you fill this questionnaire? _____ 1960

REMARKS

Section XI. EQUIPMENT AND FACILITIES NOW ON THIS PLACE

Include equipment, whether owned by you or by others, on this place. Include equipment and facilities that are temporarily out of order.

How many of the following are on this place

[108] Grain combines* _____

109 Field forage harvesters (for field chopping of silage and forage crops)* _____

110 Pallet diggers* _____

111 Silos (upright and pit)* _____

112 Motorcycles (include pick-ups)* _____

113 Wheel tractors other than garden* _____

114 Garden tractors* _____

115 Crawler tractors (tracklaying)* _____

116 Automobiles* _____

Do you have on this place

117 Telephone* No ☐ Yes ☐

118 Home freezer (for quick freezing and storing food)* No ☐ Yes ☐

119 Milking machine* No ☐ Yes ☐

120 Electric milk cooler* No ☐ Yes ☐

121 Crop drier (for grain, forage, or other crops)* No ☐ Yes ☐

122 Power-operated elevator, conveyor, or blower* No ☐ Yes ☐

123 Electricity* (1) Yes, from a power line ☐ (2) Yes, from a home plant ☐ (3) No ☐

Section XII. ENUMERATOR'S RECORD To be filled by Census Enumerator

Enumeration District _____ If the land is within an incorporated place, give name _____

If he furnished the information in this report? (Mark one) ☐ Operator ☐ Wife or other member of operator's family ☐ Landlord ☐

Hired laborer ☐ Neighbor ☐ Owner ☐ Give name _____

Certified by _____ Date (month and day) _____ 1960

Checked by _____ Date (month and day) _____ 1960

PREFACE

Volume I, Counties, is one of the five principal reports presenting the results of the 1959 Census of Agriculture. This volume, in 54 parts, presents the compilation of the information given by farm operators to census enumerators in 1959.

The 1959 Census of Agriculture was taken in conformity with the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

The collection of the data was carried out by census enumerators directed by supervisors appointed by the Director of the Bureau of the Census and working under the direction of Robert B. Voight, then Chief, Field Division. Paul R. Squires, then Special Assistant to the Director, was responsible for the recruitment of the field staff. The planning of the census and the compilation of the statistics were supervised by Ray Hurley, Chief, Agriculture Division, Warder B. Jenkins, Assistant Chief, and Orvin L. Wilhite, Assistant Chief. They were assisted by M. Vincent Lindquist, Thomas Jabine, Robert S. McCauley, John C. Mackey, Robert Standley, Hilton E. Robison, Helen E. Teir, Carl R. Nyman, Kenneth R. Norell, Gladys L. Eagle, Henry L. DeGraff, Charles H. Boehne, Joseph A. Correll, Margaret G. Wood, Evelyn K. Jett, Simon Yablon, Emma B. Gass, Charlotte J. Messinese, Bennie L. Sharp, Isaac E. Lemon, James M. Lindsey, Samuel S. Murray, William F. Kauffman, Hector Vila, Harry P. Owings, Charles A. Nicholls, Henry A. Tucker, Robert S. Boyle, Helen M. Davenport, Albert W. Graybill, Lois G. Miller, Thomas D. Monroe, Gerald P. Owens, Bernard L. Ross, Marvin M. Thompson, Helen D. Turner, Kurt W. Luethy, Arnold L. Bollenbacher, George W. Coffman, Joseph A. Horak, Samuel J. Hundley, Donald K. Larson, Chester G. Lykins, Wilmer R. Maxham, Virgil L. McClain, Jr., Darrell D. Proehaska, Robert J. Rades, Hubert E. Sites, Duane E. Traylor, Donald H. von Steen, Elmer O. Rea, Frances G. Compton, Lillian W. Bentel, and Neil V. Perkins.

Acknowledgment is made of the technical assistance and the loan of personnel by the United States Department of Agriculture in the planning, the enumeration, and the compilation of the 1959 Census of Agriculture.

October 1961

UNITED STATES CENSUS OF AGRICULTURE: 1959

FINAL REPORTS

Volume I—Counties—A separate part for each State. Statistics on number of farms; farm characteristics; acreage in farms; cropland and other uses of land; land-use practices; irrigation; farm facilities and equipment; farm labor; farm expenditures; use of commercial fertilizer; number and kind of livestock; acres and production of crops; value of farm products; characteristics of commercial farms, farms classified by tenure, by size, type, and economic class; and comparative data from the 1954 Census of Agriculture.

Volume I is published in 54 parts as follows:

Part	State or States	Part	State or States	Part	State or States
1	New England States:		West North Central—Continued		Mountain:
2	Maine.	19	South Dakota.	38	Montana.
3	New Hampshire.	20	Nebraska.	39	Idaho.
4	Vermont.	21	Kansas.	40	Wyoming.
5	Massachusetts.		South Atlantic:	41	Colorado.
6	Rhode Island.	22	Delaware.	42	New Mexico.
7	Connecticut.	23	Maryland.	43	Arizona.
8	Middle Atlantic States:	24	Virginia.	44	Utah.
9	New York.	25	West Virginia.	45	Nevada.
10	New Jersey.	26	North Carolina.		Pacific:
11	Pennsylvania.	27	South Carolina.	46	Washington.
12	East North Central:	28	Georgia.	47	Oregon.
13	Ohio.	29	Florida.	48	California.
14	Indiana.		East South Central:	49	Alaska.
15	Illinois.	30	Kentucky.	50	Hawaii.
16	Michigan.	31	Tennessee.		Other Areas:
17	Wisconsin.	32	Alabama.	51	American Samoa.
18	West North Central:	33	Mississippi.	52	Guam.
	Minnesota.		West South Central:	53	Puerto Rico.
	Iowa.	34	Arkansas.	54	Virgin Islands.
	Missouri.	35	Louisiana.		
	North Dakota.	36	Oklahoma.		
		37	Texas.		

Volume II—General Report.—Statistics by Subjects, United States Census of Agriculture, 1959. Summary data and analyses of the data by States, for geographic divisions, and for the United States, by subjects, as illustrated by the chapter titles listed below:

Chapter	Title	Chapter	Title
I	Farms and Land in Farms.	VII	Field Crops and Vegetables.
II	Age, Residence, Years on Farm, Work Off Farm.	VIII	Fruits and Nuts, Horticultural Specialties, Forest Products.
III	Farm Facilities, Farm Equipment.	IX	Value of Farm Products.
IV	Farm Labor, Use of Fertilizer, Farm Expenditures, and Cash Rent.	X	Color, Race, and Tenure of Farm Operator.
V	Size of Farm.	XI	Economic Class of Farm.
VI	Livestock and Livestock Products.	XII	Type of Farm.

Volume III—Irrigation of Agricultural Lands. Western States (Dry Areas)—Data by States for drainage basins and a summary for the area, including number and types of irrigation organizations, source of water, expenditures for works and equipment since 1950, water used and acres served for irrigation purposes.

Volume IV—Drainage of Agricultural Lands. Data by States on land in drainage organizations, number and types of organizations, cost of drainage and drainage works.

Volume V—Special Reports, Part I.—Horticultural Specialties. Statistics by States and a summary for the United States presenting number and kinds of operations; gross receipts and/or gross sales; sales of nursery products, flower seed, vegetables grown under glass, and propagated mushrooms; number of container-grown plants; inventory products; sales of bulb crops; employment; structures and equipment.

Titles of additional parts of this volume are not available as this report goes to press.

Principal Islands, Counties and Selected Places

INTRODUCTION

THE 1959 CENSUS OF AGRICULTURE

History of the Censuses.—The 1959 Census is the 17th nationwide agricultural census. The first agricultural census was taken in 1840, at the same time as the Sixth Decennial Census of Population. From 1850 to 1920, an agricultural census was taken every 10 years. With increased application of scientific findings and the growing use of mechanization in agriculture, farming practices were changing so rapidly that facts collected at 10-year intervals were no longer adequate. Aware of the need for more accurate and timely information, the Congress in 1909 (36 stat. 10, sec. 31, provided for a census to be taken in 1915 and every 10 years thereafter which was to be in addition to the census of agriculture to be taken at the time of the decennial census of population. The 1915 census was not taken, however, because of the abnormal conditions created by World War I. Beginning with 1920, a national agricultural census has been taken every 5 years. The first United States Census of Hawaii was taken in 1900.

Legal Basis for the Census.—The 1959 Census of Agriculture was authorized by an Act of Congress, as were all prior censuses of agriculture. "Title 13, United States Code-Census," codified in August 1954, and amended in August 1957 and September 1960, is now the legal basis for censuses of agriculture and other censuses, and surveys conducted by the Bureau of the Census. Section 142, paragraph (a), of Title 13 makes provision for the Census of Agriculture. It reads as follows:

"The Secretary shall, beginning in the month of October 1959, and in the same month of every fifth year thereafter, take a census of agriculture, provided that the censuses directed to be taken in October 1959 and each tenth year thereafter, may, when and where deemed advisable by the Secretary, be taken instead in conjunction with the censuses provided in section 141 of this title." (Section 141 relates to the decennial censuses of population, unemployment, and housing to be taken as of the first day of April of each decennial year.) Under authority granted by Section 4 of Title 13, the Secretary of Commerce delegated "the functions and duties imposed upon him by this title" to the Director of the Bureau of the Census.

Pretest of the 1959 Census.—A "pretest" of the field procedures of the 1959 Census of Agriculture was conducted in 17 counties of the United States during the fall of 1958. The purpose of the pretest was to provide the Bureau with a measure of the effectiveness of the questions and procedures planned for the 1959 nationwide census. Three versions of the agriculture questionnaire—the first one for Northern States, the second for Southern States, and the third for Western States—were used in the pretest. Each version contained questions appropriate to the type of agriculture in the part of the country where it was used. All major aspects of field forms and procedures, from the hiring and training of crew leaders and enumerators to actual interviews with farm operators, were given a "trial run" in each of the 17 counties. Preliminary versions of reporting forms, maps, payroll records, training guides, and instruction manuals were subjected to actual use under conditions simulating those expected in the nationwide enumeration conducted in the fall of 1959.

In making final preparations for the 1959 census, the staff of the Bureau drew heavily on the results of the pretest, as well as on experience gained from previous censuses.

Training Program for Personnel for Enumeration.—Every person hired to do work in connection with the 1959 Census of Agri-

culture received specialized training for his job. Staff members of the Washington and Regional Offices of the Bureau and of the U.S. Department of Agriculture trained approximately 110 agriculture field assistants and 2,100 crew leaders. The crew leaders, in turn, trained and supervised approximately 30,000 enumerators. All training was presented according to procedures contained in various guides and manuals prepared by the Bureau. The training program included filmstrips, map-reading, practice interviewing, and practice filling of questionnaires and other census forms. In most instances, training sessions were held near the areas in which employees worked and immediately prior to the beginning of their assignments.

Enumeration Period.—The actual enumeration in the conterminous United States started at dates varying from October 7 to November 18, 1959. In general, starting dates were based upon regional variations in harvesting seasons and on weather conditions. The primary aim was to have the enumeration late enough to follow the harvesting of the bulk of important crops and early enough to precede the advent of winter weather with the attending unfavorable travel conditions. The bulk of the enumeration work was completed within three to four weeks after the starting date. In Hawaii, the enumeration was made during the months of December 1959 and January 1960; and in Alaska, during April 1960.

Enumeration starting dates for the Census of 1959 are given in State Table 11, together with figures showing the percentage of farms enumerated in the State during weekly periods.

Data for inventory items—land in farms, machinery and equipment, livestock, and poultry—relate to the situation at the actual time of enumeration of each individual farm. Data for acres, production, and sales of crops, except for pineapples, relate to the crops harvested during the crop year 1959, regardless of whether and when they were sold while data for sales of livestock and livestock products relate to the calendar year 1959. Since the enumeration was made before the end of 1959, special emphasis was placed upon the inclusion of estimates for crops yet to be sold and for livestock and livestock products expected to be sold in the period from the time of enumeration to the end of the calendar year. Instructions on the questionnaire and the wording of questions were designed to assure that full crop-year or calendar-year data would be reported. For example, "How much of this year's crop was or will be sold?"

ENUMERATION FORMS AND PROCEDURES

Authorization.—Section 5 of Title 13 of the United States Code authorizes the preparation of forms and questionnaires used in the census. It reads as follows:

"The Secretary shall prepare schedules, and shall determine the inquiries, and the number, form, and subdivisions thereof, for the statistics, surveys, and censuses provided for in this title."

The Agriculture Questionnaire.—The questionnaire for the 1959 Census of Agriculture was prepared by the staff of the Bureau. Selection of the inquiries was based on the results of the 1958 pretest and experience gained in earlier censuses. Careful consideration was given to such factors as the current availability

of data from other sources, the possibility of obtaining data by methods other than a census, the adequacy of the data that might be obtained, and the need for and usefulness of the data. Two committees gave advice and counsel to the Bureau. One of these, a Special Advisory Committee, was composed of members designated by the organizations they represented, following an invitation from the Director of the Bureau of the Census to name a representative to serve in an advisory capacity. The Special Advisory Committee for the 1959 Census of Agriculture was made up of one representative from each of the following: Agricultural Publishers Association, American Association of Land-Grant Colleges and State Universities, American Farm Bureau Federation, American Farm Economic Association, American Statistical Association, Farm Equipment Institute, National Association of Commissioners, Secretaries, and Directors of Agriculture, National Council of Farmer Cooperatives, National Farmers' Union, National Grange, Rural Sociological Society, and the U.S. Department of Agriculture. A representative of the Bureau of the Budget was in attendance at all meetings of the Advisory Committee.

Because of the special interest of the U.S. Department of Agriculture in censuses of agriculture, the Director of the Bureau of the Census sought the continuous cooperation of that organization in developing plans, questionnaires, and procedures for the 1959 Census of Agriculture. Working Groups were established in the U.S. Department of Agriculture to make recommendations for the following general subjects:

Tenure, Land Values, and Mortgage Debt
Land Use and Conservation and Production Practices
Field Crops
Fruits and Vegetables
Forest Products
Livestock, Poultry, and Dairy
Income and Expenditure (including Contractual Operations)
Farm Labor
Equipment and Facilities (including Structures)

Each Working Group had the responsibility for ascertaining the U.S. Department of Agriculture's need for data in the field covered by its "terms of reference" and for presenting recommendations to a small Joint Committee comprising representatives of both the Bureau of the Census and the U.S. Department of Agriculture. The Joint Committee received written recommendations from each Working Group. The Chairman of each Group appeared before the Joint Committee as did any member of the Working Group who was needed to present supplemental information of a specialized nature.

Prior to the formulation of the questionnaire, State Agricultural Colleges and other major users of census data were invited to suggest inquiries for the enumeration. Each member of the Special Advisory Committee had the opportunity and the responsibility for channeling in suggestions from the organization he represented. The number of inquiries submitted from all sources greatly exceeded the number that could be included in the census, from the point of view of cost, of the respondent's time and patience, and of practical value to the majority of users of data.

The final selection included 316 questions, some of which consisted of several parts, for the 48 States comprising the conterminous United States. Although each of the 316 questions was asked in one or more of the 48 States, considerably less than this total was asked in any one State because of the use of "State" questionnaires. The number of questions ranged from 159 on the questionnaire for Maine to 194 on the questionnaire for California. In all, 38 versions of the questionnaire—one for each State or combination of adjoining States and two for Texas—were used for the 1959 census in the conterminous United States

as compared with 21 versions in 1954 and 41 in 1950. A separate version was used in Alaska and another in Hawaii.

Differences in the questionnaires were designed to account for regional and local differences in agriculture. Most, but not all, of the differences related to crops. The use of State questionnaires made possible the inclusion of separate inquiries for all important crops grown within a State and, at the same time, a reduction in the total number of inquiries for a State. Questions that did not apply, to any considerable degree, to a particular State were omitted from the questionnaire used in that State. For example, separate questions about citrus fruits were omitted from all questionnaires except for the few States where citrus fruits are grown. An added advantage of State questionnaires was that production and sales data could be asked in the unit of measure most commonly used by the farmers in each State. Regional variation in the number and type of questions is an important provision of the census for obtaining complete coverage of agricultural operations.

About 2 weeks before the start of the enumeration, agriculture questionnaires were mailed to most households in rural areas. A letter was attached to each questionnaire asking the farm operator to fill the questionnaire and to give it to the enumerator when he called. The purpose of this procedure was to save time and money in taking the census and to improve the quality of the information given by farm operators. By having the questionnaire ahead of time, the farmer could determine what information would be required and could check his records in advance of the enumerator's visit. It was, however, the responsibility of the enumerator to obtain an agriculture questionnaire for each place which qualified. If the questionnaire had been filled out by the farm operator, the enumerator was instructed to examine the questionnaire for completeness and accuracy and, if need be, to give the farmer such help as might be necessary.

Agricultural Operations.—The training of enumerators stressed the concept that a census of agriculture is a census of agricultural operations rather than a census of farms. This concept was intended to assure a complete agricultural census free of any personal judgment by enumerators as to what constitutes a farm. In accordance with clearly defined procedures, an enumerator was required to obtain an agriculture questionnaire for each person who had charge of one or more agricultural operations, whether or not he considered himself to be a farm operator. For enumeration purposes, it was considered that there were agricultural operations on a place if, at any time in 1959—

- a. Any livestock (hogs, cattle, sheep, goats, horses, or mules) were kept on the place.
- b. A combined total of 20 or more chickens, turkeys, and ducks were kept on the place.
- c. Any rice, hay, sugarcane, or other field crops were grown on the place.
- d. A combined total of 20 or more fruit trees, coffee trees, and nut trees were on the place.
- e. Any vegetables, berries, or nursery products or flowers were grown on the place for sale.

As a result of the requirement that all places having agricultural operations be enumerated, more questionnaires were obtained than are included in the tabulations for farms. During the office processing operations that followed the completion of enumeration, criteria were applied to the questionnaires to sort out for tabulation those that represented farms according to the census definition of a farm (see page XIII).

Enumeration Assignments and Enumeration Districts.—To assure a complete enumeration within the time allotted, Hawaii was divided into 36 Enumeration Assignments, or EA's. Each EA comprised an area that one enumerator could reasonably be

expected to canvass within a 3- to 4-week period, as indicated by performance records from the 1950 Census.

Each EA was made up of one or more Enumeration Districts, or "ED's," as the geographic unit for enumeration. Prior to the enumeration, the ED's were classified into three groups on the basis of the density of dwellings in relation to the number of farms. Through the use of different canvassing procedures for each group of ED's, the Bureau was able to reduce the cost of enumeration without running any material risk of missing any farms or other places with agricultural operations. The ED groupings and canvassing procedures are described below.

Group I Enumeration Districts.—In general, ED's with no well-defined cluster of dwellings were considered to be open-country areas and comprise Group I. For each ED of Group I, in his Enumeration Assignment, the enumerator was required to list in his Record Book the name of every head of household living in the ED and also the name of every person not living in the ED who had agricultural operations there.

Group II Enumeration Districts.—Rural ED's in which the number of dwellings was large in relation to the number of farms were considered to be in Group II. For each ED, in Group II, the enumerator was required to list the head of the household for all dwellings in the ED except for those on less than one acre of ground in built-up residential areas of 50 or more dwellings. He was also required to determine, by observation or local inquiry, whether there were any farms or other places with agricultural operations in the built-up areas and, if so, to obtain an agriculture questionnaire.

Group III Enumeration Districts.—Most incorporated places and unincorporated villages having approximately 150 or more dwellings were designated as separate ED's and are classified as Group III. Also, most ED's in counties around large metropolitan areas were designated as Group III ED's.

A few enumeration districts that comprised incorporated places or that were within an incorporated city were classified as Group I or Group II because they had a large number of farms. A few others, comprising extensive rural districts requiring considerable travel, were classified as Group III because they had only a small number of farms.

Enumerator's Record Book.—Each enumerator received one or more Record Books containing a listing form for use during canvassing. (See appendix for facsimile of one page of listing form included in Enumerator's Record Book.) The lines on the listing form were numbered in consecutive order. Except as otherwise prescribed for Group II and Group III ED's, the enumerator listed in his Record Book the name of each head of household living in his assigned area and also the name of each person not living in his area who had agricultural operations there. As he made his listing, he also asked the questions about agricultural operations that were printed on the listing form. Answers to these questions determined, for the enumerator, whether or not an agriculture questionnaire was required for the person listed and, if so, whether he or some other enumerator was responsible for getting it. Thus, the Record Book served as an important aid to the enumerator in securing complete coverage of all agricultural operations within his area. At the same time, it helped to prevent enumeration of the same place by two or more enumerators.

Enumeration Maps.—As a second aid to getting complete coverage, each enumerator received a map or, in a few exceptional cases, a brief written description of the area assigned to him for enumeration. He was required to plan and follow an orderly route of enumeration within the boundaries of his assigned area in accordance with established canvassing procedures. As the enumerator listed a place in his Record Book, he indicated its location by copying onto his map the number of the line on which he listed it. This numbering system indicated the enumerator's route of travel, and helped both the enumerator and his crew leader to determine the extent of coverage of the enumerator's assignment at any given time.

Lists of Special and Large Farms.—Prior to the enumeration, a card list of "special and large farms" was prepared on the basis of records obtained from the 1950 Census and from Federal and State agricultural agencies. In general, "special and large farms" fell into one of three categories: (1) farms having unusually large acreages, livestock inventories, or annual sales as indicated by available records; (2) farms known to be specializing in such operations as sugarcane production, feed lots, flower growers, etc.; (3) farms that might easily be overlooked because they had absentee operators or were not locally thought of as farms, such as institutions.

Enumerators were given the lists for the special and large farms within their assignment areas to use as aids to obtaining complete coverage. Generally, the lists provided insurance against the omission of farming units that could have a significant effect on the totals for a given county or State. The enumerator was instructed to obtain an agriculture questionnaire for each special or large farm in his area or to write an explanation on the card as to why an agriculture questionnaire was not required on the basis of 1959 operations. The crew leader had a duplicate set of the lists for use in checking enumeration coverage.

Field Review of Enumerator's Work.—In the 1959 census, greater emphasis was placed on a detailed review of enumerators' work during enumeration than had been the case in previous censuses. The objective was to detect and correct enumeration errors as early as possible in order to achieve and maintain a high quality of individual performance. Starting on the first day of enumeration and continuing throughout the enumeration period, each crew leader was instructed to make regular and frequent visits to his enumerators. At each visit, he was to follow a clearly defined procedure for observing the enumerator's conduct of interviews and for checking his listings, maps, questionnaires, and other forms for accuracy and completeness.

As an aid to checking coverage and enumerator efficiency, the crew leader was given a list containing estimates of the number of questionnaires required in each enumeration assignment area within his district, and of the mileage and time required to obtain those questionnaires.

PROCESSING OPERATIONS

Completion of Enumeration.—As an enumerator completed his assignment, he turned the portfolio containing questionnaires and other census materials over to his crew leader. After making a final review of the enumerator's work, the crew leader mailed the portfolio to the Agriculture Processing Office at Parsons, Kansas. There, each enumerator portfolio was thoroughly checked for completeness of all required forms and for correct application of the sampling procedure.

Editing of Questionnaires.—Each agriculture questionnaire was individually edited and coded before the information was transferred to punch cards and tabulated. As the first major step in the editing process, questionnaires that did not represent farms according to the census definition were withdrawn from further processing. (See p. XIII.) As the second major step, the remaining questionnaires were examined for errors, omissions, and inconsistencies. Among the specific items subjected to consistency checks were the following:

- Total acreage compared with its distribution by use.
- Acreage of individual crops harvested compared with total cropland harvested.
- Irrigated acreage compared with total acres in the farm.
- Total acreage of individual crops for all purposes compared with the acreage harvested for specific purposes.
- Quantity of crops harvested in relation to acreage harvested.

- f. Sales in relation to production and, for livestock, to inventories.
- g. Total livestock compared with the inventory by age and sex.
- h. Expenditures compared with production and inventories.

Obvious errors in calculations or in units of measure, and misplaced entries were corrected as they were found. Entries not clearly legible were rewritten. Many omissions or inconsistencies were disregarded during editing. Those of significant magnitude could be and were handled more efficiently and economically during mechanical processing operations. Questionnaires containing major inconsistencies and omissions were referred to members of the technical staff for review. Depending on the magnitude of the data involved, the technical staff corrected (or supervised the correction of) the questionnaires either on the basis of information reported for other farms of similar type in the area or on the basis of additional information received in response to letters directed to the farm operators.

Coding of Questionnaires.—Most of the numerical information on a questionnaire was self-coding in that the inquiry number was utilized for the item identification on punch cards or on tabulations runs. However, some manual coding was also necessary for such items as irrigated crops, crops infrequently reported, miscellaneous poultry, etc. Code numbers were entered on questionnaires to classify farms and, in some cases, to identify data for individual items. All farms were coded by size of farm in terms of total acreage, by race, and by tenure of operator. Farms in the 17 Western States, Louisiana, and Hawaii were also coded on the basis of irrigated cropland and irrigated pasture. Additional codes were applied to all farms included in Hawaii to classify them by type of farm and by total value of agricultural products sold. Individual items were coded only where reports were received for crops or poultry not covered by separate inquiries on the questionnaire. This coding was necessary to assure inclusion of the data in the appropriate farm product totals.

Tabulation of Data.—After the questionnaires were edited and coded, the information on them was punched on cards. The cards were then mechanically sorted and fed into machines which transferred the data to tabulation sheets. One of the initial and primary steps in the machine handling of the punch cards was to separate and list those cards which lacked necessary information, those which contained inconsistent or impossible data, and those on which the data were possible but of such magnitude that a further review of the individual questionnaires was warranted. The listing sheets were examined and, as necessary, the cards were corrected. When the cards for a particular county were considered satisfactory, the data were tabulated.

Subject-matter specialists of the Bureau examined all tabulations for reasonableness and consistency. As necessary, they made corrections on the basis of a further review and reappraisal of the original reports and verification of the editing, coding, and punching.

PRESENTATION OF STATISTICS

Statistical Content of This Report.—This report is part of Volume I of the 1959 Census of Agriculture. Volume I consists of 54 parts, each part containing information about agriculture for a single State, Commonwealth, or Possession. Each part contains county data for that particular State or area. The term "county," as used in this report embraces election districts in Alaska, parishes in Louisiana, municipios (municipalities) in Puerto Rico, etc. The statistics for 1959 were obtained from the Census of Agriculture taken in the "conterminous United States" (see following paragraph), Hawaii, and Puerto Rico during the

period October 1959 to January 1960 and in Alaska, American Samoa, Guam, and Virgin Islands as of April 1, 1960. Comparative data for years prior to 1959 were obtained from earlier censuses.

In the planning of the publications for the 1960 Censuses of Population and Housing and the 1959 Census of Agriculture, the term "conterminous United States," recommended by the Board of Geographic Names to designate the 48-State area as it existed before Alaska and Hawaii became States, was adopted by the Bureau of the Census.

The definitions and explanations in this introduction for volume I generally have application broad enough to include the States of Alaska and Hawaii, and the Commonwealth of Puerto Rico and the island possessions. However, specific application in many instances may be limited to the conterminous United States; for example, references to earlier censuses, to the sampling methods and procedures, to specific sections or questions on the questionnaires, and to specific table numbers.

For each part of volume I (one part for each State or area), a facsimile of the appropriate questionnaire is reproduced in the appendix.

The statistics for States and counties are presented according to the same general plan as was followed in the volume I reports for the 1954 and the 1950 censuses. State and county totals are given for nearly all items for which information was obtained in the 1959 census. However, most of the data by economic class of farm, type of farm, and color and tenure of farm operator are given only for States.

Comparative data for the States are given for each census year beginning with 1900. Comparative data for counties are given for the years 1959 and 1950. For some items, the data obtained from the 1959 census are the only ones available.

Comparability of Data.—The data obtained from the various censuses of agriculture are not strictly comparable for all items. For example, differences from one census to another in the time of enumeration, the wording of the questions, and the definition of a farm cause some lack of comparability. Differences considered to have a significant effect on the comparability of data are described in the text and/or mentioned in footnotes to the tables.

Minor Civil Divisions.—As in prior censuses, data for most of the items included in the 1959 Census of Agriculture were tabulated for minor civil divisions. The term "minor civil division" applies to the primary subdivision of a county into smaller geographic areas such as townships, precincts, districts, wards, beats, municipalities, etc. Figures for these smaller geographic areas are not included in any of the published reports, but they may be supplied upon request and payment of the costs of compiling and checking the data.

In some cases, the minor civil division tabulations provide totals for a single minor civil division, even when such totals required a grouping of enumeration assignments. In other cases, the minor civil division tabulations provide totals for a combination of two or more adjoining minor civil divisions. The data for each individual minor civil division included in such totals can be tabulated separately, however, since each questionnaire obtained in the census contains the designation of the minor civil division in which the farm headquarters was located. An additional charge must be made for a separate tabulation of any small area included in a total for two or more combined minor civil divisions.

Requests for census information for minor civil divisions should be directed to the Agriculture Division, Bureau of the Census, Washington 25, D.C.

DEFINITIONS AND EXPLANATIONS

Descriptive Summary and References.—The definitions and explanations that follow relate only to those items that are considered to be inadequately described in the tables where they appear. Although the descriptive terms and explanations refer specifically to the 1959 Census of Agriculture, many of them also apply to earlier censuses. Most of the definitions consist of a résumé of the questionnaire wording, supplemented by excerpts from instructions given to enumerators. For exact wording of the questions and of the instructions included on the questionnaire, see the facsimile of the 1959 Agriculture Questionnaire in the appendix of this report.

An analysis of the questions asked in the 1959 census, and of the data obtained, is given in Volume II, General Report, Statistics by Subjects, United States Census of Agriculture, 1959. The general report presents statistics for States by subject matter.

GENERAL FARM INFORMATION

Census Definition of a Farm.—For the 1959 Census of Agriculture, the definition of a farm was based primarily on a combination of "acres in the place" and the estimated value of agricultural products sold.

The word "place" was defined to include all land on which agricultural operations were conducted at any time in 1959 under the control or supervision of one person or partnership. (For definition of "agricultural operations," see p. X.) Control may have been exercised through ownership or management, or through a lease, rental, or cropping arrangement.

Places of less than 10 acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least \$250. Places of 10 or more acres in 1959 were counted as farms if the estimated sales of agricultural products for the year amounted to at least \$50. Places having less than the \$50 or \$250 minimum estimated sales in 1959 were also counted as farms if they could normally be expected to produce agricultural products in sufficient quantity to meet the requirements of the definition. This additional qualification resulted in the inclusion as farms of some places engaged in farming operations for the first time in 1959 and places affected by crop failure or other unusual conditions.

To avoid biases arising from an enumerator's personal judgment and opinion, the Bureau did not give enumerators the definition of a farm. Instead, enumerators were instructed to obtain questionnaires for all places considered farms by their operators and for all other places that had one or more agricultural operations. (See "Agricultural Operations," p. X.) In 1950, agricultural operations were defined to include every place of 3 or more acres, whether or not the operator considered it a farm, and every place having "specialized operations," regardless of the acreage. "Specialized operations" referred to nurseries and greenhouses and to places having 100 or more poultry, production of 300 or more dozen eggs in 1949, or 3 or more hives of bees. In all of the two last censuses, as a result, questionnaires were filled for a considerable number of places that did not qualify as farms. The determination as to which questionnaires represented farms was made during office processing operations and only those questionnaires meeting the criteria for a farm were included in the tabulations.

For the 1950 Census of Agriculture, places of 3 or more acres were counted as farms if the annual value of agricultural products, whether for home use or for sale but exclusive of home-garden products, amounted to \$150 or more. Places of less than 3 acres were counted as farms only if the annual sales of agricultural products amounted to \$150 or more. A few places with very low agricultural production because of unusual circum-

stances, such as crop failure, were also counted as farms if they normally could have been expected to meet the minimum value or sales criteria.

In the censuses from 1930 to 1940, enumerators were given a definition of "farm" and were instructed to obtain reports only for those places which met the criteria. According to this definition, farms included all places of 3 or more acres, regardless of the quantity or value of agricultural production, and places of less than 3 acres if the value of agricultural products, whether for home use or for sale, amounted to \$250 or more. Because of changes in price level, the \$250 minimum resulted in the inclusion of varying numbers of farms of less than 3 acres in the several censuses taken during this period. Generally, the only reports excluded from tabulation were those taken in error and those showing very limited agricultural production, such as only a small home garden, a few fruit trees, a small flock of chickens, etc.

The change in the number of farms in 1950, as compared with earlier censuses, was partly due to the change in farm definition, especially with respect to farms of 3 or more acres in size. Some of the places of 3 or more acres that were not counted as farms in 1950 because the value of their agricultural production was less than \$150 would have qualified as farms if the criteria had been the same as in earlier censuses.

For 1959, the difference in the number of farms as compared with all prior censuses resulted partly from the change in farm definition. The fact that sales of agricultural products in 1959 was used resulted in the exclusion of some places that would have qualified as farms had the value of agricultural products alone been considered. The increase in the acreage minimum also had an effect. The change in the number of farms due to change in definition, 1950 to 1959, is shown for each county in county table 1. Some characteristics of the places not counted as farms in 1959, but which would have been included in 1950, are shown in State Table 10.

The change in farm definition made in 1950 and again in 1959 had no appreciable effect on the totals for livestock or crops because the places affected by the change ordinarily accounted for less than 1 percent of the totals for a given county or State.

Farm Operator.—The term "farm operator" is used to designate a person who operates a farm, either doing the work himself or directly supervising the work. He may be the owner, a member of the owner's household, a hired manager, or a tenant, renter, or sharecropper. If he rents land to others or has land worked on shares by others, he is considered as operator only of the land which he retains for his own operation. In the case of a partnership, only one partner is counted as an operator. The number of farm operators is considered to be the same as the number of farms.

Farms Reporting or Operators Reporting.—Figures for farms reporting or operators reporting, based on a tabulation of all farms, represent the number of farms, or operators, for which the specified item was reported. For example, if there were 1,922 farms in a county and only 1,465 had chickens 4 months old and over on hand at the time of enumeration, the number of farms reporting chickens would be shown as 1,465. The difference between the total number of farms and the number of farms reporting a particular item represents the number of farms not having that item, provided a correct report was received for all farms.

Where applicable, figures may be given for the number of farms or operators not reporting items that were intended to be obtained for all farms; for example, residence of farm operator, State table 4. The number not reporting, as compared with the total number of farms or operators, indicates the extent of incompleteness of the reporting of the data for the item.

Land Area.—The approximate total land area of States and counties as reported for 1959 is, in general, the same as that reported for all censuses beginning with 1940. Such differences as are shown reflect political changes in boundaries or actual changes in land area caused by changes in the number or size of reservoirs, lakes, streams, etc. For Alaska, the areas for election districts represent the gross area of land and water.

Land in Farms.—Except for managed farms, the land to be included in each farm was determined from the answers to questions about the number of acres owned, the number of acres rented from others or worked on shares for others, and the number of acres rented to others or worked on shares by others. The acres owned and the acres rented from others or worked on shares for others were first added together and then the acres rented to others or worked on shares by others were subtracted. The result represented the number of acres in the farm. The number of acres in a managed farm was the difference between the total land managed and that part of the managed land that was rented to others or worked on shares by others.

In the 1959 and 1950 censuses, enumerators were instructed to record total figures for land owned, land rented from others, and land managed for others, including any part of the land that was rented to others. In censuses prior to 1950, enumerators were instructed to exclude all land rented to others and to record only that portion of the acreage owned, rented from others, or managed for others that was retained by the farm operator. Thus, the figures for the individual tenures of land are not entirely comparable for all censuses. However, the land included in each farm was determined on essentially the same basis for all censuses.

The acreage designated in the tables as "land in farms" consists primarily of "agricultural" land—that is, land used for crops and pasture or grazing. It also includes considerable areas of land not actually under cultivation nor used for pasture or grazing. For example, the entire acreage of woodland and wasteland owned or rented by farm operators is included as land in farms, unless it was being held for nonagricultural purposes or unless the acreage was unusually large.

Except for open range and grazing land used under government permit, all grazing land was to be included as land in farms provided the place of which it was a part was a farm. Land used rent free was to be reported as land rented from others.

Land owned.—All land that the operator and/or his wife held under title, purchase contract, homestead law, or as heir or trustee of an undivided estate at the time of enumeration is considered as owned.

Land Rented from Others.—This item includes not only land that the operator rented or leased from others but also land he worked on shares for others and land he occupied rent free.

Land Rented to Others.—This item includes all land rented or leased to others, except land leased to the government under the Soil Bank, and all land worked by others on shares or on a rent-free basis. For the most part, the land rented to others represents agricultural land but it also includes land rented for residential or other purposes. The tenant is considered as the operator of land leased, rented, or worked on shares even though his landlord may supervise his operations. The landlord is considered as operator of only that portion of the land not assigned to tenants.

Land Managed.—This item includes all tracts of land managed for one or more employers by a person hired on a salary basis. A hired manager was considered to be the operator of the land he managed since he was responsible for the agricultural operations on that land and frequently supervised others in performing those operations. Managed land was always to be reported on a separate questionnaire whether or not the manager also operated a farm on his own account.

Land in Farms According to Use.—Land in farms has been distributed according to the way in which it was used in 1959. The land uses described in the following paragraphs are mutually

exclusive; that is, each acre of land is included only once even though it may have had more than one use during the year.

Cropland Harvested.—This category refers to all land from which any crops were harvested in 1959, whether for home use or for sale. It includes land in fruit orchards, coffee, nuts, and flowers. Matured crops hogged off or grazed were considered to have been "crops harvested" and were reported here. Land from which two or more crops were harvested in 1959 was to be counted only once in the land-use classification. Land used for other purposes either before or after the crops were harvested was to be reported as cropland harvested, without regard to the other uses.

The enumerator was instructed to check the figure for cropland harvested for each farm by adding the acreages of the individual crops and subtracting the acreages from which two or more crops were harvested. This checking procedure was repeated during the office processing of questionnaires for all farms having 100 or more acres of cropland harvested.

Cropland used only for Pasture.—This land-use classification includes rotation pasture and all other land used only for pasture or grazing that the operator considered could have been used for crops without additional improvement. Enumerators were instructed to include land planted to crops that were hogged off, pastured, or grazed before maturity but to exclude land pastured before or after hay or other crops were harvested from it. Permanent open pasture may have been reported either for this item or for "other pasture" depending on whether or not the operator considered it as cropland.

Cropland not Harvested and not Pastured.—This classification represents a total of three subclasses.

Cropland for Future Harvest.—This subclass includes land from which no crops were harvested in 1959, but which was occupied by growing crops (primarily sugarcane and pineapples) intended for harvest in 1960 or later. It does not include land in fruit orchards, nut trees, or coffee, nor land in crops harvested or intended for harvest in 1959 even if such land was planted to crops for harvest after 1959.

Crop Failure.—This subclass includes cropland not harvested because of complete crop failure, low prices, labor shortage, or other reasons.

Other Cropland.—This subclass includes idle cropland and land in soil-improvement crops only.

Woodland Pastured.—This classification includes all woodland where livestock were pastured or grazed in 1959.

Woodland not Pastured.—This classification refers to all woodland not used for pasture or grazing in 1959, including land in operated farms that was placed in the Soil Bank and planted to trees.

Other Pasture.—This classification refers to all land other than woodland and cropland that was used only for pasture or grazing in 1959. It includes noncrop open or brush pasture and cutover or deforested land that has been improved and used for pasture.

Improved Pasture.—This subclass refers to that portion of "other pasture" on which one or more of the following practices had been used: liming, fertilizing, seeding, irrigating, draining, or the clearing of weed or brush growth.

Other Land.—This classification refers to all land not included in the preceding land-use classifications, such as house lots, barn lots, lanes, roads, ditches, land area of ponds, and wasteland. This figure for 1959 was obtained from the machine tabulations by subtracting the total of all other uses from the total land in all farms reported for a given county or classification. Hence, there is no figure given to represent the farms reporting this item.

Other land has been further subdivided into (1) land in lava flows without vegetation; (2) land in palis, gulches, and streambeds; and (3) land occupied by farmsteads, houses, roads, ditches, and windbreaks.

Age of Operator.—Farm operators were classified by age into six age groups. The average age of farm operators was derived from the sum of the ages of all farm operators reporting age divided by the number reporting. The number of farm operators 65 or more years of age is an actual count based on the operators reporting age.

Residence of Operator.—Farm operators were classified by residence according to whether or not they lived on the farms they were operating. Some of those who did not live on the farms they operated themselves lived on farms operated by others. In cases where all the land was rented from others or worked on shares for others, the operator was considered to live on the farm operated provided the dwelling he occupied was included in the rental agreement. The dwelling, in such cases, was not necessarily on the land being operated. Similarly, a farm operator who did not live on the land being cultivated or grazed but who had some agricultural operations (other than a home garden) at his dwelling was considered as living on the farm operated.

Since some farm operators live on their farms only during a part of the year, comparability of the figures for various censuses may be affected by the date of enumeration.

In a few cases, the enumerator failed to report the residence of the farm operator. Differences between the total number of farms and the number of farm operators classified by residence indicate the extent of under-reporting.

Year Began Operating Present Farm.—Enumerators were instructed to report the year during which a farm operator began to operate his present farm and, if the year was 1958 or later, also to report the month. The year was intended to refer to the first year of the period during which the operator had been in continuous charge of his present farm or of any part of it. The time of year that farmers move is indicated by the month they began operating their farms, as shown by a monthly breakdown of the reports for farmers who began operating their present farms during 1958 and 1959.

Off-Farm Work and Other Income.—To obtain a measure of the extent to which farm operators rely on nonfarm sources for part of their income, four questions were asked of all farm operators. The first question asked for the number of days the operator worked off his farm in 1959. The other three questions, to be answered "Yes" or "No," asked (1) whether other members of the operator's household did any work off the farm; (2) whether any income was received from sources other than the sale of agricultural products from the farm operated; and (3) whether the combined income of all members of the household from off-farm work and other sources was greater than the total value of agricultural products sold from the farm operated.

Off-farm work was defined to include work on someone else's farm for pay as well as all types of nonfarm jobs, businesses, and professions, whether the work was done on the farm premises or elsewhere. Exchange work was not included.

Equipment and Facilities.—In 1959 as in several earlier censuses, data about specified equipment and facilities were obtained for only a sample of farms. Farm operators were asked to report equipment and facilities that were on the farm at the time of enumeration, regardless of ownership. They were to include items that were temporarily out of order but not any that were worn out.

Data in terms of actual number were obtained for the following items of farm equipment in 1959: (1) electric motors of 1 or more horsepower, (2) power-spraying and dusting machines, (3) pick-up balers, (4) field forage harvesters, (5) motortrucks, (6) wheel tractors, (7) garden tractors, (8) crawler tractors, and (9) automobiles. Definitions given enumerators included the following specifications, among others: **Pick-up balers** were to include both hand-tie and automatic balers but not stationary ones. **Motortrucks** were to include pick-up trucks and truck-trailer combinations; jeeps and station wagons were also to be included if they were used primarily as trucks, but school buses were specifically excluded. **Wheel tractors** specifically excluded garden tractors, implements with built-in power units, such as self-propelled combines or powered buck rakes, and the

power unit of a truck-trailer combination. **Automobiles** were to include jeeps and station wagons if they were used primarily as passenger cars.

Questions to be answered "Yes" or "No" provided information as to the presence or absence of the following items: (1) telephone, (2) home freezer, (3) milking machine, (4) electric milk cooler, (5) crop drier, (6) power-operated elevator, conveyor, or blower, and (7) electricity.

Comparable data from one census to another are not available for all items. The questions asked about equipment during a given census reflect changes in farm mechanization and in the facilities available to farm families.

Ownership of Sources of Farm Power.—Data regarding the ownership of tractor power used on farms were obtained for the first time in the 1960 Census. On the basis of the reports, farm operators were classified by tenure according to whether they used tractor power or used no power on their farms in 1959. The operators reporting use of power were further classified into four groups on the basis of ownership of the tractors. These four groups are as follows:

Source of power owned by (1) the farm operator alone, (2) the farm operator and another person jointly, (3) the farm operator's landlord, and (4) a private contractor or a government agency.

Farms by Kind of Road.—The classification of farms by the kind of road on which they are located is based on only a sample of farms. The enumerator was instructed to report, on the basis of his own observation, the kind of road on which the most frequently used entrance to the farm was located. For farms consisting of two or more tracts, he was to limit his report to the tract on which the farm operator had his dwelling or other headquarters.

Farm Labor.—The questions about farm labor related to persons working during the calendar week preceding the week of enumeration. Since the enumeration starting dates varied by geographic areas, and the enumeration within each area lasted over a period of several weeks, the calendar weeks to which the data apply also vary. Thus, the data for an individual farm may relate to any one week during the months of December or January 1960.

Farm labor was defined to include any work, chores, or planning necessary to the agricultural operations of the farm; and to exclude housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons employed specifically for such work. The farm labor information contained in this report represents estimates based on answers to questions relating to the farm work or chores done during the week by (1) operator, (2) unpaid members of the operator's family, and (3) hired persons. An operator was considered as working if he worked one or more hours; unpaid members of the operator's family, if they worked 15 or more hours; and hired persons, if they worked at all during the week. Persons employed in sugar mills and pineapple canneries were not to be reported as farm laborers.

Data are not fully comparable from one census to another, primarily because of differences in the period to which they relate.

In 1959, as in 1959, the data related to the week preceding the actual enumeration. Unlike 1959, however, enumeration starting dates were identical for all States in 1950 (April 1) but since several weeks were required to complete the enumeration, the calendar week preceding the enumeration was not identical for all farms. In 1940, only persons working the equivalent of two or more days during the specified week were to be included. In 1940, an additional specification limited the workers to those 14 years old and over.

Experience gained from earlier censuses indicates that farm labor data are often unsatisfactorily reported unless the week specified is the week immediately preceding the actual enumeration. When a farm operator was asked to report the number of persons employed during a specified week that was several weeks prior to enumeration, he often reported the highest number of persons employed during the year. Obviously incorrect reports were adjusted to make the data reflect more nearly the situation known to exist during the specified week. Few adjustments were made in those data, however, even though there were indications of incorrect reporting.

Regular and Seasonal Workers.—Hired persons working on the farm during the week concerned were classed as "regular" workers if the period of actual or expected employment was 150 days or more during the year. They were classed as "seasonal" workers if the period of actual or expected employment was less than 150 days. In cases where the period of employment was not reported for an individual farm, it was estimated from data for such items as basis of payment, wage rates, expenditures for labor in 1959, and type of farming operations.

Hired Workers by Basis of Payment.—Hired persons were also classified according to whether they were paid on a monthly, weekly, daily, or hourly basis, or by piecework. In cases of incomplete reporting, the basis of payment for hired workers was supplied during the office processing operations.

Wage Rates and Hours Worked.—The agreed cash rate of pay was asked for each class of hired worker except those employed on a piecework basis. (The number and the earnings of persons paid on a piecework basis were required for those who worked on Friday of the week preceding the enumeration.) The number of hours that workers were expected to work to earn their pay was asked for each class except those employed on an hourly or piecework basis. For 1959, the data include office estimates for farms submitting incomplete reports of wage rates and hours worked. The estimates were consistent with the size and type of operations for the individual farm as compared with similar farms in the area for which complete reports were received.

Fertilizer and Lime.—The questions about fertilizer and lime, relate to the acreage on which fertilizer and lime were used and to the quantity used. Farm operators were asked to report total quantities used in 1959 on the farms they operated regardless of when or by whom the fertilizer and lime were purchased.

Fertilizer.—The report for fertilizer was to refer only to commercial fertilizer and fertilizing materials, including rock phosphate. The acres fertilized and the tons of fertilizer applied to those acres were obtained separately for selected crops. The selected crops varied by region so that it was possible to obtain detailed data for the crops most commonly fertilized in each region. In cases where the same land was used for more than one crop, the acres fertilized were to be reported separately for each crop. If the same crop was fertilized more than once, however, the acres in that crop were to be reported only once. In all cases, the total quantity of fertilizer used in 1959 was to be reported, including quantities used on land occupied by crops planted in 1958 or by crops to be harvested in 1960.

Reports for quantity of fertilizer and fertilizing materials used were required for both dry and liquid materials. The terms "dry" and "liquid" referred to the form in which the fertilizers and fertilizing materials were purchased and not to the way in which they were applied. Thus, dry fertilizers were those purchased in dry or solid form, as powders, dusts, granules, pellets, etc.; liquid fertilizers were those purchased in fluid form, as solutions or as liquefied gases.

Lime.—The data for lime relate to the total acreage limed in 1959 and the total tonnage of lime and liming materials used on those acres for purposes of conditioning the soil. Instructions on the questionnaire stated that ground limestone, hydrated and burnt lime, marl, and oyster shells were to be included but that lime used for spraying or sanitation purposes was to be omitted.

For some counties, the tonnage of lime shown in the table may be less than the tonnage reported for the Agriculture Conservation Program or the Conservation Reserve Program of the Soil Bank.

Specified Farm Expenditures.—The data for farm expenditures are based on reports obtained from all farms. The 1959 questionnaire contained questions for nine items of farm expenditure: (1) purchase of feed for livestock and poultry; (2) purchase of livestock and poultry; (3) machine hire; (4) hired labor; (5) seeds, bulbs, plants, and trees; (6) gasoline and other petroleum fuel and oil; (7) purchase of commercial fertilizer and fertilizing materials; (8) purchase of lime and liming materials; and (9) purchase of insecticides, fungicides, and spraying and dusting materials. For each item specified, the total expenditures made for the farm in 1959 were to be reported, whether made by the farm operator, his landlord, or both. A farm operator who rented part of his land to others was to report only the expenditures for the land he operated himself. Enumerators were instructed to ask respondents who had difficulty estimating their expenses for the period between enumeration and the end of the year to estimate them on the basis of current costs.

Feed.—The report on feed purchased for livestock and poultry was to include expenditures for grain, hay, millfeeds, pasture, salt, condiments, concentrates, and mineral supplements as well as for the grinding and mixing of feed. The estimated cost of items furnished by a landlord, contractor, or other owner for feeding poultry and livestock kept on the farm was also to be included. Payments made by a tenant to his landlord for feed grown on the tenant farm were to be excluded.

Livestock and Poultry.—The cost of baby chicks and turkey poults was to be included in the expenditures made for the purchase of livestock and poultry. Enumerators were instructed to ask the farm operator to include the cost or estimated purchase value of poultry and livestock provided by others and cared for by the operator under a contract feeding arrangement. The cost of livestock purchased for resale within 30 days was not to be included. A short-term transaction of that nature was considered to be a dealer operation, not an agricultural one.

Machine Hire.—Expenditures for machine hire relate to custom machine work, such as tractor hire, sugarcane harvesting, fruit picking, spraying, and dusting. Any amount spent for the labor included in the cost of machine hire was to be considered as part of the total expenditure. The cost of freight or trucking and exchange work without pay were to be omitted.

Hired Labor.—Expenditures for hired labor were to include total cash payments made in 1959 to family members and to others for farm labor. Payments to persons supplied by a contractor or a cooperative organization and paid directly by them or by the crew boss were also to be included. Payments for the following types of work were to be excluded: housework, contract construction work, custom machine work, and repair, installation, or construction work done by persons specifically employed for such work.

Gasoline and Other Petroleum Fuel and Oil.—Expenditures for gasoline and other petroleum fuel and oil were to relate only to the products used in the farm business. Enumerators were instructed to exclude the cost of petroleum products used for the family automobile when operated for other than farm business purposes and of products used in the farmhouse for heating, cooking, and lighting.

Seeds, Bulbs, Plants, and Trees.—Expenditures were to represent the total amount spent for seeds, bulbs, plants, and trees to be used on the farm operated. The value of seed grown on the farm was to be excluded.

Commercial Fertilizer and Fertilizing Materials.—Expenditures for commercial fertilizer were to include amounts spent for commercial fertilizer and fertilizing materials only.

Farm Mortgage.—The farm mortgage inquiry on the 1959 questionnaire was to be answered by farm owners who operated all or part of the land they owned. For both full owners and part owners the amount of mortgage debt and data on land owned relate to all land owned including that rented to others. For censuses prior to 1950, the data relating to mortgage indebtedness relate only to owned land operated by the farm operator.

Cash Rent.—The data on cash rent relate only to cash tenants and share-cash tenants.

CROPS

Crops Harvested.—The 1959 agriculture questionnaire was similar to the questionnaire used in several previous censuses in that it provided for the collection of detailed data for all crops harvested on each individual farm. The variation in the crops listed on the questionnaires used in different States made possible the separate reporting of all important crops grown in a given area. All versions of the questionnaire contained several "All other crops" questions where crops not specifically listed in separate questions were to be reported.

Acreage of Crops Harvested.—In most instances, except for pineapples, the acreage reported for individual crops represents the area harvested during 1959. The area harvested is often less than the area planted. For fruit orchards and groves, coffee plantations, and planted nut trees, the acreage reported represents the total area in both bearing and nonbearing trees and vines as of the date of enumeration—usually a date in December 1959. For pineapples, the acreage represents the acres harvested for the year ending May 31, 1959.

Quantity of Crops Harvested.—Except for pineapples, data for quantity harvested relate to the calendar year 1959. For pineapples in Hawaii, the acres and quantity harvested relate to the year ending May 31, 1959. Respondents were to estimate quantities not yet harvested at the time of enumeration.

Unit of Measure.—The unit of measure in which quantities were to be reported has varied for some crops, not only from State to State, but also from census to census. The aim has been to permit reporting in the units of measure currently in use. In the State and county tables, the quantities harvested for each crop are usually expressed in the unit of measure given on the 1959 agriculture questionnaire. To provide readily comparable information, data published in earlier reports in different units of measure generally have been converted to the units used in 1959.

Irish Potatoes and Sweetpotatoes.—For Irish potatoes and sweetpotatoes (including yams), the total quantity harvested was to be reported for each crop in all cases, whether harvested for home use or for sale or whether used for livestock feed. The acreage harvested was to be reported for each crop only in cases where the quantity amounted to 10 or more hundredweight. This method of reporting was designed to facilitate the enumeration of potatoes harvested on small plots for home use.

Tree Fruits, Nuts, and Coffee.—In 1959, fruit trees, nut trees, and coffee trees were not enumerated for farms having a combined total of less than 20 at the time of enumeration. Both bearing and nonbearing trees and vines were to be included but not any that had been abandoned. For censuses prior to 1959, all fruit or nut trees and coffee trees on the farm were to be enumerated, regardless of the number. Because of this change in enumeration procedure, the data for 1959 are not fully comparable with those for earlier censuses.

In 1959, the area in fruit orchards, groves, coffee plantations, and planted nut trees was enumerated when there were 20 or more fruit trees, nut trees, and coffee trees. In 1950, the corresponding area was enumerated only if it amounted to one-half acre or more. In censuses prior to 1950, the area was to be reported regardless of its size or of the number of trees. Enumerators frequently omitted the fractional acreages in small plantings and home orchards, however.

In 1959, Hawaii and California were the only States for which the acreage in each individual fruit and nut crop was obtained. The number of bearing and nonbearing trees or vines on the farm at the time of enumeration and the quantity harvested in 1959 were to be reported separately for each fruit and nut crop. The unit of measure in which quantities were to be reported varied from one State to another. Tables in this report show quantities in the unit of measure appearing on the 1959 questionnaire used in the State.

Flowers, Trees, and Ornamental Plants.—The questions about flowers, trees, and ornamental plants related only to products grown on the place for sale. Crops bought for resale without additional cultivation were to be excluded. The number of plants sold and the quantity of flowers sold were to be reported separately for each of the important kinds of flowers and flowering plants.

Area was obtained for fruit and nut trees, shrubs, vines, and ornamental plants being grown for sale, and for flower seeds, bulbs, vegetable seeds, and vegetable plants produced for sale in 1959.

Forest Products.—The forest products data obtained in the Census of Agriculture relate only to the products cut on farms. Commercial timber operations and forest products grown or cut on nonfarm places are excluded. Therefore, the data in this report do not represent the total forestry output or income for a county or State.

The quantity cut, whether for home use or sale, and the quantity sold were obtained for individual forestry products such as firewood, fence posts, and sawlogs. Value of sales were obtained for charcoal, firewood, fence posts, sawlogs, lumber, sisal, Christmas trees, tree ferns, and uncultivated plants sold in 1959.

Value of Crops Harvested.—The total value of crops harvested represents the estimated value of all crops harvested during the crop year 1959. It includes the value of quantities consumed on farms as food, feed, seed, etc., as well as quantities sold. Farmers were not asked to report values of crops harvested; the values were calculated in the processing office. For individual crops, the quantity harvested was multiplied by the average price at which the crop was sold in the State. Quantities harvested were not obtained for vegetables, therefore, for those crops, the value of sales, as obtained in the enumeration, was used in the calculation of total value of crops harvested.

Value of Crops Sold.—The questionnaire required value of sales of crops to be reported only for vegetables, flowers, trees, ornamental plants, and forest products. For all other crops, the value of sales was calculated on a county level during processing operations by multiplying the State average prices by either the quantity sold or the quantity harvested. Reports of quantity sold were obtained during the enumeration for most of the major crops. Quantity harvested was used in the calculation of value of crops sold for such crops as sugarcane and pineapples that are customarily grown for sale. The procedures used for the various crops are described on page XI X. In 1950, values of crops sold were obtained for each farm during the enumeration.

IRRIGATION

Definition of Irrigated Land.—Irrigated land is defined as land watered for agricultural purposes by artificial means. These means included subirrigation as well as systems whereby water was applied to the ground surface, either directly or by sprinklers. Land flooded for rice cultivation was considered as irrigated. Land flooded during high-water periods was to be included as irrigated only if water was directed to agricultural use by dams, canals, or other works. The definition of irrigated land specifically excluded land where the "water table," or natural level of underground water, was controlled by drainage works with no additional water brought in by canals or pipes.

Enumeration of Irrigated Land.—A question on total land irrigated was asked in all States, with the exception of Alaska. The acreage reported for this question includes not only irrigated cropland but also any other land that was irrigated in 1959.

The questionnaires used in the 17 Western States, Louisiana, and Hawaii included several additional questions regarding irri-

gation. These questions related to the acreage of land irrigated by sprinklers, irrigated land from which crops were harvested, specific crops irrigated, and source of irrigation water. Such additional data, for irrigated farms, are presented in county table 1a for these States.

Statistics on the irrigation enterprises which supplied irrigation water were collected in the 1959 Census of Irrigation and are published in Volume III, "Irrigation of Agricultural Lands." This report contains a considerable amount of data about irrigation for the 17 Western States, Louisiana, and Hawaii.

Irrigated Farms.—All farms reporting any land irrigated in 1959 are counted as irrigated farms.

Land in Irrigated Farms.—Data for *land in irrigated farms according to use* relate to the entire acreage in these farms, including land that was not irrigated.

Land Irrigated.—Data for land irrigated relate only to that part of the land in irrigated farms that was watered by artificial means at any time in 1959. Separate figures are given for farms reporting land irrigated by sprinklers whether or not the land was also irrigated by other means. Additional figures are given for farms reporting land irrigated by sprinklers only.

Irrigated Cropland Harvested.—The data for irrigated cropland harvested relate to all irrigated land from which crops were harvested in 1959, regardless of the method of irrigation. An instruction on the questionnaire reminded enumerators and respondents to include irrigated land from which hay was cut, irrigated land in both bearing and nonbearing fruit and nut crops, and irrigated land from which volunteer crops were harvested. Each irrigated acre was to be reported only once, regardless of how many crops were harvested from it.

Other Irrigated Land.—This classification was obtained by subtraction of the acreage of irrigated cropland harvested from the acreage of total land irrigated. It represents primarily land in crops for harvest in 1960, irrigated cropland not harvested, and irrigated pasture or grazing land.

Farms Irrigated By Number of Acres Irrigated.—All farms on which any land was irrigated in 1959 are classified according to the number of acres irrigated in County Table 1a for the 17 Western States, Louisiana, and Hawaii. This classification is based on total land irrigated. Therefore, it includes not only the irrigated land from which crops were harvested but also all other irrigated land, regardless of use.

Land Irrigated By Source of Water.—The agriculture questionnaire contained a question as to what proportion of irrigated water used on the farm in 1959 was obtained from ground-water, surface-water, and irrigation-organization sources. Respondents were asked to report separately the percentage of water obtained from each source. The number of acres that were irrigated by water from each source or combination of sources was calculated during office processing operations by applying the percentages to the total land irrigated.

Ground-water sources relate to wells (pumped or flowing) and springs; **surface-water sources** relate to streams, lakes, reservoirs, and sewage and drainage ditches. For each of these sources, only water obtained by pumps or other works operated as part of the operator's own farm or as part of another single farm was to be included. **Irrigation-organization sources** relate to irrigation enterprises organized to supply water to a group of farms, regardless of how or where the enterprise obtained the water. The irrigation enterprise may be a legal organization or a group of farmers informally organized to operate a supply ditch or other works to provide water for their own farms.

LAND-USE PRACTICES

Summary Information.—The 1959 data for land-use practices are based on reports obtained from all farms. The various land-use practices relate to methods for reducing soil erosion, either by improving the soil, controlling the runoff of water, or reducing the blowing of topsoil.

Cropland In Cover Crops.—The data relate to land on which cover crops were turned under for green manure in 1959 and which was then planted to another crop. The entire acreage of cover crops so used was to be reported even if the following crop failed.

Cropland Used for Grain or Row Crops Farmed on the Contour.—This item relates to land on which grain or row crops were planted in level rows around the slope of a hill.

Land in Strip-Cropping Systems for Soil-Erosion Control.—Strip-cropping was defined as the practice of alternating close-sown crops with strips or bands of row crops or of alternating either close-sown or row crops with bands of cultivated fallow land. The published data refer to the total acreage of all fields and tracts in which strip-cropping was practiced in 1959.

System of Terraces on Crop and Pasture Land.—This item relates to the acreage in ridge-type or channel-type terraces constructed on sloping cropland and pastureland.

LIVESTOCK AND POULTRY

Inventories.—Data for livestock and poultry on farms relate to the number on hand at the time of enumeration. All livestock and poultry, including those being kept or fed under contract, were to be enumerated on the farm or ranch where they were, regardless of who owned them. Livestock in transit from one grazing area to another or grazing in national forests, were to be reported as being on the place where the person who had control over them had his headquarters.

The time of year at which livestock and poultry are enumerated affects the data. Therefore, the date of enumeration needs to be considered when totals for the various censuses are compared.

The census of 1920 was taken as of January 1 and those of 1930, 1940, and 1950, as of April 1. A count made in April varies considerably from one made in January. In most areas a large number of animals are born between January and April. A considerable number of older animals die or are sold during the same period. In the range States, along with the change in season and grazing condition, sheep and cattle are moved from one locality or county to another. This movement may affect the comparability of data for counties and, in some cases, for States. The comparability of data by age has been affected also by changes in the questions from one census to another.

Milk Cows, Cows Milked, and Milk Produced.—Data on the number of milk cows, cows milked, and milk produced relate to the day preceding the enumeration. The data for cows milked yesterday and milk produced yesterday are not given in this volume. These figures were obtained primarily to serve the needs of the U. S. Department of Agriculture in making monthly and annual estimates of milk production. These figures can be made available, at a small cost, to others who express an interest in them.

Whole Milk Sold.—Data for whole milk sold relate to the entire year 1959. All milk sold from the farm (except quantities purchased from some other place and then resold) were to be included, regardless of who shared the receipts.

Sows and Gilts Farrowing.—In the 1959 census, data were obtained for the number of litters farrowed between December 1, 1958, and June 1, 1959, and from June 1 to December 1, 1959.

Sheep, Lambs, and Wool.—In the 1959 census, questions about sheep, lambs, and wool were asked in all States. Data on shearings and on amount of wool shorn were obtained for lambs and sheep separately.

Goats.—In 1959, questions on goats and kids appeared on the questionnaire. The questionnaire also called for the value of goat milk sold in 1959.

Bees and Honey.—Questions on bees and honey were included on the questionnaires for both the 1959 and the 1950 censuses.

Value of Livestock on Farms.—To obtain the value of livestock on farms, the number of each class of livestock or poultry on hand was multiplied by the State average price for 1959.

Sales of Live Animals.—Data for the number and value of animals sold alive in 1959 are based on reports made by farm operators.

Sales of Poultry and Poultry Products.—For the 1959 Census, sales of chickens were obtained for two groups: (1) broilers and (2) other chickens. The enumeration of broiler sales presents problems arising from the varied contractual arrangements under which broilers are produced. The questionnaire contained an instruction to the effect that all broilers grown for others under contract were to be reported as sold. During office processing operations, the data reported for inventories and sales of chickens four months old and over, chicken eggs sold, and broilers sold were carefully examined. Obvious inconsistencies indicating confusion between broilers and other chickens were corrected on the basis of estimated values and on the basis of data reported for expenditures for feed, poultry and livestock purchases, hired labor, etc.

CLASSIFICATION OF FARMS

Scope of Classification.—Detailed data for farms classified by size, by race of operator, by tenure of operator, by economic class, and by type of farm are totals for all farms. The farm classifications by size of farm, race of operator, tenure of operator, economic class of farm, and type of farm were made in the processing office on the basis of data reported on each questionnaire.

Farms by Size.—Farms were classified by size according to the total land area established for each farm. The same classification was used for all States. According to definition, a farm is essentially an operating unit, not an ownership tract. All land operated by one person or partnership represents one farm. In the case of a landlord who has assigned land to croppers or other tenants, the land assigned to each cropper or tenant is considered a separate farm even though the landlord may operate the entire landholding as one unit in respect to supervision, equipment, rotation practice, purchase of supplies, or sale of products. A change was made in the size classification for 1959, as contrasted with several preceding years, by subdividing the 1,000-acre-and-over group and by combining two previously recognized groups, viz, 10 to 29 acres and 30 to 49 acres.

Farms by Race of Operator.—Farms were classified by race of operator as follows: Caucasian, Hawaiian, or part-Hawaiian, Japanese, Chinese, Filipino, and all other races.

Farms by Tenure of Operator.—The classification of farms by tenure of operator was based on data reported for land owned, land rented from others or worked for others on shares, land managed for others, and land rented to others or worked on shares by others.

For 1959, each questionnaire was coded, during the editing process, to indicate whether it represented a farm operated by a full owner, part owner, manager, or tenant. The questionnaires for tenants were given a code to indicate the kind of tenant.

The various classifications of tenure, as used for the 1959 census, are defined below:

- a. **Full Owners** operate only land they own.
- b. **Part Owners** operate land they own and also land rented from others.
- c. **Managers** operate land for others and are paid a wage or salary for their services. Persons acting merely as caretakers or hired as laborers are not classified as managers. If a farm operator managed land for others and also operated land on his own account, the land operated on his own account was considered as one farm and the land managed for others as a second farm. If, however, he managed land for

two or more employers, all the managed land was considered to be one farm.

- d. **Tenants** rent from others or work on shares for others all the land they operate. They are further classified, as described below, on the basis of rental arrangements in regard to the payment of cash rent, sharing of crops, and sharing of livestock or livestock or livestock products.
 - (1) **Cash Tenants** pay cash rent, either on a per-acre basis or for the farm as a whole.
 - (2) **Share-Cash Tenants** pay part of the rent in cash and part in a share of the crops and/or of the livestock and livestock products.
 - (3) **Crop-Share Tenants** pay a share of the crops but not of the livestock or livestock products.
 - (4) **Livestock-Share Tenants** pay a share of the livestock or livestock products. They may or may not also pay a share of the crops.
 - (5) **Other and Unspecified Tenants** are those who did not qualify for inclusion in any of the foregoing subclassifications. They may have had the use of land rent-free or in return for a fixed quantity of products, payment of taxes, maintenance of buildings, etc.

Rental Agreement for Part Owners And Tenants.—State Table 24 presents data regarding the rental agreement for part owners and tenants for the censuses of 1959 and 1954.

Farms by Economic Class.—The totals for farms by economic class are for all farms. The economic classifications represent groupings of farms that are similar in characteristics and size of operation. The economic classes were established on the basis of one or more of four factors: (1) total value of all farm products sold, (2) number of days the farm operator worked off the farm, (3) the age of the farm operator, and (4) the relationship of income received by the operator and members of his household from nonfarm sources to the value of all farm products sold. Institutional farms, Indian reservations, agricultural experiment stations, and grazing associations were always classified as "abnormal."

The total value of farm products sold was obtained by addition of the reported or estimated values for all products sold from the farm. The value of cattle and calves, horses, hogs and pigs, sheep and lambs, goats and kids, some poultry products, vegetables, flowers, trees and ornamental plants, and miscellaneous forest products was obtained from the farm operator during the enumeration. The quantity sold was obtained during enumeration for coffee, fruits, and nuts. To obtain the value of sales of these products, the quantity sold was multiplied by State average prices.

For each of the other products, the entire production was multiplied by the State average price. If the resulting value amounted to \$100 or more, the entire quantity produced was considered as sold. This procedure was followed only in establishing the economic class and the type of farm but was not used in establishing the total value of products sold from the farm. (See p. XX.)

Farms were grouped into two major categories, commercial farms and other farms, mainly on the basis of total value of products sold. The 1959 class intervals and some of the criteria for determination of a given class are different from those used in 1950. In general, for 1959, all farms with a value of sales amounting to \$2,500 or more were classified as commercial. Farms with a value of sales of \$50 to \$2,499 were classified as commercial if the farm operator was under 65 years of age and (1) he did not work off the farm 100 or more days during the year and (2) the income received by the operator and members of his family from nonfarm sources was less than the value of all farm products sold. The remaining farms with a value of sales of \$50 to \$2,499 and institutional farms were included in one of the groups of "other farms."

Commercial farms were divided into six economic classes on the basis of the total value of all farm products sold, as follows:

<i>Class of Farm</i>	<i>Value of Farm Products sold</i>
I-----	\$40,000 and over
II-----	\$20,000 to \$39,999
III-----	\$10,000 to \$19,999
IV-----	\$5,000 to \$9,999
V-----	\$2,500 to \$4,999
VI-----	\$50 to \$2,499

*Provided the farm operator was under 65 years of age, and—

(1) he did not work off the farm 100 or more days, and (2) the income that he and members of his household received from nonfarm sources was less than the total value of farm products sold.

Other farms were divided into three economic classes as follows:

a. **Class VII, Part-time.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-time" if the operator was under 65 years of age and he either worked off the farm 100 or more days or the income he and members of his household received from nonfarm sources was greater than the total value of farm products sold.

b. **Class VIII, Part-retirement.**—Farms with a value of sales of farm products of \$50 to \$2,499 were classified as "part-retirement" if the farm operator was 65 years old or over. Many of these are farms on which the income from nonfarm sources was greater than the value of sales of agricultural products. Others are residential, subsistence, or marginal farms. In previous censuses, the age of the farm operator was not a criterion for grouping farms by economic class. Since the number of elderly people in our population has been steadily increasing during recent years, a separate classification for farms operated on a part-retirement basis was considered important for an adequate analysis of the agricultural structure of a county or State.

c. **Class IX, Abnormal.**—All institutional farms and Indian reservations were classified as "abnormal," regardless of the value of sales. Institutional farms include those operated by hospitals, penitentiaries, schools, grazing associations, government agencies, etc.

Farms by Type.—The type represents a description of the major source of income from farm sales. To be classified as a particular type, a farm had to have sales of a particular product or group of products amounting in value to 50 percent or more of the total value of all farm products sold during the year.

The types of farms, together with the products on which type classification is based, are as follows:

<i>Type of Farm</i>	<i>Source of Cash Income</i>
	(Products with sales value representing 50% or more of total value of all farm products sold)
Sugarcane-----	Sugarcane.
Pineapple-----	Pineapples.
Coffee-----	Coffee.
Other field-crop-----	Potatoes (Irish and sweet), rice, taro, peanuts, lotus roots, etc.
Vegetable-----	Vegetables.
Fruit-and-nut-----	Tree fruits and nuts.
Poultry-----	Chickens, chicken eggs, turkeys, and other poultry products.

Dairy-----Milk and cream. The criterion of 50 percent of total sales was modified in the case of dairy farms. A farm having value of sales of dairy products amounting to less than 50 percent of the total value of farm products sold was classified as a dairy farm, if—

(a) Milk and cream sold accounted for more than 30 percent of the total value of products sold and—

(b) Milk cows represented 50 percent or more of total cows and—

(c) The value of milk and cream sold plus the value of cattle and calves sold amounted to 50 percent or more of the total value of all farm products sold.

Livestock other than dairy and poultry-----Cattle, calves, hogs, sheep, goats, wool and mohair except for farms in the 17 Western States, Louisiana, Hawaii, and Florida that qualified as livestock ranches.

Livestock Ranches-----Farms in the 17 Western States, Louisiana, Florida, and Hawaii were classified as livestock ranches if the sales of livestock, wool, and mohair represented 50 percent or more of the total value of farm products sold and if pastureland or grazing land amounted to 100 or more acres and was 10 or more times the acreage of cropland harvested.

General-----Forage. A farm was classified as general also if it had cash income from three or more sources and did not meet the criteria for any other type.

Miscellaneous-----Flowers, forest products, mules, horses, colts, and ponies. Also all institutional farms.

Value of Farm Products Sold.—Data for the value of farm products sold in 1959 were obtained by enumeration for some products and by estimation for others. The questionnaire used for the 1959 census provided for farm operators to report value of sales for the following products:

Vegetables	Calves
Flowers, trees, and ornamental plants	Hogs and pigs
Forest products	Sheep and lambs
Miscellaneous poultry products	Horses, colts, and ponies
Cattle	Goats and kids

For all other agricultural products, the value of sales was estimated during the office processing. The State average prices used for calculating the value of farm products sold were obtained from reports by the University of Hawaii or other sources.

For the products for which data on quantities sold were obtained during enumeration, the State average prices were multiplied by the county totals of the quantities reported as sold or the quantities reported as produced for sale.

For most of the agricultural products which are customarily raised for sale, the entire quantity produced was considered to be sold. The State average prices were, accordingly, multiplied by the county total of production. The following crops were covered by this procedure:

Sugarcane	Pineapples	Wool
-----------	------------	------

The data for the sales of farm products represent total sales for the entire farm, regardless of who shared the receipts. For tenant-operated farms, the landlord's share of agricultural products was considered as sold provided the products were moved off the tenant farm. All crops, livestock, and poultry raised under a contract arrangement were considered as sold from the farm where they were raised. For institutional farms, all agricultural items produced on land operated by the institution and consumed by the inmates were to be reported as sold.

All sales data relate to one year's farm operations. Crop sales are for crops harvested during the crop year, whether the crops

were actually sold immediately after harvest or placed in storage for later sale. Sales of livestock and livestock products relate to the calendar year, regardless of when the livestock or products were raised or produced. All wool reported as shorn or clipped was considered as sold.

Enumerators were instructed to record gross values of quantities sold, with no deductions for feed, seed, fertilizer, water, labor, or marketing costs. For some products, however, net values may have been reported. Adjustments were made in the data reported only in cases of obvious error.

¹Does not include acreage for farms with less than 10 hundredweight harvested.²Green weight.³Acres in the crop and acres fallow or between cycles of crops are as of June 1, 1959, and April 1, 1950. Data for the crops harvested are as of June 1, 1958-May 31, 1959, and January 1, 1949-December 31, 1949.⁴Number.⁵Data relate to crop year 1949. The questionnaire called for sugarcane harvested during the crop year October 1948, to September 1949; however, prior to the enumeration, special instructions were given to enumerators to obtain the data on the production of sugarcane for the calendar year 1949.⁶Value of sales for wetland taro included in the value of sales for dryland taro.⁷Includes receipts from sale of pasture and grazing privileges.⁸Excludes Irish potatoes and sweetpotatoes, except for the 1920 Census, which included potatoes for home use only.⁹Excludes Irish potatoes and sweetpotatoes.¹⁰Includes lima beans and soybeans.¹¹For 1959, does not include data for farms with less than 20 trees. See text.¹²Bunches.¹³Boxes.¹⁴Bags.¹⁵Included with lemons.

1 to 9 acres.....	826	400	220	1,224	834	6,364	141,727
10 to 19 acres.....	11	6	5	13	6	11	11
20 to 29 acres.....	4	1	1	3	1	1	1
30 to 49 acres.....	4	1	...	2	2
50 to 99 acres.....	1	...	1	1	2
100 to 199 acres.....	3	1	2	...	2
200 to 499 acres.....	...	1	...	2	2	...	2
500 to 999 acres.....	1	2
1,000 or more acres.....	2	36
Cropland used only for pasture.....	25	10	9	16	15	7	30
1,159 acres.....	2,159	1,123	1,139	3,458	3,623	3,950	143,391
Cropland not harvested and not pastured.....	16	1	6	11	6	4	45
650 acres.....	650	39	334	832	1,221	4,710	133,522
Cropland for future harvest.....	13	1	6	8	2	4	40
463 acres.....	463	39	296	689	302	4,240	121,933
Crop failure.....	2	1	1	1	1
16 acres.....	16	30	10	470	6
Other cropland.....	7	...	3	3	3	...	12
171 acres.....	171	...	38	113	909	...	11,583
Woodland pastured.....	9	8	5	22	6	6	16
385 acres.....	385	84.9	496	2,828	1,986	2,810	102,793
Woodland not pastured.....	4	3	1	15	5	37	37
230 acres.....	230	196	60	1,552	1,177	5,994	283,280
Other pasture (not cropland and not woodland).....	32	19	18	89	20	18	53
2,815 acres.....	2,815	2,439	2,018	22,578	8,630	10,037	853,645
Improved pasture.....	17	11	11	55	13	17	29
1,143 acres.....	1,143	533	983	6,531	2,447	5,697	100,007
Irrigated land in farms.....	5	3	2	6	5	2	31
126 acres.....	126	185	22	38	1,048	47	133,948
Irrigated cropland harvested.....	3	2	2	6	5	...	26
31 acres.....	31	100	7	36	652	...	67,706
Land use practices							
Cropland in cover crops.....	1	1	1	...	1
112 acres.....	112	50	50
Cropland used for grain or row crops farmed on the contour.....	1	2	...	5
2 acres.....	2	27	...	27,039
Land in strip-cropping systems for soil-erosion control.....	1	...	3
1 acres.....	15	...	5,425
System of terraces on crop and pasture land.....	1	1	...	7	2	1	6
143 acres.....	143	180	...	448	392	85	37,172
FARM OPERATORS BY AGE							
Operators reporting age.....	49	28	19	108	34	24	87
Under 25 years.....	1	1
25 to 34 years.....	5	5	1	11	9	3	8
35 to 44 years.....	15	6	3	35	9	7	19
45 to 54 years.....	11	10	4	31	6	10	29
55 to 64 years.....	14	6	7	22	5	1	25
65 or more years.....	4	...	4	9	5	3	6
Average age.....	48.9	44.6	53.7	48.3	46.3	47.0	49.5
OFF-FARM WORK AND OTHER INCOME							
Farm operators—							
Working off their farms, total.....	35	20	10	71	19	10	14
1 to 89 days.....	4	1	2	5	4	3	2
90 to 199 days.....	6	2	3	10	3	2	...
200 or more days.....	25	17	5	56	12	5	12
With other members of family working off farm.....	10	8	4	30	4	2	5
Income from sources other than farm operated and off-farm work.....	20	9	4	33	12	5	10
With other income of family exceeding value of agricultural products sold.....	20	16	6	42	13	4	7
Operators not working off their farms or not reporting as to work off their farms.....	15	8	9	37	15	14	73
With other members of family working off farm.....	3	1	4	16	9	1	9
With income from sources other than farm operated.....	8	4	6	22	7	7	38
With other income of family exceeding value of agricultural products sold.....	2	1	1	11	4	2	8

See footnotes at end of table.

State Table 20.—FARMS AND FARM CHARACTERISTICS BY SIZE OF FARM: CENSUS OF 1959—Continued

Item (For definitions and explanations, see text)	Total all farms	Size of farm				
		Under 10 acres	10 to 49 acres	50 to 99 acres	70 to 99 acres	100 to 199 acres
FARMS BY COLOR AND TENURE OF OPERATOR						
All farm operators						
Full owners	number...	2,398	1,424	753	64	41
Part owners	number...	1,315	417	610	58	31
All tenants	number...	2,415	1,722	610	117	20
Cash tenants	number...	2,023	1,442	512	15	14
Share-crop tenants	number...	18	6	11
Crook-share tenants	number...	38	1	21
Livestock-share tenants	number...	1
Other and unspecified tenants	number...	31	235	66	2	6
FARMS BY TYPE OF FARM						
Pineapple farms	number...	86	6	40	9	6
Sugarcane farms	number...	685	141	444	26	27
Coffee farms	number...	568	289	260	5	5
Other field-crop farms	number...	101	63	34
Vegetable farms	number...	351	176	156	6	5
Fruit-orchard farms	number...	324	55	70	2	2
Poultry farms	number...	214	156	56	1	1
Dairy farms	number...	68	13	22	6	5
Livestock farms other than poultry and dairy farms	number...	361	217	68	16	14
Livestock ranches	number...	169
General farms	number...	1,498	2,442	829	67	51
Miscellaneous farms	number...
SPECIFIED EQUIPMENT AND FACILITIES AND KIND OF ROAD						
Electric motors of 1 or more horsepower	farms reporting...	1,147	585	344	25	26
Power-spraying and dusting machines	number...	2,423	823	656	44	62
Pick-up balers	farms reporting...	1,578	594	731	50	38
Field forage harvesters	number...	1,441	646	848	65	45
Volant trucks	farms reporting...	9	1
Tractors	number...	22	1	2
Tractors other than garden	farms reporting...	62	10	18	3	3
1 tractor	number...	34	15	24	3	2
2 tractors	farms reporting...	3,380	1,620	1,226	90	84
3 or more tractors	number...	7,754	1,862	1,439	173	144
Wheel tractors	farms reporting...	1,597	648	644	63	48
Crawler tractors	number...	3,909	844	898	110	83
Garden tractors	farms reporting...	1,224	370	527	58	45
1 garden tractor	number...	1,224	370	527	58	45
2 or more garden tractors	farms reporting...	425	806	676	71	56
Wheel tractors	number...	894	329	413	40	28
Crawler tractors	farms reporting...	149	39	91	11	11
Garden tractors	number...	45	11	5	...	6
1 garden tractor	farms reporting...	31	10	1	...	3
2 or more garden tractors	number...	53	...	1	...	1
Wheel tractors	farms reporting...	1,018	350	458	40	30
Crawler tractors	number...	1,431	373	511	42	35
Garden tractors	farms reporting...	1,431	373	511	42	35
1 garden tractor	number...	1,431	373	511	42	35
2 or more garden tractors	farms reporting...	1,431	373	511	42	35
Wheel tractors	number...	625	353	199	19	10
Crawler tractors	farms reporting...	786	379	422	24	10
Garden tractors	number...	4,416	2,541	1,315	103	91
Automobiles	farms reporting...	1,416	1,165	1,767	142	126
Automobiles and/or motorcycles	number...	2,307	2,991	1,681	125	104
Telephone	farms reporting...	2,384	2,524	1,351	97	80
Home freezer	farms reporting...	2,330	1,272	791	69	55
Milking machine	farms reporting...	79	17	5	5	1
Electric milk cooler	farms reporting...	78	16	22	6	4
Crop drier (for grain, forage, or other crops)	farms reporting...	519	240	233	6	5
Power-operated elevator, conveyor, or blower	farms reporting...	467	103	130	7	3
Electricity	farms reporting...	5,011	3,076	1,582	115	95
Farm a power line	number...	68	12	27	3	2
Farm a home plant	farms reporting...	1
Farms by kind of road on which located						
Hard surface	farms reporting...	3,480	2,033	1,061	82	64
Gravel, shell, shale, or volcanic cinder	number...	1,437	807	650	32	33
Dirt or unpaved	farms reporting...	1,501	712	275	20	9
Less than 1 mile to a hard surface road	farms reporting...	835	567	196	19	16
1 or more miles to a hard surface road	number...	264	145	79	4	4
1 mile	farms reporting...	131	67	28	5	1
2 to 5 miles	farms reporting...	123	66	41	1	3
6 miles	number...	5	2	1
5 or more miles	farms reporting...	27	10	9	2	...
FARM LABOR, WEEK PRECEDING ESTIMATION						
Hired workers	farms reporting...	1,070	382	348	28	32
Part or unemployed	persons...	16,413	867	1,343	109	130
Regular hired workers (employed 15 or more days)	farms reporting...	505	146	154	21	23
Persons...	number...	14,403	279	444	68	79
Farms reporting by number of regular hired workers	farms reporting...	189	83	63	10	11
1 hired worker	number...	85	39	29	1	...
2 hired workers	farms reporting...	78	16	34	6	5
3 or 4 hired workers	number...	66	9	21	7	4
5 to 9 hired workers	farms reporting...	37	1	7	...	2
10 or more hired workers	number...	5
RESIDENCE OF FARM OPERATOR						
Residing on farm operated	operators reporting...	4,953	2,951	1,497	103	88
Not residing on farm operated	operators reporting...	1,253	597	483	39	31
Operators not reporting residence	number...	36	21	8	1	...

See footnotes at end of table.

State Table 20.—FARMS AND FARM CHARACTERISTICS BY SIZE OF FARM: CENSUS OF 1959—Continued

Item (For definitions and explanations, see text)	Size of farm—Continued						
	140 to 179 acres	180 to 219 acres	220 to 259 acres	260 to 499 acres	500 to 999 acres	1,000 to 1,999 acres	2,000 acres and over
FARMS BY COLOR AND TENURE OF OPERATOR

THE QUESTIONNAIRE

Form No. 1 (7-29-50)

This census is authorized by Act of Congress, United States Code, Title 13, Sections 5, 9, 142, 221, 223, and 224, requiring that the inquiries be answered completely and accurately, and guaranteeing that the information furnished be accorded confidential treatment. The census report cannot be used for purposes of taxation, investigation, or regulation.

Budget Bureau No. 41-1845
Approval expires December 31, 1950.

U.S. DEPARTMENT OF COMMERCE—BUREAU OF THE CENSUS
PARSONS, KANSAS

HAWAII

A1 CENSUS OF AGRICULTURE 1959

Section I.—PERSON NOW IN CHARGE.

A1 No. _____

(If a member of the family or anyone else fills this questionnaire for the person in charge, be sure that all the information is given for the person in charge.)

1. What is your name (person in charge)?

(First name) (Middle initial) (Last name)

2. What is your mail address?

(House or street number) (Post office) (Island)

Section II.—OWNERSHIP.

OWNED LAND. All questions relate to land on this island only. If you own more than one tract, include all land owned. Include not only cropland but also pastureland, woodland, wasteland, etc. Include homesteaded land as owned.

3. How many acres do you own? None ☐ Acres _____

(If no land is owned, mark X in the square for "None" and skip to question [4].)

(a) Is there any mortgage debt on the land and buildings owned by you? No ☐ Yes ☐

(b) If "Yes," how much? \$ _____ .00

LAND RENTED OR LEASED FROM OTHERS. Include any separate fields, meadows, pastureland, woodland, and wasteland.

[4] How many acres do you rent or lease from others? Include acres worked on above. None ☐

(If "None," mark X and skip to question [10].)

(a) Give the following information for each landlord

Name of landlord	Acres rented or leased from this landlord
Address of landlord (Post Office and Island)	
Name of landlord	Acres rented or leased from this landlord
Address of landlord (Post Office and Island)	
Name of landlord	Acres rented or leased from this landlord
Address of landlord (Post Office and Island)	

(List additional names under REMARKS. Total acres for all landlords must equal total for question 4.)

5. Do you pay to your landlord any cash as rent? No ☐ Yes ☐

(a) If "Yes," how much for the year? \$ _____ .00

6. Do you pay to your landlord any share of the crops (such as %, 1/4, 1/2)? No ☐ Yes ☐

7. Do you pay to your landlord any share of the livestock or livestock products (such as %, 1/4, 1/2)? No ☐ Yes ☐

8. Do you have this land under any other arrangement (such as a fixed quantity of any product, upkeep of land and buildings, payment of taxes, keep of landlord, rent free, etc.)? No ☐ Yes ☐

9. Is the lease arrangement written? No ☐ Yes ☐

(a) If "Yes," for how many years was the agreement made? (1) _____ (2) _____ (3) _____ (4) _____ (5) _____

(Mark one) 1 year ☐ 2 to 5 years ☐ 6 to 10 years ☐ 11 to 20 years ☐ 21 or more years ☐

LAND MANAGED FOR OTHERS. All questions relate to land on this island only.

[10] How many acres do you operate for others as a hired manager? None ☐

(Enter the name and address of the employer under question 4a). If the person in charge manages land for others and also operates land on his own account, fill a separate questionnaire for each operation.)

LAND RENTED OR LEASED TO OTHERS. All questions relate to land on this island only. Include any separate fields rented to others.

11. How many acres do you rent or lease to others? None ☐

(Further information on the land rented to others will be included in separate questionnaires in the names of the persons working the land. Land worked by members of the household of the person in charge with his equipment should not be considered as rented to others.)

(If "None," mark X and skip to question [12].)

(a) Of the acres rented to others, how many are owned by you? None ☐ Acres _____

ACRES IN THIS PLACE.

[12] Adding acres owned and acres rented from others, then subtracting acres rented to others, we get _____

(Question 3 plus question 4 minus question 11; if managed, question 10 minus question 11.)

ACRES IN THIS PLACE.

13. Is any of the land located in another judicial district? No ☐ Yes ☐

If "Yes," give location of all land in the place:

_____ acres in _____ (Judicial District) _____ (County)

_____ acres in _____ (Judicial District) _____ (County)

Section III.—CROPS HARVESTED IN 1959

Include all crops harvested in 1959 on land in this place (question 12), whether harvested by you or by someone else. Report as harvested any crops, except pineapples and coffee, to be harvested before January 1, 1960. Be sure to include the landlord's share. Do not include crops which were a complete failure or which were not harvested because of labor shortage, low prices, or destruction from any cause. Do not include crops grown by you on any land now farmed or rented by others. If two or more harvests of the same crop were made in 1959, report the total acres of the two or more harvests. For the same amount, always include the landlord's share except that used for seed or feed on this place.

FIELD CROPS

(Answer these questions, if "Yes")

	How many acres were or will be harvested? (Report tenths of an acre if called for)		How much was or will be harvested?	How much was or will be sold?
	Acres	Tenths		
14. Rice?	<input type="checkbox"/>	<input type="checkbox"/>	Cwt.	Cwt.
15. Dryland taro?	<input type="checkbox"/>	<input type="checkbox"/>	Cwt.	Cwt.
16. Wetland taro?	<input type="checkbox"/>	<input type="checkbox"/>	Tons	Tons
17. Napier grass?	<input type="checkbox"/>	<input type="checkbox"/>	Tons	Tons
18. Alfalfa for forage?	<input type="checkbox"/>	<input type="checkbox"/>	Tons	Tons

Were any of the following crops harvested in 1959? ☐

SUGARCANE

19. How many acres are in sugarcane now? None ☐ Acres _____

20. How much sugarcane was harvested in 1959? Acres _____ Tons of cane _____

PINEAPPLES

21. Were any pineapples grown on this place in 1959? No ☐ Yes ☐

(If "No," mark X and skip to question [24].)

(If "Yes," answer questions 22 and 23.)

22(a) How many acres of land were in pineapples on June 1, 1959? None ☐ Acres _____

(b) How many acres of land used for pineapples were fallow or between cycles of crops on June 1, 1959? None ☐ Acres _____

23. How many pineapples were harvested for the year ended May 31, 1959? Acres _____ Tons _____

POTATOES

(Answer these questions, if "Yes")

	How many acres were or will be harvested? (Report tenths of an acre)		How much was or will be harvested?	How much was or will be sold?
	Acres	Tenths		
[24] Irish potatoes?	<input type="checkbox"/>	<input type="checkbox"/>	Cwt.	Cwt. sold
25. Sweetpotatoes?	<input type="checkbox"/>	<input type="checkbox"/>	Cwt.	Cwt. sold

Were any of the following crops harvested in 1959? ☐

VEGETABLES FOR HOME USE AND FOR SALE

26. Were any vegetables or truck crops harvested in 1959 for home use? No ☐ Yes ☐

27. Were any vegetables or truck crops harvested in 1959 for sale? No ☐ Yes ☐

(If "No" for question 27, mark X and skip to question [46].)

(Answer these questions, if "Yes")

	Acres harvested or to be harvested? (Report tenths of an acre)		What was the value of sales?
	Acres	Tenths	
28. Beans (green, string, yardlong, and wax)?	<input type="checkbox"/>	<input type="checkbox"/>	10 \$ _____ .00

FLOWERS, TREES, ORNAMENTALS, PLANTS, ETC.—AREA, NOVEMBER 1959.

[43] Were any fruit and nut trees, shrubs, vines, ornamentals, flowers, flowering plants, cultivated foliage, flower seeds, bulbs, vegetable seeds, or vegetable plants grown on this place in 1959 for sale? ☐ No ☐ Yes

(If "Yes," mark X and skip to question [50].)

(If "Yes," answer questions 47 to 49.)

47. How many flowers and flowering plants were sold in 1959—

	(1) Number of plants or flowers sold or to be sold?	(2) Value of sales?
(a) Anthuriums?	None <input type="checkbox"/>	Plants sold \$ 00 Flowers sold \$ 00 Hundreds sold \$ 00
(b) Caroleas?	None <input type="checkbox"/>	Plants sold \$ 00 Flowers sold \$ 00 Hundreds sold \$ 00
(c) Wood roses?	None <input type="checkbox"/>	Plants sold \$ 00 Flowers sold \$ 00 Hundreds sold \$ 00
(d) Vanda-type orchids?	None <input type="checkbox"/>	Plants sold \$ 00 Flowers sold \$ 00 Hundreds sold \$ 00
(e) All other orchids?	None <input type="checkbox"/>	Plants sold \$ 00 Flowers sold \$ 00 Hundreds sold \$ 00
(f) Lei flowers and other cut flowers (excluding kinds shown above)?	None <input type="checkbox"/>	Plants sold \$ 00 Flowers sold \$ 00 Hundreds sold \$ 00
(g) Cultivated foliage?	None <input type="checkbox"/>	Plants sold \$ 00 Flowers sold \$ 00 Hundreds sold \$ 00

48. What area do you have in fruit and nut trees, shrubs, vines, and ornamentals being grown for sale?

How many were sold in 1959:

(a) Fruit and nut trees?

(b) Shrubs, vines, and ornamentals?

49. How many of the following were produced for sale in 1959:

Flower seeds, bulbs, vegetable seeds, and vegetable plants?	None <input type="checkbox"/>	Acres OR Square feet	Value of sales \$ 00
---	-------------------------------	----------------------	----------------------

TREE FRUITS, NUTS, AND COFFEE TREES

[50] Is there a total of 20 fruit trees, nut trees, and coffee trees on this place? ☐ No ☐ Yes

(If "No," mark X and skip to question [64].)

(If "Yes," answer questions 51 through 63.)

51. How much land is in bearing and nonbearing fruit orchards, groves, and coffee plantings?

Acres 10
Tenshs

(Answer these questions, if "Yes")

	1 How many trees or plants are NOT of bearing age?	2 How many trees or plants are of bearing age?	3 How many pounds were or will be harvested?	4 How many pounds were or will be sold?	5 How many acres are in trees or plants? Report area only if there are 10 or more trees.
52. Oranges?					10
53. Tangerines?					10
54. Avocados? (All types)					10
55. Cooking bananas?					10
56. Eating bananas?					10
57. Guavas?					10
58. Litchies?					10
59. Mangoes?					10
60. Papayas?					10
61. Passion fruit?					10
62. Plums?					10
63. Coffee?					10
64. Macadamia nuts?					10
65. Other fruits and nuts?					10
Give name					
Give name					

OTHER CROPS

[66] Are there any other crops that were harvested in 1959 on this place—Field corn? Peanuts? Lotus roots? ☐ No ☐ Yes

(If "Yes," answer for each crop)

Name of crop? Acres irrigated? Cwt harvested? Cwt sold? Value of sales? \$ 00

Section IV—LAND USE

67. Acres in this place (copy acres from question 12) _____ Acres

(All land in this place should be classified in questions 68 to 76 in terms of how it was used in 1959. Enter whole acres.)

CROPLAND

68. How many acres of land were in fields and tracts from which crops were harvested in 1959? ☐ None ☐ Acres

(This acreage may be obtained by adding field by field or plot by plot, the acres from which any crop was harvested in 1959, and also land on which forage was cut and land in bearing and nonbearing orchards and coffee plantations.)

69. How many acres of land were in growing crops in 1959 that were not harvested? ☐ None ☐ Acres

(Include any land in sugarcane, pineapples, etc. from which no crop was harvested in 1959.)

70. On how many acres did all crops completely fail in 1959? ☐ None ☐ Acres

(Include any land planted to crops which were not harvested because of labor shortage, low prices, or destruction from any cause. Do not include land which was replanted to a crop which was harvested in 1959.)

71. How many acres of land that could be used for crops without additional clearing, draining, or irrigating, were used only for pasture (or grazing) in 1959? ☐ None ☐ Acres

72. How many acres of land that could be used for crops without additional clearing, draining, or irrigating, were not pastured (or grazed) in 1959? ☐ None ☐ Acres

73. How many acres of woodland were pastured (or grazed) in 1959? ☐ None ☐ Acres

74. How many acres of woodland were not pastured (or grazed) in 1959? ☐ None ☐ Acres

75. How many acres were in other pasture? ☐ None ☐ Acres

(Not cropland pasture and not woodland pasture.)

(If "None," mark X and skip to question [76].)

76. How many acres were in other pasture? ☐ None ☐ Acres

(Improved by liming, fertilizing, seeding, irrigating, draining, and controlling weeds and brush.)

77. How many acres were in waste land, bare lots, lanes, roads, ditches, and wasteland? ☐ None ☐ Acres

Add these acres (questions 68, 69, 70, 71, 72, 73, 74, 75, and 76) and enter the total here _____ Acres

77. (Of the acreage of other land (reported in 76), how many acres are in—

(a) Less flows without vegetation? _____ Acres

(b) Pads, galches, strambeds? _____ Acres

(c) Farmsteads, households, roads, ditches, windbreaks? _____ Acres

Section V—IRRIGATION

78. (a) Of the total land in this place (reported in question 67), how many acres were irrigated in 1959? ☐ None ☐ Acres

(If "None," mark X and skip to question [82].)

79. How many acres in this place were irrigated by sprinklers this year? ☐ None ☐ Acres

80. From how many acres of irrigated land were crops harvested this year? ☐ None ☐ Acres

(If "None," mark X and skip to question [82].)

81. What part of the land from which crops were harvested this year was irrigated? ☐ All ☐ Part

(If "Part," give below name and acres irrigated for each crop.)

Name of crop irrigated? Acres irrigated? Name of crop irrigated? Acres irrigated?

(1) _____ (3) _____

(2) _____ (4) _____

[82] What percent of the irrigation water used on this place this year was obtained—

(a) From a well (pumped or flowing) or spring directly by the farm or from another farm? _____ %

(b) From a stream, lake, drainage ditch, or reservoir directly by the farm or from another farm? _____ %

(c) From a water or irrigation company, or other irrigation organization? (Give name below.) _____ %

(The total for questions (a), (b), and (c) must = 100%.)

Name _____ Name _____

Name _____ Name _____

Section VI—RACE, AGE, RESIDENCE, OFF FARM WORK, AND OTHER INCOME

63. What is your race? (Mark one) (1) Caucasian ☐ (2) Hawaiian or Part-Hawaiian ☐ (3) Japanese ☐
(4) Chinese ☐ (5) Filipino ☐ (6) Other ☐ What race? _____

84. How old were you on your last birthday? _____ Years

85. Do you live on this place? No ☐ Yes ☐

86. When did you begin to operate this place? Report month if you began to operate this place since January 1, 1958. _____

OFF-FARM WORK AND OTHER INCOME

87. How many days in 1959 did you work off your farm? Include work at a nonfarm job, business, profession, or on someone else's farm. (Do not include exchange work.)
(Mark one) (1) None ☐ (2) 1 to 49 days ☐ (3) 50 to 99 days ☐ (4) 100 to 199 days ☐ (5) 200 or more days ☐

88. Did any other member of your family living with you have a nonfarm job, business, profession, or work on someone else's farm or plantation in 1959? No ☐ Yes ☐

89. Have you any income in 1959 from any of the following sources? Sale of products from land rented out? Cash rent? Boarders? Social Security? Old-age assistance? Pensions? Veterans' allowances? Unemployment compensation? Interest? Dividends? Profits from nonfarm business? Financial help from members of your family? No ☐ Yes ☐

If "None" for question 87 and "No" for both questions 88 and 89, skip to question 101.

90. Will the income (which you and your family receive from work off the farm and from other sources listed in questions 88 and 89) be greater than the total value of all agricultural products sold or to be sold from your place in 1959? No ☐ Yes ☐

Section VII—FOREST PRODUCTS THIS YEAR, 1959

91. How much was received from the sale of charcoal, firewood, fence posts, sawlogs, lumber, deal, Christmas trees, tree ferns, and uncultivated plants sold in 1959? None sold ☐ \$ _____ 00

(Answer these questions, if "Yes")

	(1) How much was cut in 1959?	(2) How much was sold in 1959?
92. Firewood?	Number _____	Number _____
93. Fence posts?	Number _____	Number _____
94. Sawlogs?	Number _____	Number _____

Section VIII—POULTRY AND LIVESTOCK NOW ON THIS PLACE AND LIVESTOCK SOLD OR PRODUCED IN 1959

Include all poultry and animals on this place owned by you, by your landlord, by your employees, and by others. Include livestock grazing in national parks.

POULTRY

95. Are there any chickens, turkeys, or other poultry on this place? No ☐ Yes ☐

96. If "No," were there any on this place any time this year? No ☐ Yes ☐

If "No" for both questions 95 and 96, mark X and skip to question 105.

97. How many chickens (hens, pullets, roosters, etc.) 1 month old and over are now on this place? None ☐ Number _____

98. How many broilers were or will be sold this year? (Report all broilers sold and those grown for others under contract.) None ☐ Number _____

99. How many hens, roosters, pullets, cockerels, and other chickens were or will be sold this year? None ☐ Number _____

100. How many dozens of chicken eggs were or will be sold this year? None ☐ Dozens _____

101. How many turkeys and turkey fryers were raised this year? (Include those raised from poulters hatched, poulters bought, and those raised for others under contract.) None ☐ Number _____

102. How many turkey hens now on hand are you keeping for breeding next year? None ☐ Number _____

103. How many ducks, geese, and other poultry (not counting chickens and turkeys) were sold this year? None ☐ Give name _____ Number _____

104. How much was or will be received this year from the sale of turkeys, ducks, geese, and miscellaneous poultry, and their eggs? None sold ☐ Value of sales \$ _____ 00

SHEEP AND LAMBS

105. How many ewes, rams, wethers, and lambs of all ages are on this place? None ☐ Number _____

If "None," mark X and skip to question 106.

Of this total, how many are

(a) Lambs under 1 year old? Number _____

(b) Ewes 1 year old and over? Number _____

(c) Rams and wethers 1 year old and over? Number _____

(The total for questions (a), (b), and (c) must equal the number for question 105.)

HORSES

106. How many horses, colts, and ponies are on this place? None ☐ Number _____

SHEEP AND LAMBS SHORN THIS YEAR, 1959

107. Were any sheep or lambs shorn this year? No ☐ Yes ☐

If "No," mark X and skip to question 110.

(Answer these questions, if "Yes")

	(1) How many were shorn?	(2) How much wool was shorn?
108. Were any lambs shorn in 1959?	Number _____	Lb. _____
109. Were any sheep shorn in 1959?	Number _____	Lb. _____

GOATS AND GOAT MILK

110. How many goats and kids of all ages are on this place? None ☐ Number _____

If "None," mark X and skip to question 112.

111. What was the value of goat milk sold in 1959? None ☐ \$ _____ 00

HOGS AND PIGS

112. How many hogs and pigs of all ages, including sows and boars, are on this place? None ☐ Number _____

If "None," mark X and skip to question 113.

Of this total, how many were born

(a) Since June 1, this year? Number _____

(b) Before June 1, this year? Number _____

(The total for questions (a) and (b) must equal the number for question 112.)

SOWS AND GILTS FARROWING

113. How many litters were farrowed since June 1, this year or will farrow before December 1? None ☐ Number of litters _____

114. How many litters were farrowed between December 1, last year, and June 1, this year? None ☐ Number of litters _____

CATTLE AND CALVES (Include all cows and all other cattle and calves, both dairy and beef, on this place.)

115. How many cattle and calves of all ages are on this place? None ☐ Number _____

If "None," mark X and skip to question 119.

Of this total, how many are

(a) Cows? (Include: heifers that have calved.) Number _____

(b) Heifers and heifer calves? (Do not include any heifers that have calved.) Number _____

(c) Bulls, bull calves, steers, and steer calves? Number _____

(The total for questions (a), (b), and (c) must equal the number for question 115.)

COWS MILKED YESTERDAY

116. How many cows and heifers were milked yesterday? None ☐ Number _____

117. How many milk cows were on the place yesterday? (Include dry milk cows and milk heifers that have calved.) None ☐ Number _____

118. How many quarts of milk were produced yesterday? None ☐ Quarts _____

COW MILK SOLD

119. Was any cow milk produced on this place for sale in 1959? No ☐ Yes ☐

If "No," mark X and skip to question 121.

120. How much whole milk was or will be sold in 1959? Quarts _____

BEES AND HONEY IN 1959

121. How many hives of bees did you own in 1959? None ☐ Number _____

If "None," mark X and skip to question 123.

122. How many pounds of honey were produced in 1959 by your bees? Pounds _____

ANIMALS SOLD IN 1959.

Report all sales from this place whether made by you or by others. Report all animals turned over to or sold for your landlord, and animals fed under contract for others. Be sure to report animals which you will sell by December 31, this year.

(Answer these questions, if "Yes")

	(1) How many were or will be sold in 1959?	(2) How much was the value of sales in 1959?
123. Calves?	Number _____	Dollars _____ 00
124. Cattle, not counting calves?	Number _____	\$ _____ 00
125. Horses, colts, and ponies?	Number _____	\$ _____ 00
126. Hogs and pigs?	Number _____	\$ _____ 00
127. Sheep and lambs?	Number _____	\$ _____ 00
128. Goats and kids?	Number _____	\$ _____ 00

Were any of the following animals sold or will any be sold in 1959?

Section IX.—FERTILIZER AND LIME

Include all fertilizer and lime used on this place during 1959, whether purchased by you or by your landlord.

129. On how many acres were commercial fertilizer and fertilizing materials used in 1959?

None ☐ Acres

If "None," mark X and skip to question [130]

If "None," mark X and skip to question [130]

Was fertilizer used in 1959 on any of the following crops?	If "None," mark X	How much was used			
		(1) On how many acres was fertilizer used?	(2) Dry materials* Include rock phosphate	(3) Liquid materials*	Tonnes
a. Hay and cropland pasture?	<input type="checkbox"/>	Acres	Tonnes	Tonnes	10
b. Other pasture (not cropland)?	<input type="checkbox"/>	Acres	Tonnes	Tonnes	10
c. Sugarcane?	<input type="checkbox"/>	Acres	Tonnes	Tonnes	10
d. Pineapples?	<input type="checkbox"/>	Acres	Tonnes	Tonnes	10
e. Coffee?	<input type="checkbox"/>	Acres	Tonnes	Tonnes	10
f. All other crops?	<input type="checkbox"/>	Acres	Tonnes	Tonnes	10

[130] How many acres were limed in 1959? None ☐ Acres

If "None," mark X and skip to question [132]

131. How much lime or liming materials was used in 1959? Tons

Include ground limestone, hydrated and burnt lime, marl, oyster shells, etc. (omit lime used for sprays or sanitation)

Section X.—SELECTED FARM EXPENDITURES AND LAND-USE PRACTICES, 1959

EXPENDITURES Include expenses paid, or to be paid by December 31, 1959, by you and your landlord for this place.

How much was spent in 1959 for	[132] Feed for livestock and poultry?	None <input type="checkbox"/>	\$	00
129. On how many acres were commercial fertilizer and fertilizing materials used in 1959?	132. Feed for livestock and poultry? Include cost of grain, hay, mill feeds, concentrates, and roughages also, amounts paid for grinding and mixing feed.	None <input type="checkbox"/>	\$	00
133. The purchase of livestock and poultry? (include baby chicks)	133. The purchase of livestock and poultry? (include baby chicks)	None <input type="checkbox"/>	\$	00
134. Machine hire? (Include custom work such as tractor hire, plowing, fruit picking, spraying and dusting)	134. Machine hire? (Include custom work such as tractor hire, plowing, fruit picking, spraying and dusting)	None <input type="checkbox"/>	\$	00
135. Hired labor? (Do not include housework, custom work or contract construction work. Include cash payments only.)	135. Hired labor? (Do not include housework, custom work or contract construction work. Include cash payments only.)	None <input type="checkbox"/>	\$	00
136. Seeds, bulbs, plants, and trees?	136. Seeds, bulbs, plants, and trees?	None <input type="checkbox"/>	\$	00
137. Gasoline and other petroleum fuel and oil for the farm business?	137. Gasoline and other petroleum fuel and oil for the farm business?	None <input type="checkbox"/>	\$	00
138. Purchase of commercial fertilizer and fertilizing materials?	138. Purchase of commercial fertilizer and fertilizing materials?	None <input type="checkbox"/>	\$	00
139. Purchase of lime and liming materials?	139. Purchase of lime and liming materials?	None <input type="checkbox"/>	\$	00
140. Purchase of insecticides, fungicides, and spraying and dusting materials?	140. Purchase of insecticides, fungicides, and spraying and dusting materials?	None <input type="checkbox"/>	\$	00

LAND-USE PRACTICES

141. How many acres of land were used to grow cover crops this year and then planted to another crop?	None <input type="checkbox"/> Acres
142. How many acres of cropland used for grain or row crop this year were farmed on the contour?	None <input type="checkbox"/> Acres
143. How many acres of strip-cropping systems for soil erosion control were on this place this year?	None <input type="checkbox"/> Acres
144. How many acres of crop and pasture land on this place have terraces?	None <input type="checkbox"/> Acres

Section XI.—FARM LABOR

145. About how many hours <u>last week</u> did you (the person in charge of this place) do farm work or chores on this place? (Mark one)	(1) 16 hours <input type="checkbox"/>	(2) 12 hours or more <input type="checkbox"/>
146. How many other members of your family did 15 hours or more of farm work or chores on this place <u>last week</u> without receiving cash wages?	None <input type="checkbox"/>	Persons <input type="checkbox"/>

147. How many hired persons did any farm work or chores on this place last week? (Include members of your family receiving cash wages.) None ☐ Persons

If "None," mark X and skip to question [152]

148. Of these hired persons working last week, how many were employed on this place for	(a) 150 days or more during this year? None <input type="checkbox"/> Persons	(b) Less than 150 days during this year? None <input type="checkbox"/> Persons
---	--	--

(The total for questions a and b must equal the number for question 147.)

Number of person	(1)	(2) What was the agreed cash rate of pay? (If more than one person give average)	(3) How many hours per person were these workers expected to work to earn this pay?
149. Of these hired persons working last week, how many were paid on a	Monthly basis? Per month \$	60 per month	Per month hours
	Weekly basis? Per week \$	60 per week	Per week hours
	Daily basis? Per day \$	60 per day	Per day hours
	Hourly basis? Per hour \$	60 per hour	Per hour hours
	Piecework basis? Per piece \$	60 per piece	Per piece hours

(The total of the persons reported in column 1 must equal the number for question 147.)

150. How many hired persons paid on a piecework basis worked on this place last Friday? None ☐ Persons

If "None," mark X and skip to question [152]

151. How much did these hired persons on piecework (reported for question 150) earn for their work last Friday? \$

Section XII.—EQUIPMENT AND FACILITIES NOW ON THIS PLACE

Include equipment, whether owned by you or by others, on this place. Include equipment and facilities that are temporarily out of order.

Number

How many of the following are on this place?

[152] Electric motors of 1 or more horsepower

153. Power-spraying and dusting machines?

154. Pick-up balers?

155. Field forage harvesters (for field chopping of silage and forage crops)?

156. Motorcycles (include pick-ups)?

157. Wheel tractors other than garden?

158. Garden tractors?

159. Crawler tractors (tracklaying)?

160. Automobiles?

161. Telephone?

Do you have on this place?

162. Home freezer (for quick freezing and storing food)? (Do not include refrigerators)

163. Milling machine?

164. Electric milk cooler?

165. Crop drier (for grain, forage or other crops)?

166. Power-operated elevator, conveyor, or blower?

167. Electricity?	Mark one	1	2	3	4
No	Yes, from a power line	Yes, from a home plant			

168. On what kind of road is this place located?

(1) Hard surface	<input type="checkbox"/>	How many miles to a hard surface road?
(2) Gravel, shell, shale, volcanic cinder, or improved dirt	<input type="checkbox"/>	
(3) Dirt or unimproved	<input type="checkbox"/>	

If marked here, answer

169. Who owned the following equipment used on this place in 1958?

Equipment used was owned by

Mark one square for each item below	(1) You (the operator)	(2) You (the operator) and another person jointly	(3) Your landlord	(4) A private contractor	(5) Equipment was not used
a. Electric motors of 1 or more horsepower?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Power-spraying and dusting machines?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Wheel tractors other than garden?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Garden tractors?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Crawler tractors (tracklaying) caterpillars?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

170. On what date did you fill this questionnaire?

1959
